ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

ORDER OF THE HEALTH OFFICER
OF THE CITY AND COUNTY OF SAN FRANCISCO

ENCOURAGING COVID-19 VACCINE COVERAGE
AND REDUCING DISEASE RISKS
(Safer Return Together)

DATE OF ORDER: June 11, 2021, updated July 8, 2021, July 20, 2021, August 2, 2021,
August 12, 2021, August 24, 2021, September 10, 2021, October 13, 2021,
December 14, 2021, December 29, 2021, January 10, 2022, and January 26, 2022

NOTE (REVISED JAN. 26, 2022) On December 22, 2021, the State of California issued
companion revisions to three of its COVID-19 orders (originally issued in August and
September 2021), requiring healthcare workers in certain healthcare-related settings and
workers in some other higher-risk settings to receive a booster vaccine dose by February 1,
2022, or if they are not eligible for a booster by then within 15 days after becoming eligible,
and to test once or twice weekly, depending on the setting, in the interim. The State revised
those orders on January 25, 2022 to extend the deadline for boosters in higher-risk settings to
March 1, 2022. The update to this Order includes changes to conform San Francisco’s local
rules for High-Risk Settings, as defined in this Order, to the updated State guidance, as well as
to extend the booster requirement for personnel in other designated High-Risk Settings not
covered by the State orders and that are currently covered by San Francisco’s Up-to-Date on
Vaccination requirements. Additionally, the update to this Order makes other important
changes. Beginning February 1, 2022: 1) certain exemptions to the indoor universal mask
requirement that allow removal of masks are reinstated with modified health precautions for
stable groups of individuals that include people who are Up-to-Date on Vaccination in
designated indoor settings, as provided in Appendix A, 2) operators of indoor Mega-Events
must for patrons (age 16 or older) check for either (a) proof of both full vaccination (two
weeks after completion of the initial course of vaccination) and, for those eligible (age 16 and
older, based on when initial doses were received), receipt of a booster (with the booster having
been received at least one week before attendance) to be considered Up-to-Date on
Vaccination, or (b) proof of a negative COVID-19 test before entry into the facility, with
similar rules going into effect March 1, 2022, for patrons age 12 to 15 and other requirements
for children under age 12; and 3) Businesses that operate gyms, other fitness centers, bars,
restaurants, and certain other facilities will be allowed to accept religious and medical
exemptions to vaccination for patrons and staff/personnel, subject to certain health
protections, including proof of a negative COVID-19 test before entry (but people are not
required to be tested more than twice each week so long as each test is done at least three days
apart) and wearing a Well-Fitting Mask except when an exception applies under Appendix A.
Please read this Order carefully. Violation of or failure to comply with this Order is a misdemeanor punishable by fine, imprisonment, or both. (California Health and Safety Code § 120295, et seq.; California Penal Code §§ 69, 148(a)(1); and San Francisco Administrative Code § 7.17(b).)

Summary: As of January 26, 2022, this Order replaces the prior update of this health order, Health Officer Order No. C19-07y (issued January 10, 2022), in its entirety.

The Health Officer is updating the Order in light of the spread in San Francisco and the Bay Area region of the Omicron variant of SARS-CoV-2, the virus that causes COVID-19, and the ongoing threat that it poses to the health of vulnerable residents and also potentially to the capacity of San Francisco’s healthcare system. Current evidence indicates that the Omicron variant is much more transmissible than Delta and other variants of the virus, and that individuals who have had only their initial vaccine series are susceptible to the Omicron variant. Medical data to date also show that individuals who have received a booster shot increase their immunity to a level that confers significantly more protection from all circulating SARS-CoV-2 variants, including the Omicron variant, and generally prevents severe disease. The United States Centers for Disease Control and Prevention and the California Department of Public Health now recommend that everyone who has been vaccinated receive a booster shot as soon as they are eligible because immunity wanes several months after completion of the initial vaccine series. And the CDC and CDPH recommend that people receive the Pfizer-BioNTech or Moderna booster if they can.

Vaccination remains a critical component in preventing COVID-19 and its associated health harms. Individuals who have not received their initial vaccine series or a booster shot are more likely to become infected and spread infection to others, and more likely to become seriously ill and die. It is critical that community members receive their initial vaccine series and booster shots when eligible to maintain the protective effect of the high community-wide vaccination rates in San Francisco.

Even though a high percentage of people are vaccinated in San Francisco and the Bay Area region against the virus that causes COVID-19 and an increasing percentage are boosted, there remains a risk that people may come into contact with others who have COVID-19 when outside their residence. Many COVID-19 infections are caused by people who have no symptoms of illness. Also, there are people in San Francisco who are not yet fully vaccinated or who are not yet eligible to receive a booster, including children under five years old, and people who are immuno-compromised and may be particularly vulnerable to infection and disease. Everyone who is eligible, including people at risk for severe illness with COVID-19—such as unvaccinated older adults and unvaccinated individuals with health risks—and members of their households, are strongly urged to get vaccinated and receive their booster as soon as they can if they have not already done so.

Further, to address the continuing number of cases and hospitalizations due to the Omicron variant as well as the risk of future variants, and consistent with CDPH orders
requiring vaccination and boosters for most healthcare workers, the Health Officer has
determined that all people working in designated high-risk settings be both vaccinated
and boosted as soon as they are eligible. People working in these high-risk settings (1)
can expose highly vulnerable people who are at increased risk of severe illness and death
to COVID-19, (2) must therefore be protected from COVID-19 to the maximum extent
possible to ensure adequate staffing in these critical settings, and (3) particularly for jails,
shelters, and skilled nursing facilities, can cause large outbreaks if workers are infected.

Accordingly, this Order imposes a requirement, layered on top of the recently revised
CDPH health orders, for (1) personnel working in designated high-risk settings—
meaning general acute care hospitals, skilled nursing facilities, intermediate care
facilities, residential care facilities for the elderly, homeless shelters, and jails, all as
further defined below—as well as (2) personnel working in other higher-risk settings—
including adult care facilities, adult day programs, dental offices, home health care
workers, and pharmacists, and (3) personnel who visit higher-risk settings as part of the
work, such as paramedics, emergency medical technicians, police officers, and lawyers
who visit people in the jails—to both receive the full initial course of vaccination and,
once they are eligible, to receive a booster. Businesses and government agencies with
personnel in these high-risk settings have until March 1, 2022 to comply with the new
booster verification requirement, meaning those who are eligible to receive a booster on
or before February 14, 2022 must have received their booster by March 1, 2022. And
those who are eligible for a booster after February 14, 2022 must receive it within 15
days after they become eligible. Personnel working in high-risk settings who are eligible
for a booster and have not yet received one must be tested once or twice a week for
COVID-19, depending on the setting, and provide proof of a negative test, until one week
after they receive a booster. For Personnel who are not permanently stationed or
regularly assigned to High-Risk Settings but who in the course of their duties may enter
or work in High-Risk Settings even on an intermittent or occasional basis or for short
periods of time, the deadline for receipt of a Booster is also March 1, 2022. Because of
the threat Omicron poses to hospital capacity, eligible personnel in high-risk settings are
strongly urged to receive their booster as soon as possible before the deadline and
operators of high-risk settings are strongly urged to help them do so.

And for the time being, in coordination with other Bay Area jurisdictions, consistent with
CDC recommendations regarding indoor masking to help prevent transmission, and in
compliance with State health requirements, this Order maintains a “universal” face
covering requirement for individuals in indoor public settings, with limited exemptions,
some of which that had been temporarily suspended in December 2021 are reinstated,
with revisions, effective February 1, 2022. Particularly in light of the Omicron variant,
the Health Officer recommends that whenever possible everyone wear a non-vented
respirator, such as an N95, KN95, or KF94 respirator. A well-fitting surgical/procedural
mask with a cloth mask worn over it to increase fit is also recommended. Given higher
transmissibility of the Omicron variant, cloth masks alone are no longer recommended.
Also, the Order describes the health and vaccination benchmarks by which the County, in
coordination with other Bay Area jurisdictions, will lift the indoor universal face
covering requirement, subject to State health rules. It also maintains face covering requirements in other settings such as public transit, health care facilities, homeless shelters, jails, and schools, consistent with federal and state rules.

