San Francisco continues to experience a rapid and significant surge in COVID-19 cases with current projections to overload our hospitals and healthcare systems. In accordance with the State’s recent limited stay at home order, San Francisco will comply and take action to stop the increase in cases. Accordingly, the Health Officer is suspending and restricting certain indoor and outdoor businesses and activities. Businesses must implement the rollbacks in business capacities and other activities required under the amendments to the Order by 10 p.m. on December 06, 2020. If the surge in cases continues, the Health Officer may further restrict or suspend other activities currently allowed under Health Officer Order C19-07.

Important Note: The Health Officer ordered suspensions or restrictions on capacity limits of the activities as shown in the table below. Suspended or restricted businesses may still engage in Minimum Basic Operations as defined in Health Officer Order C19-07. These suspensions or restrictions amend any related orders, directives, or guidance. All impacted people and entities are required to adhere to these new limits and must otherwise continue to monitor and comply with all applicable Health Orders and Directives.

Tips for Retail Businesses Offering In-Store Shopping or Services During COVID-19

Updated December 04, 2020

AUDIENCE: Businesses that offer in-store retail, services, and outdoor equipment rental during the COVID-19 pandemic.

BACKGROUND: This document was revised December 4, 2020, to include changes made to Health Order No.C19-07, in areas such as additional mandatory signage requirements, ventilation guideline, flu vaccines and how to keep personnel and customers safer.

Changes to this tip sheet since the previous Version:

- To remain open, businesses must implement a Mandatory Metering System which ensures that space capacity limits are not exceeded, prevents congregating or crowding.
- Mandatory Ventilation Checklist Signage Requirement: Beginning on Nov. 29, businesses that operate indoors and serve members of the public indoors must post a Ventilation Checklist at public entrances showing whether they have implemented any of the DPH ventilation measures.
- New ventilation requirements and recommendations are included.
- New recommendations are included on how to keep personnel and customers safer during the holiday season.
- New signs are available.

How does COVID-19 Spread? (Updated)

Our current understanding is that COVID-19 is mostly spread from person-to-person in the air through virus-containing droplets in the breath of someone with COVID-19. These respiratory droplets enter the air when a person breathes. Even more droplets can get in the air when infected people talk, sing, cough, or sneeze. People with COVID-19 may have no symptoms and can still be breathing out virus-containing droplets that can infect others. Transmission can occur through:

- Larger droplets. These larger droplets are sometimes called “ballistic droplets” because they travel in straight lines and are pulled down by gravity. People nearby, usually within six feet, are infected when they breathe in these droplets or if the droplets land in their eyes, nose, or mouth.
- Smaller droplets or infectious particles. These can float in the air for a period of time and/or travel beyond six feet on indoor air currents, especially in enclosed spaces with poor ventilation. People sharing the same space are infected when they breathe in these smaller droplets and particles or the droplets or particles land on their eyes, nose, or mouth – even if they are further than six feet away. These droplets are sometimes referred to as “aerosols” or “bioaerosols”.

COVID-19 can also spread if a person touches their eyes, nose or mouth after touching a contaminated surface (also known as a fomite); however, this is less common.
Prevention (Updated)

- Avoid Close Contact. To the greatest extent, maintain at least six feet of social distancing between yourself and the people who don’t live in your Household. Remember that outdoors is MUCH safer than indoors.
- Wear a Face Covering. Cover your mouth and nose with a Face Covering in public settings and when around people who don’t live in your Household.
- Routinely clean and disinfect frequently touched surfaces. Wash your hands often with soap and water. If soap and water are not available, use a hand sanitizer that contains at least 60% ethanol or 70% isopropanol.
- Monitor Your Health Daily. Be alert of symptoms such as fever, cough, shortness of breath, or other symptoms. If you are experiencing any of these symptoms, stay home.

Prepare: Before Your Business Re-Opens (Updated)

Create a Health and Safety Plan and a Social Distancing Protocol

- Fill out the Health and Safety Plan template for Directive 2020-17. If other Directives apply to your business, you may need to complete more than one Health and Safety Plan.
- Complete a Social Distancing Protocol template can be found at Appendix A of the Shelter in Place Health Order.

These documents must be available for all personnel and posted at the entrance to the business site. They serve as reminders of all the best practices that your business needs to follow including universal requirements such as requiring face coverings, signage, enforcing six-foot distances between people, and more specific things such as establishing policies for safe handling of merchandise.

Post Signage about the Increased Risk of COVID-19 Indoors (Updated)

Businesses that are permitted to operate indoors must post signs about increased risk of COVID-19 indoors. Post SFDPH-Approved Signage, stating:

- That COVID-19 is transmitted through the air, and the risk is generally higher indoors.
- That seniors and those with health risks should avoid indoor settings with crowds.

