Data source: California Department of Public Health Vital Records Business Intelligence System (VRBIS). Annual reporting period is January 1 through December 31. Analyses are based on one record per live birth delivered in California. The top table shows the total number of live births stratified by Race-ethnicity. The bottom table shows the percentage of births in each calendar year by Race-ethnicity with 95% Confidence Interval. Analyses exclude records for births delivered out-of-state, births to people who are not San Francisco residents, and records with unknown data or errors. Data are not reported for fewer than 20 records.