This Order includes changes related to indoor gatherings of different types. For indoor Mega-Events, beginning on February 1, 2022, patrons must show proof they either are vaccinated as required by the Order or have a negative COVID-19 test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. Consistent with California Department of Public Health rules, self-administered antigen tests are not acceptable for pre-admission testing unless there is third-party verification. Also beginning February 1, 2022, Businesses that operate gyms, other fitness centers, bars, restaurants, and certain other facilities will be allowed to accept religious and medical exemptions to vaccination for patrons and staff/personnel, subject to certain health protections, including providing proof of a negative COVID-19 test before entry (but people are not required to be tested more than twice each week so long as each test is done at least three days apart) and wearing a Well-Fitting Mask except when an exception applies under Appendix A. And starting February 1, 2022, the Order reinstates and revises the rule regarding Well-Fitting Masks allowing them to be removed by people who are Up-to-Date on Vaccination in certain indoor settings when the Business ascertains the vaccination status of everyone present, the group is a stable group, people who are Fully Vaccinated but not Up-to-Date on Vaccination wear their Well-Fitting Masks, and people who are not Fully Vaccinated wear their Well-Fitting Masks and have a negative COVID-19 test, subject to certain other rules and exceptions. This Order also includes a number of recommendations—but not requirements—for individuals, businesses, and government entities to reduce COVID-19 risk, including the strong recommendation everyone be Up-to-Date on Vaccination, including Boosters.

And this Order maintains other minimum COVID-19 safety requirements on businesses and government entities, such as a general requirement to report positive cases in the workplace and in schools, and a more limited requirement for signage for patrons and for staff that applies to certain indoor businesses.

UNDER THE AUTHORITY OF CALIFORNIA HEALTH AND SAFETY CODE SECTIONS 101040, 101085, AND 120175, THE HEALTH OFFICER OF THE CITY AND COUNTY OF SAN FRANCISCO ORDERS:

1. **Definitions.**

   For purposes of this Order, the following initially capitalized terms have the meanings given below.

   a. **Booster.** A “Booster” means an additional dose of a vaccine authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization (WHO), for which a person is Booster-Eligible. Consistent with CDC and CDPH guidance, either the Pfizer-BioNTech (Comirnaty) or Moderna COVID-19 vaccine is preferred for the Booster.
b. **Booster-Eligible.** A person is “Booster-Eligible” once they meet criteria to receive a Booster under CDC guidance. For example, as of the date of issuance of this update to the Order, individuals who are 18 or older may receive a booster of the Pfizer-BioNTech (Comirnaty), Moderna, or Johnson & Johnson’s Janssen COVID-19 vaccine at least five months after receiving a second dose of the Pfizer-BioNTech (Comirnaty) or Moderna COVID-19 vaccine or two months after receiving the single dose Johnson & Johnson’s Janssen COVID-19 vaccine, and adolescents who are 12 to 17 years old may receive a booster of the Pfizer-BioNTech vaccine at least five months after their second dose of that vaccine. Consistent with CDC guidance (available online at [www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html](http://www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html)), anyone who received a WHO-authorized vaccine or a combination of vaccines should receive the Pfizer-BioNTech (Comirnaty) vaccine as their booster pursuant to the timing listing in that guidance. Those preferences apply to all initial vaccination series, regardless of which vaccine an individual received. The CDC has been frequently updating booster eligibility. More up-to-date information on booster eligibility may be found online at [www.sfcdcp.org/boosters](http://www.sfcdcp.org/boosters), and individuals, Businesses, and government entities are urged to stay informed about changes.

c. **Business.** A “Business” includes any for-profit, non-profit, or educational entity, whether a corporate entity, organization, partnership or sole proprietorship, and regardless of the nature of the service, the function it performs, or its corporate or entity structure.

d. **Cal/OSHA.** “Cal/OSHA” means the California Department of Industrial Relations, Division of Occupational Safety and Health, better known as Cal/OSHA.

e. **CDC.** “CDC” means the United States Centers for Disease Control and Prevention.

f. **CDPH.** “CDPH” means the California Department of Public Health.

g. **Close Contact.** “Close Contact” means being within six feet of a Person With COVID-19 for a total of 15 minutes or more in a 24-hour period while the person is contagious. In turn, a “Person With COVID-19” means a person who tests positive for the virus that causes COVID-19 (SARS-CoV-2) or has been clinically diagnosed with COVID-19 by a healthcare provider. A person is no longer considered a Person With COVID-19 once all of the following occur: (a) at least one day (i.e., 24 hours) has passed since their last fever (without use of fever-reducing medications), and (b) there has been improvement of other symptoms, and (c) at least five days have passed since symptoms first appeared. A person who tested positive for COVID-19 but never had symptoms is no longer considered a Person With COVID-19 five days after the date of their first positive test. The person is considered contagious if they either (i) had symptoms, from 48 hours before their symptoms began until at least five days after the start of symptoms, or (ii) did not have symptoms but learned they were COVID-19 positive from a test, from 48 hours before their COVID-19 test was collected until five days after they were tested.
h. *County.* The “County” means the City and County of San Francisco.

i. *COVID-19.* “COVID-19” means coronavirus disease 2019, the disease caused by the SARS-CoV-2 virus and that resulted in a global pandemic.

j. *DPH.* “DPH” means the San Francisco Department of Public Health.

k. *DPH Core Guidance.* “DPH Core Guidance” means the webpage and related materials titled *Core Guidance for COVID-19* that DPH regularly updates and includes health and safety recommendations for individuals and Businesses as well as web links to additional resources, available online at [www.sfdph.org/dph/covid-19/core-guidance.asp](http://www.sfdph.org/dph/covid-19/core-guidance.asp).

l. *Face Covering Requirements.* “Face Covering Requirements” means the requirement to wear a Well-Fitted Mask (i) as required by federal or state law including, but not limited to, California Department of Public Health guidance and Cal/OSHA’s rules and regulations; (ii) in indoor common areas of homeless shelters, emergency shelters, and cooling centers, except while sleeping, showering, engaged in personal hygiene that requires removal of face coverings, or actively eating or drinking; (iii) in indoor common areas of jails except while sleeping, showering, engaged in personal hygiene that requires removal of face coverings, or actively eating or drinking; and (iv) as required by Section 3(b), below and Appendix A, attached to the Order. If a separate state, local, or federal order or directive imposes different face covering requirements, including requirements to wear respirators or surgical masks in certain settings, the more health protective requirement applies.

m. *FDA.* “FDA” means the United States Food and Drug Administration.

n. *Fully Vaccinated/Full Vaccination.* “Fully Vaccinated” and “Full Vaccination” mean two weeks after completing the entire recommended initial series of vaccination (usually one or two doses) with a vaccine authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization (WHO). For example, as of the date of issuance of this Order, an individual would be fully vaccinated at least two weeks after receiving a second dose of the Pfizer-BioNTech (Comirnaty) or Moderna COVID-19 vaccine or two weeks after receiving the single dose Johnson & Johnson’s Janssen COVID-19 vaccine. A list of FDA-authorized vaccines is available at [www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/covid-19-vaccines](http://www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/covid-19-vaccines). A list of WHO-authorized vaccines is available at [https://extranet.who.int/pqweb/vaccines/covid-19-vaccines](https://extranet.who.int/pqweb/vaccines/covid-19-vaccines). On August 23, 2021, the FDA granted full approval for the Pfizer-BioNTech (Comirnaty) vaccine for people age 16 and older. And, on October 29, 2021, the FDA granted emergency use authorization for the Pfizer-BioNTech vaccine for children age five to 11.

