EXECUTIVE SUMMARY ES-1

CHAPTER 1 HISTORY AND BACKGROUND

ORIGINS OF TRAUMA CARE SYSTEMS AND EMERGENCY MEDICAL TRANSPORTATION 1-1
CARE OF THE INJURED AND AIR MEDICAL TRANSPORT—THE U.S. EXPERIENCE..... 1-2
INTEGRATED TRAUMA AND HELICOPTER EMERGENCY SYSTEMS IN THE U.S. 1-3
Trauma Centers vs. Trauma Systems 1-4
National Priorities and Development of Trauma/HEMS Systems 1-5
Professional Associations and Trauma/HEMS Advancements..... 1-10
HELICOPTER AIR MEDICAL TRANSPORT TODAY..... 1-11
SAN FRANCISCO BAY AREA AIR MEDICAL TRANSPORTATION..... 1-12
CONCLUSIONS..... 1-13

CHAPTER 2 PURPOSE AND NEED

BASIS FOR THE STUDY 2-1
BAY AREA AND SAN FRANCISCO TRAUMA CARE 2-4
Bay Area Trauma Centers and Air Medical Access 2-4
San Francisco Trauma Care System..... 2-6
Evolution of Trauma Care in San Francisco and the Role of San Francisco General Hospital Trauma Center 2-7
THE SAN FRANCISCO TRAUMA CARE SYSTEM ENVIRONMENT 2-9
Geography and Demographics 2-9
Trauma Care System Design..... 2-10
CURRENT AIR MEDICAL ACCESS SYSTEM..... 2-11
STRENGTHS AND VULNERABILITIES OF THE TRAUMA CARE SYSTEM 2-12
Single Designated Trauma Center..... 2-12
Capacity Saturation 2-15
Environmental, Geographical and Medical Transport Constraints 2-16
Multiple Casualty Incident Risk—Natural and Geopolitical 2-17
Pediatric Trauma 2-17
San Francisco Off-shore Rescues and the Neighboring Region..... 2-18
TRAUMA SYSTEM NEEDS RELATED TO AIR MEDICAL ACCESS 2-19
Consistently Available Trauma Resources 2-19
Comprehensive Pediatric Trauma Care..... 2-19
Timely Access to Advanced Trauma Care and Improved Patient Transport 2-19
PREVIOUS AIR MEDICAL ACCESS STUDIES IN SAN FRANCISCO 2-20
Medical Use vs. Commercial Use 2-20
The Vertiport Study..... 2-20
The McKesson Report 2-21
Findings and Conclusions..... 2-22

CHAPTER 3 BENEFITS OF AIR MEDICAL ACCESS

INTRODUCTION 3-1

GENERAL BENEFITS OF HEMS 3-2
Trauma Transport 3-4
Scene Transport Studies 3-4
Interfacility Transfer Studies 3-6
Transfers from a Referring Hospital to Trauma Center 3-6
Transfer from Scene Accident to Trauma Center 3-7
Non-Trauma Transport 3-8
PRIMARY BENEFIT: MITIGATION OF TRAUMA SYSTEM VULNERABILITIES 3-9
The Care of Injured Children 3-10
Standard Trauma Care—Consistently 3-10
Multiple Casualty Incidents 3-11
Primary Benefit Summary 3-12
SECONDARY ENEFIT—FINANCIAL SUPPORT AND MAINTAINING QUALITY AT THE TRAUMA CENTER 3-12
Economic Benefit of Air Medical Access 3-13
Patient Volume and Trauma Center Performance 3-14
Medical Staff Recruitment and Retention 3-15
TERTIARY BENEFITS—SAN FRANCISCANS INJURED IN SAN FRANCISCO AND NORTHERN CALIFORNIA 3-15
ADDITIONAL BENEFIT TO THE BAY AREA REGION 3-15
CONCLUSIONS 3-16

CHAPTER 4 HELIPAD SITE STUDY

INTRODUCTION 4-1
HELIPAD DESIGN CRITERIA 4-1
OBJECTIVES 4-2
DESIGN CRITERIA 4-2
Heliport, Helistop or Helipad? 4-2
POTENTIAL HELIPAD SITES 4-8
Rooftop Helipad 4-8
CONCLUSIONS 4-17
STRUCTURAL CAPABILITIES 4-18
Code Requirements 4-21
Building Description 4-21
Assumptions 4-21
Conclusions 4-22
ELEVATOR REQUIREMENTS 4-22
PRELIMINARY COST ESTIMATES AND SCHEDULE 4-24
Timeline 4-25
HELIPAD PERMITTING PROCESS 4-25
Federal Government 4-25
State Government 4-25
City and County of San Francisco 4-26