Signage on reporting violations of COVID-19 Health Orders. Beginning on Nov. 10, businesses are also required to post signs in employee break rooms. The signs must inform employees of the right to report violations of COVID-19 health orders and directives by calling 311 or visiting sf311.org. Signage needs to state that employee’s identity will remain anonymous. Sample signage is available online at https://sf.gov/outreach-toolkit-coronavirus-covid-19.

Ensure that Indoor Spaces are Well-Ventilated (Updated)

Review the San Francisco Department of Public Health (SFDPH) Ventilation Guidance and keep an annotated copy available. Ventilation guidance from recognized authorities such as the Centers for Disease Control, ASHRAE, or the State of California may be used instead.
Post signage at public entrances indicating which of the following systems are used:

- All available windows and doors accessible to fresh outdoor air are kept open
- Fully operational HVAC systems
- Appropriately sized portable air cleaners in each room
- None of the above

Good ventilation controls droplets and infectious particles to prevent COVID-19 transmission by:

- removing air containing droplets and particles from the room;
- diluting the concentration of droplets and particles by adding fresh, uncontaminated air;
- filtering room air, removing droplets and particles from the air.

**Doors and Windows** required to be kept closed for **fire/life safety purposes** are exempt. For example, fire doors must remain closed. Make sure open windows do not create falling hazards especially for children. Sign templates can be found at: [https://sf.gov/outreach-toolkit-coronavirus-covid-19](https://sf.gov/outreach-toolkit-coronavirus-covid-19).

For more information and additional resources, please see: [www.sfcdcp.org/COVID-ventilation](http://www.sfcdcp.org/COVID-ventilation).

**Create a Safer Space for Personnel and Customers (with Updates for the Holiday Season)**

You may need to change the physical layout of your business to help social distancing for customers and personnel. Modifications to consider include designating separate entrances and exits, making aisles one-way, improving queue management system, increasing spacing between racks or shelves, marking spaces with tape or other decals to indicate six-foot distances, and establishing transparent shields.

<table>
<thead>
<tr>
<th>Make Necessary Ventilation Improvements, if Feasible, Including</th>
</tr>
</thead>
<tbody>
<tr>
<td>□ HVAC systems (if one is present)</td>
</tr>
<tr>
<td>□ Ensure HVAC systems are serviced and functioning properly.</td>
</tr>
<tr>
<td>□ Evaluate possibilities for upgrading air filters to the highest efficiency possible.</td>
</tr>
<tr>
<td>□ Increase the percentage of outdoor air through the HVAC system, readjusting or overriding recirculation (“economizer”) dampers.</td>
</tr>
<tr>
<td>□ Disable demand-control ventilation controls that reduce air supply based on temperature or occupancy.</td>
</tr>
<tr>
<td>□ Evaluate running the building ventilation system even when the building is unoccupied to maximize ventilation. At the minimum, reset timer-operated ventilation systems so that they start operating 1-2 hours before the building opens and 2-3 hours after the building is closed.</td>
</tr>
<tr>
<td>□ Increase natural ventilation by opening windows and doors when environmental conditions allow and if permitted by fire and building safety requirements. Fire doors should not be wedged or propped open.</td>
</tr>
<tr>
<td>□ Consider installing portable air cleaners (“HEPA filters”).</td>
</tr>
<tr>
<td>□ If the establishment uses pedestal fans or hard mounted fans, adjust the direction of fans to minimize air blowing from one individual’s space to another’s space.</td>
</tr>
</tbody>
</table>
around high patron contact areas such as checkout counters.

During the holiday season when potential crowding might occur, you may need to consider implementing additional safety measures, such as assigning staff to monitor store capacity, posting signs on explaining capacity restrictions, providing signage to promote flu vaccines, and setting up virtual shopping appointments for curbside pick-up when feasible.