Unless otherwise specified, the following are acceptable as proof of Full Vaccination, as well as proof of being Up-to-Date on Vaccination: (i) the CDC vaccination card,
which includes name of person vaccinated, type of vaccine provided, and date last
dose administered, or similar documentation issued by another foreign governmental
jurisdiction, (ii) a photo of a vaccination card as a separate document, (iii) a photo of
the a vaccination card stored on a phone or electronic device, (iv) documentation of
vaccination from a healthcare provider, (v) written self-attestation of vaccination
signed (including an electronic signature) under penalty of perjury and containing the
name of the person vaccinated, type of vaccine taken, and date of last dose
administered, or (vi) a personal digital COVID-19 vaccine record issued by the State
of California and available by going to https://myvaccinerecord.cdph.ca.gov or
similar documentation issued by another State, local, or foreign governmental
jurisdiction, or by an approved private company (a list of approved companies
offering digital vaccine verification is available at
www.sfdph.org/dph/alerts/files/vaccine-verification-sites.pdf). If any state or federal
agency uses a more restrictive definition of what it means to be Fully Vaccinated or
to prove that status for specified purposes (such as Cal/OSHA rules for employers in
workplaces), then that more restrictive definition controls for those purposes. Also,
to the extent Cal/OSHA approves an alternate means of documenting whether an
employee is “fully vaccinated,” even if less restrictive than the definition contained
here, employers may use the Cal/OSHA standard to document their employees’
vaccination status.

o. Health Officer. “Health Officer” means the Health Officer of the City and County of
San Francisco.

p. High-Risk Settings. “High-Risk Settings” means certain care or living settings
involving many people, including many congregate settings, where vulnerable
populations reside out of necessity and where the risk of COVID-19 transmission is
high, consisting of general acute care hospitals, skilled nursing facilities (including
subacute facilities), intermediate care facilities, residential care facilities for the
elderly, homeless shelters, and jails (including, but not limited to, the Juvenile Justice
Center Juvenile Hall).

q. Household. “Household” means people living in a single Residence or shared living
unit. Households do not refer to individuals who live together in an institutional
group living situation such as in a dormitory, fraternity, sorority, monastery, convent,
or residential care facility.

r. Qualifying Medical Reason. “Qualifying Medical Reason” means a medical
condition or disability recognized by the FDA or CDC as a contra-indication to
COVID-19 vaccination.

s. Mega-Event. “Mega-Event” means an event with either more than 500 people
attending indoors or more than 5,000 people attending outdoors. As provided in the
State’s Post-Blueprint Guidance, a Mega-Event may have either assigned or
unassigned seating, and may be either general admission or gated, ticketed and
permitted events.
t. **Personnel.** “Personnel” means the following people who provide goods or services associated with a Business in the County: employees; contractors and sub-contractors (such as those who sell goods or perform services onsite or who deliver goods for the Business); independent contractors; vendors who are permitted to sell goods onsite; volunteers; and other individuals who regularly provide services onsite at the request of the Business. “Personnel” includes “gig workers” who perform work via the Business’s app or other online interface, if any.

u. **Religious Beliefs.** “Religious Beliefs” means a sincerely held religious belief, practice, or observance protected by state or federal law.

v. **Residence.** “Residence” means the location a person lives, even if temporarily, and includes single-family homes, apartment units, condominium units, hotels, motels, shared rental units, and similar facilities. Residences also include living structures and outdoor spaces associated with those living structures, such as patios, porches, backyards, and front yards that are only accessible to a single family or Household.

w. **Schools.** “Schools” mean public and private schools operating in the County, including independent, parochial, and charter schools.

x. **State’s Post-Blueprint Guidance.** The “State’s Post-Blueprint Guidance” means the guidance entitled “Beyond the Blueprint for Industry and Business Sectors” that the California Department of Public Health issued on May 21, 2021 and updated as of December 31, 2021, including as the State may further extend, update or supplement that guidance in the future. (See [www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Beyond-Blueprint-Framework.aspx](http://www.cdph.ca.gov/Programs/CID/DCDC/ Pages/COVID-19/Beyond-Blueprint-Framework.aspx).

y. **Test and Tested.** “Tested” means to have a negative test (a “Test”) for the virus that causes COVID-19 within the applicable timeframe as listed in this Order. Both nucleic acid (including polymerase chain reaction (PCR)) and antigen tests are acceptable. The following are acceptable as proof of a negative COVID-19 test result: a printed document (from the test provider or laboratory) or an email, text message, webpage, or application (app) screen displayed on a phone or mobile device from the test provider or laboratory. The information should include person’s name, type of test performed, negative test result, and date the test was administered. If any state or federal agency uses a more restrictive definition of what it means to be Tested for specified purposes (such as Cal/OSHA rules for employers in workplaces), then that more restrictive definition controls for those purposes.

z. **Up-to-Date on Vaccination.** “Up-to-Date on Vaccination” means (i) two weeks after completing the full initial course of vaccination with a vaccine authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization (WHO) (also defined as being Fully Vaccinated) and (ii) one week after receiving a Booster once a person is Booster-Eligible. Until a person is Booster-Eligible, they are considered Up-to-Date on Vaccination two weeks after completing their full initial series of vaccination.

bb. Well-Fitted Mask. A “Well-Fitted Mask” means a face covering that is well-fitted to an individual and covers the nose and mouth especially while talking, consistent with the Face Covering Requirements. CDC guidance regarding Well-Fitted Masks may be found at [www.cdc.gov/coronavirus/2019-ncov/your-health/effective-masks.html](http://www.cdc.gov/coronavirus/2019-ncov/your-health/effective-masks.html). A well-fitting non-vented N95, KN95, or KF94 respirator is strongly recommended as a Well-Fitted Mask, even if not fit-tested, to provide maximum protection. A well-fitting surgical/procedural mask with a cloth mask worn over it to increase fit is also recommended. Given higher transmissibility of the Omicron variant, cloth masks alone are no longer recommended. A Well-Fitted Mask does not include a scarf, ski mask, balaclava, bandana, turtleneck, collar, or single layer of fabric or any mask that has an unfiltered one-way exhaust valve.

2. Purpose and Intent.

   a. Purpose. The public health threat of serious illness or death from COVID-19 is much lower in the County and the Bay Area than many parts of the State and country due to the high rate of vaccination of the community. But COVID-19 continues to pose a risk especially to individuals who are not eligible to be vaccinated or are not yet Up-to-Date on Vaccination, and certain safety measures continue to be necessary to protect against COVID-19 cases and deaths. Being Up-to-Date on Vaccination, including receiving a Booster as soon as Booster-Eligible, is the most effective method to prevent transmission and ultimately COVID-19 hospitalizations and deaths. It is important to ensure that as many eligible people as possible are vaccinated against COVID-19. Further, it is critical to ensure there is continued reporting of cases to protect individuals and the larger community. Accordingly, this Order allows Businesses, schools, and other activities to resume fully while at the same time putting in place certain requirements designed to (1) extend vaccine coverage to the greatest extent possible; (2) limit transmission risk of COVID-19; (3) contain any COVID-19 outbreaks; and (4) generally align with guidance issued by the CDC and the State relating to COVID-19 except in limited instances where local conditions require more restrictive measures. This Order is based on evidence of continued community transmission of SARS-CoV-2 within the County as well as scientific evidence and best practices to prevent transmission of COVID-19. The Health Officer will continue to monitor data regarding the evolving scientific understanding of the risks posed by COVID-19, including the impact of vaccination, and may amend or rescind this Order based on analysis of that data and knowledge.

   b. Intent. The primary intent of this Order is to continue to protect the community from COVID-19 and to also increase vaccination rates to reduce transmission of COVID-
ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

19 long-term, so that the whole community is safer and the COVID-19 health emergency can come to an end.

c. **Interpretation.** All provisions of this Order must be interpreted to effectuate the purposes and intent of this Order as described above. The summary at the beginning of this Order as well as the headings and subheadings of sections contained in this Order are for convenience only and may not be used to interpret this Order. In the event of any inconsistency between the summary, headings, or subheadings and the text of this Order, the text will control. Certain initially capitalized terms used in this Order have the meanings given them in Section 1 above. The interpretation of this Order in relation to the health orders or guidance of the State is described in Section 10 below.

d. **Application.** This Order applies to all individuals, Businesses, and other entities in the County. For clarity, the requirements of this Order apply to all individuals who do not currently reside in the County when they are in the County. Governmental entities must follow the requirements of this Order that apply to Businesses, unless otherwise specifically provided in this Order or directed by the Health Officer.

e. **DPH Core Guidance.** All individuals and Businesses are strongly urged to follow the DPH Core Guidance (available online at www.sfdph.org/dph/COVID-19/Core-Guidance.asp) containing health and safety recommendations for COVID-19.

f. **Effect of Failure to Comply.** Failure to comply with any of the provisions of this Order constitutes an imminent threat and menace to public health, constitutes a public nuisance, and is punishable by fine, imprisonment, or both, as further provided in Section 12 below.

