QUALITY AND SAFETY MEASURES UPDATE
August 2014

DATA UPDATES

- Joint Commission/CMS Core Measure Data Updated for Q1 2014
- New measure sets

CLINICAL EFFECTIVENESS/SAFETY MEASURES

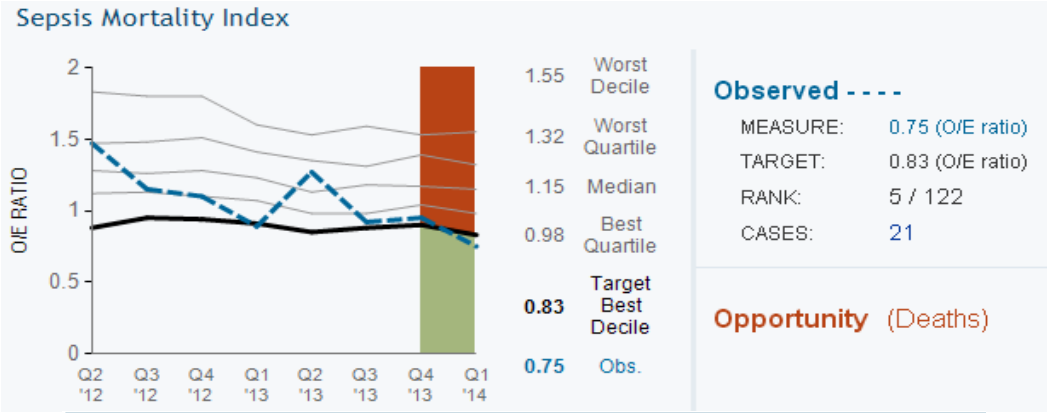
Results/Improvement Opportunities

Core Measures: Q1 2014 – All currently required measures at 100% or AMI, Heart Failure, and Pneumonia

SCIP – 2 cases of incorrect antibiotic selection for GYN cases – Chief of Service notified and Antibiotic Clinical Pharmacist revised SFGH antibiotic guidelines to include recommended medication.
1-2 cases for other SCIP measures contributed to <100% performance. Follow up takes place through the SCIP Task Force.

QUALITY MEASURE NEWS:

SFGH IS TOP 5 UHC HOSPITAL FOR LOW SEPSIS MORTALITY RATIO



Top 5 Q1 2014
