

Avatar Diagnosis Overview

- The federal government is requiring the use of ICD-10 starting in October 2015 for the purposes of submitting billing

- Starting in March, there will be a new diagnosis screen in Avatar
- Using that new diagnosis screen, providers will enter DSM 5/ICD-10 diagnoses
- San Francisco will effectively be switching to DSM 5/ICD-10 in March, effectively ~7 months before the state and federal deadline

Why Switch Early?

- Every client diagnosis will have to be updated before the October deadline (using the new DSM 5 / ICD-10 diagnosis screen)
- All billing submitted after October 2015 will need a DSM5/ICD-10 dx
- Although ICD-10 diagnoses for billing are not required until October, San Francisco is switching to DSM 5 / ICD-10 and the new diagnosis screen early to update diagnoses in time

- From a clinician point of view, you will be using ICD-10/DSM 5 diagnoses starting in March
- From the state's POV, services will be sent with ICD-9 codes up until the October switch, and then with ICD-10 codes after
- This will be handled on the backend

What do I need to do?

- As there is no direct 1-to-1 correlation between DSM IV and DSM 5, every active client will need to have their diagnosis updated manually
- **Reminder: Every client that is active after October, 2015 will need a diagnosis entered in the new Diagnosis screen**

Updating the Diagnosis

- In most cases, you should update the diagnosis for your client on their anniversary date, after their reassessment (when you would normally do this)
- For other clients on your caseload, their diagnosis needs to be updated by October, 2015
- Clients closed before the October deadline do not need to have their diagnosis updated

- New diagnosis screen will be released in early March
- Along with this screen will be reports that can be used to see the clients on your caseload (or at your agency) that still need to have a new diagnosis entered
- The city will release recommended guidelines for ensuring that every diagnosis is updated

January- February

- DSM 5 / ICD-10 Trainings Begin

July 1st

- Suggested goal for updating old diagnoses

March

- New diagnosis screen released
- Clinicians begin updating diagnoses
- All new clients given DSM 5 / ICD 10 diagnoses

October

- Switch to DSM 5 / ICD 10 complete
- All diagnoses updated
- State is receiving ICD-10 diagnoses with all services

Recommended Timeline

In order to meet the October deadline, it is recommended:

Month	New	Update clients with an anniversary months of:	
March 2015	All New episodes will use New Diagnosis Screen	March	October
April 2015		April	November
May 2015		May	December
June 2015		June	January
July 2015		July	February
August 2015		August	Additional time for any clean up
September 2015		September	Additional time for any clean up or just relax

- We are still waiting for the list of included diagnoses.
- DSM Crosswalk is a guide, **but are waiting for the exact list from the state.**

There will be a video available online at

<http://www.vimeo.com/avatarhelpdesk>

After March, the old diagnosis form
will no longer be available.

A report is available to see old
diagnoses

Here are a few features
of the new diagnosis form