3. **General Requirements for Individuals.**

   a. **Vaccination.** Individuals are strongly urged to be Up-to-Date on Vaccination, meaning, as further provided in Section 1, that they complete their full initial course of vaccination (also referred to as being Fully Vaccinated) and, as soon as they are Booster-Eligible, receive their Booster. In particular, people at risk for severe illness with COVID-19—such as unvaccinated older adults and unvaccinated individuals with health risks—and members of their Household, are urged to be Up-to-Date on Vaccination, including receiving a Booster, as soon as they can. Information about who is at increased risk of severe illness and people who need to take extra precautions can be found at www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-with-medical-conditions.html. For those who are not yet Up-to-Date on Vaccination, making informed choices about the risk of different activities, wearing a Well-Fitted Mask indoors, or choosing outdoor activities as much as possible with physical distancing from other Households whose vaccination status is unknown, are the best ways to prevent the risk of COVID-19 transmission. Individuals who are Up-to-Date on Vaccination are subject to fewer restrictions as provided in this Order, and there are allowances for certain large gatherings where all
the participants are Up-to-Date on Vaccination or have been Tested and received a negative Test result.

b. **Face Coverings.** Everyone, including people who are Up-to-Date on Vaccination, must wear a Well-Fitted Mask in indoor public settings as described in Appendix A to this Order. That Appendix lists exceptions when a Well-Fitted Mask is not required and, subject to State rules, sets benchmarks for when that requirement will be lifted for people who are Fully Vaccinated. All persons must also follow the Face Covering Requirements. And people should consistently wear the best mask they can obtain, considering fit and filtration (and without using a one-way exhalation valve that is not filtered), when they are indoors with other people, especially with people whose vaccination status is unknown. As provided in the definition of a Well-Fitted Mask, a well-fitting non-vented N95, KN95, or KF94 respirator is strongly recommended. A well-fitting surgical/procedural mask with a cloth mask worn over it to increase fit is also recommended. Given higher transmissibility of the Omicron variant, cloth masks alone are no longer recommended. More information about fit and filtration and the best mask options is available online at [www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Get-the-Most-out-of-Masking.aspx](http://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Get-the-Most-out-of-Masking.aspx). People should respect an individual’s decision to wear face coverings even in settings where they are not required, such as crowded outdoor settings, and no Business or other person should take an adverse action against individuals who chose to wear a face covering to protect their health.

i. **Other Federal and State Requirements.** Under current federal law, when riding or waiting to ride on public transit people who are inside the vehicle or other mode of transportation or are indoors at a public transit stop or station, must wear Well-Fitted Masks. This requirement extends to all modes of transportation other than private vehicles, such as airplanes, trains, subways, buses, taxis, ride-shares, maritime transportation, street cars, cable cars, and school buses. But any passenger who is outdoors or in open-air areas of the mode of transportation, such as open-air areas of ferries, buses, and cable-cars, is not required by federal law to wear a face covering. Personnel and passengers on public transit are urged to be Up-to-Date on Vaccination, and those who are not Up-to-Date on Vaccination are strongly urged to wear a Well-Fitted Mask or respirator when not otherwise required by the Face Covering Requirements. Under Cal/OSHA’s rules and regulations, employers may also be required to ensure employees continue to wear Well-Fitted Masks or respirators, particularly in indoor settings. Businesses and other entities must adhere to Cal/OSHA laws and regulations relating to COVID-19 health and safety measures in the workplace. Nothing in this Order is intended to reduce any of those requirements or otherwise modify them in a way that is less protective of public health, or to limit an individual’s own choices to take more health protective measures.
ii. **Additional Face Covering Recommendations.**

1. **Outdoor Crowded Gatherings.** People who are outdoors in close proximity to other people who are not part of their Household are strongly encouraged to wear a Well-Fitted Mask.

2. **Indoor Private Gatherings.** It is safest when everyone participating in indoor private gatherings in Residences with members from different Households is Up-to-Date on Vaccination (including having a Booster as soon as Booster-Eligible). An additional layer of protection is for people to Test negative before the gathering. And if not everyone at the gathering is Up-to-Date on Vaccination, or if their vaccination status is not known, everyone attending is strongly encouraged to wear a Well-Fitted Mask at all times during the gathering while they are indoors. For clarity, people must wear a Well-Fitted Mask in common areas of a Residence that are used as a shared rental with multiple Households unless everyone is Up-to-Date on Vaccination.

3. **Providing a Well-Fitted Mask.** Businesses and other entities subject to this Order are strongly encouraged to provide a Well-Fitted Mask at no cost to people who do not have one upon entry inside the facility.

c. **Monitor for Symptoms.** Individuals should monitor themselves for symptoms of COVID-19. A list of COVID-19 symptoms is available online at www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html. Anyone with any symptom that is new or not explained by another condition must comply with subsections 3(d) and 3(e) below regarding isolation and quarantine.

d. **Isolation.** Anyone who has or likely has COVID-19, meaning that person (i) has a positive COVID-19 test result, (ii) is diagnosed with COVID-19, or (iii) has a COVID-19 symptom that is new or not explained by another condition, must refer to the latest COVID-19 isolation health directive issued by the Health Officer (available online at www.sfdph.org/directives) and follow the requirements detailed there. There are special requirements for healthcare workers and emergency medical services personnel in healthcare settings.

e. **Quarantine.** Anyone who had Close Contact must refer to the latest COVID-19 quarantine health directive issued by the Health Officer (available online at www.sfdph.org/directives) and follow the requirements detailed there. There are special requirements for healthcare workers and emergency medical services personnel in healthcare settings.

f. **Moving to, Traveling to, or Returning to the County.** Everyone is strongly encouraged to comply with (1) any State travel advisories (available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Travel-Advisory.aspx)

g. **Minimum Requirements.** Based on their risk preferences, individuals may decide for themselves to take greater safety precautions than required or even recommended under this Order. Also, nothing in this section limits any requirements that apply under this Order to indoor public settings, indoor Mega-Events, or that Cal/OSHA or other State authority may impose on any indoor setting involving gatherings.

4. **General Requirements for Businesses and Governmental Entities.**

a. **Vaccination.** Businesses and governmental entities are generally encouraged to require Personnel and patrons to be Up-to-Date on Vaccination, meaning they have completed the full initial course of vaccination (also referred to as being Fully Vaccinated) and have received a Booster when they are Booster-Eligible.

i. **Full Vaccination Requirement for Listed Indoor Businesses.** The following Businesses must require patrons and staff (as distinguished from the broader term “Personnel”) to provide proof of completion of the full initial course of vaccination (Full Vaccination), are strongly urged to implement measures as soon as possible to require those patrons and staff to be Up-to-Date on Vaccination, including requiring them to show proof of receipt of a Booster once they are Booster-Eligible, and must comply with the other requirements detailed in Appendix B to this Order:

- Operators or hosts of establishments or events where food or drink is served indoors—including, but not limited to, dining establishments, bars, clubs, theaters, and entertainment venues.

- Gyms, recreation facilities, yoga studios, dance studios, and other fitness establishments, where any patrons engage in cardiovascular, aerobic, strength training, or other exercise involving elevated breathing.

Beginning on February 1, 2022, operators of such Businesses are allowed, but not required by this Order, to accept exemptions from the vaccination requirements subject to certain health precautions, as follows. Patrons and staff may be exempt from the vaccination requirements under this section only upon stating either of the following: (1) the individual is declining vaccination based on Religious Beliefs or (2) the individual is excused from receiving any COVID-19 vaccine due to Qualifying Medical Reasons.

For patrons, no paperwork regarding the declination is required. For staff, written documentation of some kind must be used. A sample ascertainment and declination form that can be used for this purpose is available online at www.sfdph.org/dph/covid-19/files/declination.pdf. As to declinations based on Qualifying Medical Reasons or Religious Beliefs, a Business may seek
additional information as allowed or required by applicable law to determine whether Personnel have a Qualifying Medical Reasons or qualifying Religious Belief.