CHAPTER 5 SAFETY ANALYSIS

SAFETY ASSESSMENT AND ANALYSIS CRITERIA 5-1
Types of Compatibility Concerns 5-1
SAFETY 5-2
Measurement 5-3
Basis for Criteria 5-3
HEMS Accident Data Base 5-5
When Do HEMS Accidents Occur 5-7
SFGH Accident Potential 5-8
HEMS Accident Rate Comparison 5-9
Risk Assessment Factors 5-10
Deaths and Injuries in the Community 5-10
AIRSPACE PROTECTION 5-11
Compatibility Objectives 5-11
Measurement 5-12
Compatibility Strategies 5-12
Basis for Criteria 5-12
OVERFLIGHT 5-13
Compatibility Objectives 5-13
Measurement 5-13
Compatibility Strategies 5-13
Basis for Criteria 5-14
CONCLUSIONS 5-14

CHAPTER 6 NOISE ANALYSIS

INTRODUCTION 6-1
NOISE IMPACT CRITERIA 6-2
Noise Measurement Methods 6-2
Impact Criteria 6-5
EXISTING SOUND LEVELS 6-5
PROPOSED FLIGHT PATHS 6-7
HELICOPTER MODELS 6-8
HELIPAD NOISE PREDICTION 6-8
Helipad Noise Analysis 6-8
Noise Impact Assessment 6-10
Helicopter Noise Abatement Options 6-11
On Approach 6-11
On Departure 6-12
Conclusion 6-13

CHAPTER 7 COMMUNITY OUTREACH

GOALS OF OUTREACH EFFORT 7-1
PUBLIC MEETINGS 7-2

Neighborhood Groups 7-2
Healthcare Provider Community Groups 7-2
Civic Organizations 7-2
Description of Community Meetings: Neighborhood Groups 7-2
Description of Community Meetings: Healthcare Provider Organizations 7-6
Description of Community Meetings: Civic Organizations 7-8
Expert Opinions and Letters of Support 7-8
Helipad Hotline 7-9
COMMUNITY OUTREACH MATERIALS 7-9
SUMMARY OF COMMUNITY CONCERNS 7-9
CONCLUSION 7-9

APPENDICES

A Glossary of Terms Used in Study A-1
B Trauma Scene and Interfacility Transports B-1
C Profile of injury In San Francisco C-1
D Community Noise Measurements D-1
E Handouts from the Community E-1
F Expert Opinions and Letters of Support F-1
G Community Outreach Materials G-1
H Structural Engineer's Report H-1
I Elevator Engineer's Report I-1

FIGURES

2-1 Trauma Air Medical Catchment Areas (Without Proposed SFGH Helipad) .. 2-13
2-2 Trauma Air Medical Catchment Areas (With Proposed SFGH Helipad) 2-14
4-1 Primary Flight Path: North Departure 4-6
4-2 Primary Flight Path: South Departure 4-7
4-3 SFGH Helipad Site Options 4-9
4-4 Alternative 1 (Wing C) Site Location 4-12
4-5 Alternative 2 (Wing A) Site Location 4-14
4-6 Alternative 1 Site plan 4-19
4-7 Alternative 2 Site Plan 4-20
4-8 SFGH Helipad Building Permit process 4-28
6-1 Noise monitoring Locations 6-5
6-2 Muni Routes 6-6
6-3 Proposed Flight Paths 6-7
6-4 Average Day DNL Contours 6-10
6-5 Busy Day DNL Contours 6-12

TABLES

1-1 Bay Area Air Ambulance Providers 1-13
1-2 Bay Area Air Rescue Ambulances 1-14
2-1 Designated Trauma Centers in the Greater San Francisco Bay Region 2-5
4-1 Hospital Helipad Final Approach and Takeoff Area (FATO) and Safety Area Size Requirements 4-4
4-2 SFGH Helipad Site Study Summary 4-18
6-1 Land Use Compatibility Chart 6-4
6-2 Noise Monitoring Around SFGH 6-6
6-3 Helicopter Usage 6-8
7-1 Community Concerns 7-11