- Require all customers and Personnel wear masks as specified in the Face Covering Order.
- Ensure sanitizing measures be implemented.
  - Provide customers with easy access to hand sanitizer.
  - Regularly disinfect high touch areas, including countertops, payment systems, pens, doorknobs, carts/baskets, point of sales area, exit/entrance, and so forth.
- Consider setting special hours for Older Adults and those with Health Risks to shop and avoid exposure to crowds.
- Mandatory Metering System to ensure maximum Capacity Levels specified in the Business Capacities and Activities Table are not exceeded.
  - Develop and implement a written procedure to track the number of persons entering and exiting the facility to ensure at or below allowable capacity.
  - Consider designating personnel to monitor store capacity.
  - Consider increasing the number of on-premises staff to prevent crowding situations during holiday season.
- Ensure social distancing protocols and safety measures be maintained.
  - Create designated circles or lines with marking on the ground to indicate six-foot distancing for customers.
  - Create directional paths of travels if applicable, such as one-way entrance and exit for customers, signs for bathrooms.
  - Consider using single line queue, instead of multiple line queues, to reduce customers’ wait time and enable easy management of queues.
  - Consider setting up a queue management system to only allow limited number of shoppers at a time so that a six-foot distancing can be maintained among patrons and Personnel at all times, for small square footage or mom-and-pop stores where hiring a designated staff is not necessary or feasible.
  - Maintain Plexiglas or other barriers between customers and cashier. If not possible, please ensure at least six feet of distance.
- Increase off-site access and sales.
  - Consider outdoor or online sales, such as curbside pick-up for customers. (Please refer to the Curbside Retail Guideline for details.)
  - The Shared Spaces program allows businesses to use the sidewalk or parking lane for retail operations.
  - Take appropriate measures against over-crowding and blocking passage by pedestrians including people with disabilities if a store operates outdoors.
- Promote flu vaccination.
  - Post signage to encourage flu vaccine among personnel and participants.
Flu vaccines are critical in the fight against COVID-19 by (1) keeping workers and communities healthy and (2) reducing strain on our healthcare and testing systems that are responding to COVID-19. Find out more information at https://sfcdcp.org/flu.

**Educate and Train Personnel**

Consider implementing a **Worksite Safety Monitor** who ensures that space capacity limits are not exceeded, prevents congregating or crowding, and generally ensures that patrons comply with all aspects of the Health Safety Plan, such as wearing masks, and maintaining social distance. Businesses must designate a Worksite Safety Monitor who will ensure that Personnel properly clean and disinfect, screen customers for symptoms, and monitor the number of customers in the store or in line. Consider training the Worksite Safety Monitor and other Personnel on de-escalation with customers who do not comply with policies. Personnel may worry about their own risks, so provide resources to address anxiety, stress, and mental health.

Provide information on employer or government-sponsored sick leave and other benefits the employee may be entitled to receive that would make it financially easier to stay at home (see Paid sick leave in San Francisco). Remember that employees cannot be fired due to COVID-19 results or needed time off for recovery.

**Check Your Space after the Long Period of Low Usage**

Check for pest infestation or harborage, and make sure all pest control measures are functioning. Perform routine maintenance on ventilation systems including air ducts and vents. If your business was closed for a long period of time, flush out the stagnant water from the plumbing lines by running water through fixtures. Detailed guidance may be found at: https://www.sfwater.org/flushingguidance.

**Getting Back to Business**

Follow the Best Practices in Exhibit A of Directive 2020-17. To help compliance, you may need to ask customers to change the way they interact with your business and your products. Changes may include:

- Strongly encourage customers to refrain from touching merchandise unnecessarily and to use hand sanitizer before touching merchandise or upon entry to your business.
- Establish procedures for safe handling and cleaning of returned merchandise.
- Prohibit self-sampling of items such as cosmetics and perfume.
- Consider closing fitting rooms to customers if you can’t implement best practices such as cleaning clothing before returning to sale and frequent cleaning of fitting rooms.
- If customers bring their own bags from home:
  - Ensure that bags are not placed directly on conveyor belts, outside of shopping carts, or any other surface where customers are served.
  - Ensure that reusable bags make no contact with employees.
  - Ensure that customers bag their own merchandise.
  - Ensure that customers do not bag merchandise in the checkout area if they cannot maintain physical distancing.
  - Increase the frequency of disinfection in bagging areas and customer service areas.
Restrooms for Customers

Consider closing the restroom if you are not able to comply with the sanitation requirements of the Social Distancing and Health Protocol. Businesses are encouraged to monitor use of restrooms by either requiring a key to access or stationing a restroom attendant nearby.

Retail Stores in an Enclosed Indoor Shopping Center

Retail stores in an enclosed Indoor Shopping Center that do not have direct access to adjacent sidewalk, street, parking lot, or alley area, may open for in-store retail at this time, to the capacity listed in the Business Capacities and Activities table, with approval of a plan submitted to the Health Officer.

Gloves

Routine glove use is not recommended. The CDC explains, in general, gloves are appropriate when cleaning or caring for someone who is sick (see link: When to wear gloves). In most other situations, wearing gloves is unnecessary and may still lead to the spread of germs. The best way to protect yourself is to regularly wash your hands with soap and water for 20 seconds or use hand sanitizer with at least 60% alcohol.

Monitor and Adjust

At least on a weekly basis, think about how your business and personnel are doing, how well you are complying with your Social Distancing and Health Plan, and what changes are needed to improve your response to the COVID-19 pandemic. Look for new guidance from the SFDPH Communicable Disease Control and Prevention or the frequently updated page on sf.gov with comprehensive resources for businesses during the COVID-19 pandemic.