Patrons and staff who qualify for and are granted by the Business an exemption due to Religious Beliefs or Qualifying Medical Reasons must follow both of these minimum health and safety requirements: a) show proof of having had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility (but people are not required to be Tested more than twice each week so long as each Test is done at least three days apart) and b) wear a Well-Fitted Mask at all times except as allowed under any of the specific exceptions under Appendix A of this Order. For proof of a Test, self-administered antigen testing is not acceptable at this time unless there is third-party verification—the Business must require proof of a negative Test as outlined by CDPH’s guidance in the section titled “What can be used as proof of a negative pre-entry test in settings where pre-entry testing is required?”, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Updated-COVID-19-Testing-Guidance.aspx#pre-entry-testing.

Nothing in this Order is intended to limit any Business’s ability under applicable law to determine whether they are able to offer a reasonable accommodation to staff with an approved exemption. Because testing and masking is not as effective as being Up-to-Date on Vaccination at preventing the spread of COVID-19, a Business may determine that the minimum requirements in this subsection are not sufficient for its operations to protect the health and safety of patrons, staff, or others.

ii. Mega-Events. Operators and hosts of indoor Mega-Events are subject to the proof of vaccination or negative Test requirements set forth in Section 7 below.

And operators and hosts of outdoor Mega-Events are encouraged to consider requiring patrons and staff to provide proof that they are Up-to-Date on Vaccination (including proof of a Booster if Booster-Eligible) before entering the facility or outdoor area where the event is held.

b. Encourage Activities that Can Occur Outdoors. All Businesses and governmental entities are encouraged to consider moving operations or activities outdoors, if it makes sense to do so under the circumstances and to the extent allowed by local law and permitting requirements, because there is generally less risk of COVID-19 transmission outdoors as opposed to indoors.

c. Personnel Health Screening. Businesses and governmental entities must develop and implement a process for screening Personnel for COVID-19 symptoms, but this
requirement does not mean they must perform on-site screening of Personnel. Businesses and governmental entities should ask Personnel to evaluate their own symptoms before reporting to work. If Personnel have symptoms consistent with COVID-19, they should follow subsections 3(d) and 3(e) above.

d. Businesses Must Allow Personnel to Stay Home When Sick. Businesses are required to follow Cal/OSHA rules and regulations allowing Personnel to stay home where they have symptoms associated with COVID-19 that are new or not explained by another condition or if they have been diagnosed with COVID-19 (by a test or a clinician) even if they have no symptoms, and to not to have those Personnel return to work until they have satisfied certain conditions, all as further set forth in the Cal/OSHA rules. Also, Businesses must comply with California Senate Bill 95 (Labor Code, sections 248.2 and 248.3), which provides that employers with more than 25 employees must give every employee 80 hours of COVID-related sick leave retroactive to January 1, 2021 and through September 30, 2021 (pro-rated for less than full time employees), including that employees may use this paid sick leave to get vaccinated or for post-vaccination illness. Each Business is prohibited from taking any adverse action against any Personnel for staying home in any of the circumstances described in this subsection.

e. Signage. In addition to any signage otherwise required in this Order or any directives issued by the Health Officer for specific Business or other sectors, the following general signage requirements apply.

i. Signage for Patrons. All Businesses and governmental entities are required to conspicuously post signage reminding individuals of COVID-19 prevention best practices to reduce transmission: Get vaccinated and boosted; Stay home if sick, and talk to your doctor; Masks are required indoors; Maximize fresh air; and Clean your hands. Sample signage is available online at https://sf.gov/outreach-toolkit-coronavirus-covid-19.

ii. Signage for Employees. All Businesses and governmental entities are required to post signs in employee break rooms or areas encouraging employees to get vaccinated and boosted and informing them how to obtain additional information. Sample signage is available online at https://sf.gov/outreach-toolkit-coronavirus-covid-19.

f. Ventilation Guidelines. All Businesses and governmental entities with indoor operations are urged to review the Ventilation Guidelines and implement ventilation strategies for indoor operations as feasible. Nothing in this subsection limits any ventilation requirements that apply to particular settings under federal, state, or local law.

g. Mandatory Reporting by Businesses and Governmental Entities. Consistent with Cal/OSHA rules and regulations, Businesses and governmental entities must require that all Personnel immediately alert the Business or governmental entity if they test
positive for COVID-19 and were present in the workplace either (1) within 48 hours before onset of symptoms or within 10 days after onset of symptoms if they were symptomatic; or (2) within 48 hours before the date on which they were tested or within 10 days after the date on which they were tested if they were asymptomatic. If a Business or governmental entity is concerned about a workplace outbreak among Personnel, it may get additional information www.sfcdc.org/covid19-positive-workplace. Businesses and governmental entities must also comply with all case investigation and contact tracing measures directed by DPH including providing any information requested within the timeframe provided by DPH, instructing Personnel to follow isolation and quarantine protocols specified by CDPH and Cal/OSHA and any additional protocols specified by DPH, and excluding positive cases and unvaccinated close contacts from the workplace during these isolation and quarantine periods.

Schools and Programs for Children and Youth are subject to separate reporting requirements set forth in Health Officer Directive Nos. 2020-33 and 2020-14, updated as of January 4, 2022, respectively, including as those directives are further updated in the future.

h. Compliance with CDPH Vaccination Status Order’s Mask Requirements. Businesses and governmental entities with Personnel in Acute Health Care Settings, Long-Term Care Settings, High-Risk Congregate Settings, and Other Health Care Settings—as those terms are defined in the CDPH Vaccination Status Order, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Unvaccinated-Workers-In-High-Risk-Settings.aspx—must provide appropriate face coverings as required by the CDPH Vaccination Status Order.

i. Minimum Requirements. Nothing in this Order is intended to reduce any other federal, state, or local legal requirements or otherwise modify them in a way that is less protective of public health, or to limit an individual Business’ choices to take more health protective measures.

5. Schools and Programs for Children and Youth

a. Schools. Based on the demonstrated effectiveness of measures that reduce the risk of transmission in school settings, including the requirement for universal masking indoors, the use of rapid testing, and vaccinations for children age five and older, the Health Officer strongly believes that schools can and should remain open for in-person classes for all grades. Largely because some children are not eligible to be vaccinated against COVID-19 at this time and many children are not yet Fully Vaccinated or eligible for a Booster, schools must follow the health and safety requirements set forth in Health Officer Directive No. 2020-33, including as it may be amended in the future, to ensure the safety of all students and Personnel at the school site. All children who are Booster-Eligible (including under an emergency use authorization) are strongly urged to receive a Booster as soon as possible. Also, adult
Personnel in TK-12 schools, including educators, aides, administrators, and other staff, are strongly encouraged to be Up-to-Date on Vaccination.

b. **Programs for Children and Youth.** Largely because some children are not eligible to be vaccinated against COVID-19 at this time and many children are not yet Fully Vaccinated or eligible for a Booster, the following Programs for Children and Youth must operate in compliance with the health and safety requirements set forth in Health Officer Directive No. 2020-14, including as it may be amended in the future: (1) group care facilities for children who are not yet in elementary school—including, for example, licensed childcare centers, daycares, family daycares, and preschools (including cooperative preschools); and (2) with the exception of schools, which are addressed in subsection (a) above, educational or recreational institutions or programs that provide care or supervision for school-aged children and youth—including for example, learning hubs, other programs that support and supplement distance learning in schools, school-aged childcare programs, youth sports programs, summer camps, and afterschool programs.

c. **Mega-Events.** Operators or hosts of indoor events held at schools or under Programs for Children and Youth that meet the definition of an indoor Mega-Event must comply with the rules for indoor Mega-Events specified in Section 7 of this Order. Operators or hosts of such outdoor events are urged to follow the rules for outdoor Mega-Events.

