

San Francisco General Hospital and Trauma Center's

FACT SHEET

Since 1854, San Francisco General Hospital has evolved into a major academic care medical center. The hospital currently serves approximately 1,500 patients per day (100,000 patients per year) and is the only Level One Trauma Center serving 1.5 million residents of San Francisco and northern San Mateo counties.

All acute care services currently located in the existing main hospital building will be relocated to the new hospital while non-acute care uses that are not subject to Senate Bill 1953 requirements for seismic compliance would remain in the existing hospital. These include outpatient clinics, clinical laboratory, outpatient pharmacy, cafeteria and kitchen, acute psychiatric units, psychiatric emergency services, rehabilitation services, and materials management.

- **NEW HOSPITAL LOCATION:** Potrero Avenue between 22nd and 23rd streets on the main lawn of the current hospital campus
- **HEIGHT:** Nine stories with two basement floors, seven levels above ground and a roof top healing garden.
- **SIZE:** 453,000 square feet
- **BEDS:** 284 beds (32 more than current hospital)
- **NEW EMERGENCY DEPARTMENT LOCATION:** The emergency department will move to its original site at 22nd Street and will increase from 27 to 60 beds.
- **NEW MAIN LOBBY ENTRANCE:** The entrance will be at 23rd Street and will be accessible from Potrero Ave.
- **OPERATING ROOMS:** The number of operating rooms will increase from 10 to 14
- **DEPARTMENTS MOVING INTO THE NEW HOSPITAL:**
 - **Basement 2:** Dietary, Pharmacy, Cardiology, Pulmonary, Diagnostic Imaging (X-Ray), Sterile Processing
 - **Basement 1:** Operating Rooms, Pre-op and Post-op, Endoscopy, Blood Bank
 - **First Floor:** Emergency Department and Trauma Center

- **Second Floor:** Labor & Delivery, Postpartum, Pediatrics, Neonatal Intensive Care
 - **Third Floor:** Intensive Care Units (ICU)
 - **Fourth Floor:** Step Down Medical/Surgical, Step Down ICU, Dialysis
 - **Fifth Floor:** Medical/Surgical Unit, Forensic Unit
 - **Sixth Floor:** Medical/Surgical Unit
 - **Seventh Floor:** Medical/Surgical Unit - Acute Care for the Elderly, Palliative Care, Department of Public Health Operations Center (for citywide emergencies), Roof Garden
- **HELIPAD?** There no plans to build a helipad.
 - **EARTHQUAKE SAFETY:** Base-isolated hospital building will be able to glide 30 inches in any direction -- the most advanced seismic resistant design known today. Meets state standards.
 - **GREEN:** The goal is to reach the Gold level of Leadership in Energy and Environmental Design (LEED) certification. For example, the hospital will reduce its use of water and energy.
 - **ARTWORK:** Public art work selected by the San Francisco Arts Commission in collaboration with hospital staff.
 - **ARCHITECT:** Fong & Chan Architects of San Francisco
 - **CONSTRUCTION:** Webcor Builders, with Construction Management by Jacobs
 - **MANAGEMENT:** San Francisco Department of Public Works
 - **COST:** \$887.4 million to construct. These funds were approved when voters passed Proposition A in November 2008 by an 84% margin. Thank you San Francisco! The city will finance the rebuild through general obligation bonds.
 - **Schedule:** Construction of the new hospital is scheduled for completion 2015
 - **CURRENT SERVICES:** SFGH will continue to operate during the construction of the new hospital. There will be no reduction in inpatient, outpatient or emergency services.