6. **Vaccination Requirements for Personnel in High-Risk Settings and Other Health Care Personnel.**

a. **High-Risk Settings.** Except for some Personnel as provided in subsections (a)(iii), (b), and (c) below, and for Personnel exempt under subsection (d) below, all of the following requirements apply in High-Risk Settings:

   i. Businesses and governmental entities with Personnel in High-Risk Settings must:

      1. As of September 30, 2021, ascertain vaccination status of all Personnel in High-Risk Settings who routinely work onsite;

      2. As of September 30, 2021, ensure that before entering or working in any High-Risk Setting, all Personnel who routinely work onsite have received their first dose of a one-dose COVID-19 vaccine regimen or their second dose of a two-dose COVID-19 vaccine regimen authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization. Until such Personnel are Fully Vaccinated, they are subject to at least the minimum public health and safety requirements in subsection (a)(iv) below; and
ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

3. No later than March 1, 2022, ensure that all such Personnel who routinely work onsite, within 15 days of being Booster-Eligible, receive a Booster. And for the period between when such Personnel are Booster-Eligible but have not yet received one and when they become Up-to-Date on Vaccination (meaning one week after receipt of a Booster), the operator of the High-Risk Setting must ensure that each such person comply with the public health and safety requirements in subsection (a)(iv) below regarding testing even though they have already received their full initial course of vaccination. For clarity, those who are Booster-Eligible on or before February 14, 2022 must have received their Booster by March 1, 2022, and those who are Booster-Eligible after February 14, 2022 must receive it within 15 days after they become eligible.

ii. As of September 30, 2021, Personnel who routinely work onsite in High-Risk Settings must have received their first dose of a one-dose COVID-19 vaccine regimen or their second dose of a two-dose COVID-19 vaccine regimen authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization. Until such Personnel have completed their full initial course of vaccination (that is, are Fully Vaccinated), they are subject to at least the minimum public health and safety requirements in subsection (a)(iv) below. Beginning on March 1, 2022, Personnel who routinely work onsite in High-Risk Settings must, within 15 days of being Booster-Eligible, receive a Booster. For clarity, those who are Booster-Eligible on or before February 14, 2022 must have received their Booster by March 1, 2022, and those who are Booster-Eligible after February 14, 2022 must receive it within 15 days after they become eligible.

iii. For purposes of this Order, Personnel who are not permanently stationed or regularly assigned to a High-Risk Setting but who in the course of their duties may enter or work in High-Risk Settings even on an intermittent or occasional basis or for short periods of time are considered to routinely work onsite in High-Risk Settings. Businesses and governmental entities with such Personnel are required to (1) ascertain vaccination status of all such Personnel and (2) ensure that before entering or working in any High-Risk Setting, all such Personnel are Fully Vaccinated with any vaccine authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization, unless exempt under subsection (d) below. Additionally, as of September 29, 2021, all such Personnel must have received their first dose of a one-dose COVID-19 vaccine regimen or their second dose of a two-dose COVID-19 vaccine regimen authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization. Until such Personnel are Fully Vaccinated, they are subject to at least the minimum public health and safety requirements in subsection (a)(iv) below. And no later than March 1, 2022, Personnel who are not permanently stationed or regularly assigned to a High-
Order of the Health Officer

Risk Setting but who in the course of their duties may enter or work in High-Risk Settings even on an intermittent or occasional basis or for short periods of time—including for example, but not limited to, paramedics, emergency medical technicians, police officers and other law enforcement, and attorneys who enter jail settings or other High-Risk Settings as part of their work—must, within 15 days of being Booster-Eligible, receive a Booster. For clarity, those who are Booster-Eligible on or before February 14, 2022 must have received their Booster by March 1, 2022, and those who are Booster-Eligible after February 14, 2022 must receive it within 15 days after they become eligible.

iv. All Businesses and governmental entities subject to this Section 6 must require any Personnel who are exempt or who are otherwise not Up-to-Date on Vaccination (for clarity, the reference to these Personnel means any person who is Booster-Eligible for but not yet received a Booster or who has received a Booster for the seven days after receipt of the Booster before becoming Up-to-Date on Vaccination) to comply with at least the following public health and safety measures:

1. get Tested for COVID-19 at least once a week—and at least twice a week for Personnel who are in general acute care hospitals, skilled nursing facilities, intermediate care facilities, and jails—using either a nucleic acid (including polymerase chain reaction (PCR)) or antigen test; and

2. at all times at the worksite in the High-Risk Setting wear a face covering in compliance with the State Public Health Officer Order of July 26, 2021 ("CDPH Vaccination Status Order"), available at https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Unvaccinated-Workers-In-High-Risk-Settings.aspx.

Because of the COVID-19 risks to any exempt Personnel who are not Up-to-Date on Vaccination, the High-Risk Setting must provide such Personnel, on request, with a well-fitting non-vented N95 respirator and strongly encourage such Personnel to wear that respirator at all times when working with patients, residents, clients, or incarcerated people.

Regular testing and masking as required under this Section 6 are not as protective of public health as being Up-to-Date on Vaccination in helping prevent transmission of COVID-19; accordingly, those measures are a minimum safety requirement for exempt Personnel in High-Risk Settings. Businesses and governmental entities subject to this Section 6 may require additional safety measures for such Personnel. For example, factors a Business or governmental entity may consider in determining appropriate safety measures for exempt Personnel include, but are not limited to:
a) Whether the Personnel will place other people at risk of transmission of COVID-19 because they are required to come into contact (including on an emergency basis) with other Personnel or with persons whose vaccination status is unknown, who are not yet eligible for the vaccine, or who are members of a vulnerable population (e.g., the elderly, incarcerated people, and acute care patients);

b) The type and frequency of testing available to the Personnel and whether the Business or governmental entity has the ability to provide testing to Personnel, without relying on public health resources, and track the requisite testing;

c) Whether the Business or governmental entity can ensure compliance with the mask mandate whenever the Personnel are around other people in the workplace; and

d) Whether the proposed accommodation imposes an undue burden because it is costly, infringes on other Personnel’s job rights or benefits, compromises workplace safety, decreases workplace efficiency, or requires other Personnel to do more than their share of potentially hazardous or burdensome work.

Nothing under the Order limits the ability of a Business or governmental entity under applicable law to determine whether they are unable to offer a reasonable accommodation to unvaccinated Personnel with an approved exemption and to exclude such exempt Personnel from a High-Risk Setting.

v. All Businesses and governmental entities subject to this Section 6 must, consistent with applicable privacy laws and regulations, maintain records of employee vaccination or exemption status.

vi. All Businesses and governmental entities subject to this Section 6 must provide these records to the Health Officer or other public health authorities promptly upon request, and in any event no later than the next business day after receiving the request.

vii. This mandated vaccination schedule allows Businesses, governmental entities, and affected Personnel adequate time to comply with this Order. In the interest of protecting residents of High-Risk Settings, Personnel, and their families, Businesses, governmental entities, and affected Personnel are strongly urged to meet these vaccination requirements as soon as possible.

For clarity, this requirement applies to Personnel in other buildings in a site containing a High-Risk Setting, such as a campus or other similar grouping of related buildings, where such Personnel do any of the following: (i) access the acute care or
patient, resident, client, or incarcerated person areas of the High-Risk Setting; or (ii) work in-person with patients, residents, clients, or incarcerated people who visit those areas. All people in San Francisco who work in a clinical setting with a population that is more vulnerable to COVID-19 are strongly urged to be Up-to-Date on Vaccination, including receiving a Booster as soon as Booster-Eligible.

If a person covered by the requirements of this Section 6 to be Up-to-Date on Vaccination recently had COVID-19 when that person would otherwise have been Booster-Eligible based on the period since becoming Fully Vaccinated, then that person should try to obtain the Booster as soon as possible at least 10 days after recovering and ending isolation. But to continue working in the High-Risk Setting that person does not need to receive the Booster until 30 days after recovering from infection and discontinuing isolation, unless a healthcare provider recommends in a note that the Booster be delayed for a longer specified period.

b. CDPH Requirements For Adult Care Facilities, Direct Care Workers, Other Health Care Workers, and Pharmacists. Businesses and governmental entities with Personnel in certain types of facilities and contexts, including those that provide health care, certain other care services, services in congregate settings, and the Personnel who work in those settings must comply with the following CDPH Orders and All Facilities Letters, including as they are updated in the future, which require Personnel of such Businesses and governmental entities to be Up-to-Date on Vaccination, including receipt of a Booster when Booster-Eligible, unless exempt under those Orders and All Facilities Letters by the deadlines listed in each order or letter:

“Adult Care Facilities and Direct Care Worker Vaccine Requirement”, updated January 25, 2022, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Adult-Care-Facilities-and-Direct-Care-Worker-Vaccine-Requirement.aspx

“Health Care Worker Vaccine Requirement”, updated January 25, 2022, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Health-Care-Worker-Vaccine-Requirement.aspx

ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

c. Dental Offices. Personnel who provide healthcare in dental offices are considered to provide care in “Clinics & Doctor Offices (including behavioral health, surgical)” under the following CDPH order and must comply with the requirements in that order: “Health Care Worker Vaccine Requirement”, updated January 25, 2022, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Health-Care-Worker-Vaccine-Requirement.aspx.

d. Limited Exemptions. Personnel covered by this Section 6 may be exempt from the vaccination requirements under this section only upon providing the requesting Business or governmental entity a declination form stating either of the following: (1) the individual is declining vaccination based on Religious Beliefs or (2) the individual is excused from receiving any COVID-19 vaccine due to Qualifying Medical Reasons. A sample ascertainment and declination form is available online at www.sfdph.org/dph/covid-19/files/declination.pdf. As to declinations for Qualifying Medical Reasons, to be eligible for this exemption Personnel must also provide to their employer or the Business a written statement signed by a physician, nurse practitioner, or other licensed medical professional practicing under the license of a physician stating that the individual qualifies for the exemption (but the statement should not describe the underlying medical condition or disability) and indicating the probable duration of the individual’s inability to receive the vaccine (or if the duration is unknown or permanent, so indicate). As to declinations based on Religious Beliefs, a Business or governmental entity may seek additional information as allowed or required by applicable law to determine whether Personnel have a qualifying Religious Belief. Personnel who qualify for and are granted by the employing Business or governmental entity an exemption due to Religious Beliefs or Qualifying Medical Reasons, as provided above, must still follow at least the minimum health and safety requirements in subsection (a)(iv), above. Nothing in this Order is intended to limit any Business’s or governmental entity’s ability under applicable law to determine whether they are able to offer a reasonable accommodation to Personnel with an approved exemption. Because testing and masking is not as effective as being Up-to-Date on Vaccination at preventing the spread of COVID-19, a Business may determine that the minimum requirements in subsection (a)(iv) above are not sufficient to protect the health and safety of people in High-Risk Settings.

e. Record Keeping Requirements. Businesses or governmental entities subject to this Section 6 must maintain records with following information:

i. For Fully Vaccinated Personnel, and also for Personnel where being Up-to-Date on Vaccination is required by this Order: (1) full name and date of birth; (2) vaccine manufacturer; and (3) date of vaccine administration (for first dose and, if applicable, all subsequent doses required by this Order). Nothing in
this subsection is intended to prevent an employer from requesting additional information or documentation to verify vaccination status, to the extent permissible under the law.

ii. For unvaccinated Personnel: signed declination forms with written health care provider’s statement where applicable, as described in subsection (d) above.

f. Compliance with CDPH Orders. In addition to the requirements set forth above:

i. Until any more health protective requirements in this section take effect, Businesses and governmental entities with Personnel in High-Risk Settings must comply with the requirements of the CDPH Vaccination Status Order; and

ii. Businesses and governmental entities with Personnel in adult care facilities and Other Health Care Settings—as that term is defined in the CDPH Vaccination Status Order—must be in full compliance with the requirements of the CDPH Vaccination Status Order.

iii. Businesses and governmental entities with Personnel who provide services or work in facilities covered by the State Public Health Officer Order of August 5, 2021, updated on December 22, 2021 and January 25, 2022 (titled “Health Care Worker Vaccine Requirement”), must comply with the requirements of that order, including as that order may be amended in the future. See www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Health-Care-Worker-Vaccine-Requirement.aspx.

g. Cooperation with Public Health Authorities. Businesses or governmental entities with Personnel subject to this Section 6 must cooperate with Health Officer or DPH requests for records, documents, or other information regarding the Business or governmental entity’s implementation of these vaccination requirements. This cooperation includes, but is not limited to, identifying all jobs or positions within the organization and describing: (1) whether a given job or position is subject to the vaccination requirements of this Section 6, (2) how the Business or governmental entity determined a job or position is subject to vaccination requirements of this Section 6, and (3) how the Business or governmental entity is ensuring full compliance with the vaccination requirements set forth in this Section 6. Complete responses to these requests must be provided to the Health Officer or DPH promptly upon request, and in any event within three business days after receiving the request.

h. Chart. For convenience of reference, a chart summarizing which settings and Personnel are subject to which state and local vaccination requirements is available at https://www.sfdph.org/dph/alerts/files/C19-07-State-and-Local-Mandates-Chart.pdf.
7. **Mega-Events.**

a. **Compliance with State’s Post-Blueprint Guidance.** All Businesses, governmental entities, and other organizations hosting Mega-Events, including when held at schools or under Programs for Children and Youth as provided in Section 5 above, must comply with the requirements in the State’s Post-Blueprint Guidance for indoor Mega-Events and are strongly urged to follow the recommendations in the State’s Post-Blueprint Guidance for outdoor Mega-Events.

b. **Vaccine Verification or Negative Test Requirements.**

   i. **Patron Vaccination or Testing.** Through January 31, 2022, operators or hosts of indoor Mega-Events must require all patrons age 12 and up to show proof, before entering the facility, that they have completed the full initial course of vaccination (are Fully Vaccinated), subject to any applicable requirements of federal, state, or local laws requiring accommodation. Starting on February 1, 2022, operators or hosts of indoor Mega-Events must require all patrons to show proof, before entering the facility, of either a) being Up-to-Date on Vaccination, including for patrons age 12 and up receipt of a Booster as soon as they are Booster-Eligible, or b) having had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. For patrons aged 12 to 15, operators or hosts of indoor Mega-Events are urged to enforce the mandate to show proof of a Booster as part of being Up-to-Date on Vaccination as soon as possible and are required to do so beginning March 1, 2022 unless the patron aged 12 to 15 shows proof of having had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. Patrons age five to 11 (or their parents or guardians) must show for each such child either proof of Full Vaccination or a negative COVID-19 test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. Patrons age two to four (or their parents or guardians) must show for each such child proof of a negative COVID-19 test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. Operators or hosts of indoor Mega-Events may not accept a written self-attestation as proof of Full Vaccination or of being Up-to-Date on Vaccination. For proof of a Test, self-administered antigen testing is not acceptable at this time unless there is third-party verification—the Business must require proof of a negative Test as outlined by CDPH’s guidance in the section titled “What can be used as proof of a negative pre-entry test in settings where pre-entry testing is required?”, available online at [www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Updated-COVID-19-Testing-Guidance.aspx#pre-entry-testing](http://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Updated-COVID-19-Testing-Guidance.aspx#pre-entry-testing). And consistent with State rules, operators or hosts of indoor Mega-Events are required to cross check proof of Full Vaccination or proof of negative COVID-19 test, as provided below, for
ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

each patron age 18 and up against a photo identification, unless photo identification is integrated into the digital COVID-19 vaccine record. Under no circumstance—including in response to a claim by a patron of an exemption of any kind—is the operator or host of an indoor Mega-Event allowed to admit a patron (except children under age two) who has not shown, as listed in this subsection, proof of either being Full Vaccinated or of a negative Test.

ii. **Staff Vaccination or Testing.** Through January 31, 2022, operators or hosts of indoor Mega-Events must require all staff to show proof, before entering the facility, that they have completed the full initial course of vaccination (are Fully Vaccinated), subject to any applicable requirements of federal, state, or local laws requiring accommodation. And starting on February 1, 2022, operators or hosts of indoor Mega-Events must require all staff to show proof, before entering the facility, of being Up-to-Date on Vaccination, including receipt of a Booster within eight days of their being Booster-Eligible. That means staff will meet the full requirements for being Up-to-Date on Vaccination no later than 15 days after being Booster-Eligible, and they can work at the Mega-Event so long as they get the Booster by the eighth day of being Booster-Eligible. These requirements for staff are subject to any applicable requirements for federal, state, or local laws requiring accommodation. As an alternative to meeting the Up-to-Date on Vaccination requirements, beginning on February 1, 2022, any staff who is allowed an exemption for a Religious Belief or Qualifying Medical Reason may enter the facility if they both a) show proof of having had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility (but staff is not required to be Tested more than twice each week so long as each Test is done at least three days apart) and b) wear a Well-Fitted Mask at all times except while actively performing or playing as required by Appendix A of this Order.

If a staff member covered by the requirements of this Section 7 to be Up-to-Date on Vaccination (in lieu of testing and masking for those who with a qualified exemption) recently had COVID-19 when that person would otherwise have been Booster-Eligible based on the period since becoming Fully Vaccinated, then that person should try to obtain the Booster as soon as possible at least 10 days after recovering and ending isolation. But to continue working in the indoor Mega-Event setting that person does not need to receive the Booster until 30 days after recovering from infection and discontinuing isolation, unless a healthcare provider recommends in a note that the Booster be delayed for a longer specified period.

For clarity, “staff” as used in this Section 7 does not include all individuals included in the broader term “Personnel.” Performers or players who are not employed by the Business, governmental entity, or other organization hosting
the event (e.g., members of visiting teams and independent performers not employed by the host) are not covered by the mandate to be Up-to-Date on Vaccination listed in this Section, but are strongly encouraged to be Up-to-Date on Vaccination before playing or performing in San Francisco. If they are not Fully Vaccinated (meaning two weeks after completion of the full initial course of vaccination, as further defined in Section 1), and, on and after February 1, 2022, if they are not Up-to-Date on Vaccination (meaning, as further provided in Section 1, they have not received their full initial course of vaccination at least two weeks before and have not had a Booster once Booster-Eligible within the 15-day period as provided above in this subsection (ii)), they are required to comply with all of the following safety measures:

- Remain at least six feet away from members of the public for the entire duration of the event;
- Provide the Business, governmental entity, or other organization hosting the event with proof of a negative COVID-19 Test (nucleic acid or antigen) taken within one day (for antigen tests) or two days (for PCR tests) prior to entry into the facility or venue;
- Wear a Well-Fitted Mask at all times except while actively performing or playing as required by Appendix A of this Order; and
- Not enter the indoor portion of any of the businesses covered in Appendix B of this Order except areas required for them to perform or play.

iii. Outdoor Mega-Events. Operators and hosts of outdoor Mega-Events are encouraged to consider requiring proof of Up-to-Date Vaccination as provided in Section 4 above.

c. Health and Safety Plan Requirement.

The host or organizer of an indoor Mega-Event with 1,000 or more attendees or outdoor Mega-Event with 10,000 or more attendees, or a series of such Mega-Events, must submit to the Health Officer a proposed plan detailing the procedures that will be implemented to minimize the risk of transmission among patrons and Personnel. Specifically, the proposed plan should include to following:

- Description of event details (date/time; expected capacity; location; and type of event).
- Contact name for the event (i.e., a person who can be reached in the event of an outbreak and/or who can be contacted to discuss the proposed plan).
- An explanation of how the host or organizer will have attendees meet requirements for providing their vaccination or testing status (required indoors,
ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

- An explanation of how the host or organizer will communicate/message:
  - Information to ensure that guests are aware of vaccination and testing requirements (indoors)/recommendations (outdoors); and
  - The safety measures being taken.

- If the event is being held indoors, an explanation of how the host or organizer will adhere to the Face Covering Requirements and Appendix A of this Order.

- A description of the strategies that will be implemented to avoid stagnant crowds (this can include traffic flow, advanced ticketing, touchless payment, etc.).

A template for plans for indoor Mega-Events is available at [www.sfdph.org/dph/alerts/files/C19-07-HSP-over-1000.pdf](http://www.sfdph.org/dph/alerts/files/C19-07-HSP-over-1000.pdf); Hosts or operators of Mega-Events may use the provided template or submit their own materials that comply with the requirements of this Order.

Plans must be submitted by email to HealthPlan@sfcityatty.org at least 10 business days before the planned event or, if earlier, ten business days before the date on which tickets will begin to be sold or offered to the public. The host or organizer does not need advance written approval of the Health Officer or the Health Officer’s designee to proceed with the Mega-Event consistent with the plan. But in the event the Health Officer identifies deficiencies in the plan, DPH will contact the host or organizer, and the host or organizer is required to work with DPH to address any and all deficiencies.

d. Recommendations for Outdoor Events. All Businesses, governmental entities, and other organizations hosting outdoor Mega-Events, including when held at schools or under Programs for Children and Youth as provided in Section 5 above, are encouraged to consider requiring all patrons age 12 and up to show proof, before entering the event, that they are Up-to-Date on Vaccination (including having received a Booster as soon as they are Booster-Eligible), subject to any applicable requirements of federal, state, or local laws requiring accommodation, and to follow the recommendations in the State’s Post-Blueprint Guidance for outdoor Mega-Events.

reports. The Health Officer will monitor this data, along with other data and scientific evidence, in determining whether to modify or rescind this Order, as further described in Section 2(a) above.

9. **Incorporation of State and Local Emergency Proclamations and Federal and State Health Orders.** The Health Officer is issuing this Order in accordance with, and incorporates by reference, the emergency proclamations and other federal, state, and local orders and other pandemic-related orders described below in this Section. But this Order also functions independent of those emergency proclamations and other actions, and if any State, federal, or local emergency declaration, or any State or federal order or other guidance, is repealed, this Order remains in full effect in accordance with its terms (subject to Section 13 below).

   a. **State and Local Emergency Proclamations.** This Order is issued in accordance with, and incorporates by reference, the March 4, 2020 Proclamation of a State of Emergency issued by the Governor, the February 25, 2020 Proclamation by the Mayor Declaring the Existence of a Local Emergency, and the March 6, 2020 Declaration of Local Health Emergency Regarding Novel Coronavirus 2019 (COVID-19) issued by the Health Officer, as each of them have been and may be modified, extended, or supplemented.

   b. **State Health Orders.** This Order is also issued in light of the various orders, directives, rules, and regulations of the State, including, but not limited to, those of the State’s Public Health Officer and Cal/OSHA. The State has expressly acknowledged that local health officers have authority to establish and implement public health measures within their respective jurisdictions that are more restrictive than those implemented by the State Public Health Officer.

   c. **Federal Orders.** This Order is further issued in light of federal emergency declarations and orders, including, but not limited to, the January 20, 2021 Executive Order on Protecting the Federal Workforce and Requiring Mask-Wearing, which requires all individuals in Federal buildings and on Federal land to wear masks, maintain physical distance, and adhere to other public health measures, and the February 2, 2021 Order of the CDC, which requires use of masks on public transportation, as each of them may have been and may be modified, extended or supplemented.

10. **Obligation to Follow Stricter Requirements of Orders.**

    Based on local health conditions, this Order includes a limited number of health and safety restrictions that are more stringent than those contained under State orders. Where a conflict exists between this Order and any state or federal public health order related to the COVID-19 pandemic, the most restrictive provision (i.e., the more protective of public health) controls. Consistent with California Health and Safety Code section 131080 and the Health Officer Practice Guide for Communicable Disease Control in California, except where the State Health Officer may issue an order expressly directed at this Order and based on a finding that a provision of this Order constitutes a menace to
11. **Obligation to Follow Health Officer Orders and Directives and Mandatory State Guidance.**

In addition to complying with all provisions of this Order, all individuals and entities, including all Businesses and governmental entities, must also follow any applicable orders and directives issued by the Health Officer (available online at [www.sfdph.org/healthorders](http://www.sfdph.org/healthorders) and [www.sfdph.org/directives](http://www.sfdph.org/directives)) and any applicable mandatory guidance issued by the State Health Officer or California Department of Public Health. To the extent that provisions in the orders or directives of the Health Officer and the mandatory guidance of the State conflict, the more restrictive provisions (i.e., the more protective of public health) apply. In the event of a conflict between provisions of any previously-issued Health Officer order or directive and this Order, this Order controls over the conflicting provisions of the other Health Officer order or directive.

12. **Enforcement.**

Under Government Code sections 26602 and 41601 and Health and Safety Code section 101029, the Health Officer requests that the Sheriff and the Chief of Police in the County ensure compliance with and enforce this Order. The violation of any provision of this Order (including, without limitation, any health directives) constitutes an imminent threat and immediate menace to public health, constitutes a public nuisance, and is punishable by fine, imprisonment, or both. DPH is authorized to respond to such public nuisances by issuing Notice(s) of Violation and ordering premises vacated and closed until the owner, tenant, or manager submits a written plan to eliminate all violations and DPH finds that plan satisfactory. Such Notice(s) of Violation and orders to vacate and close may be issued based on a written report made by any City employees writing the report within the scope of their duty. DPH must give notice of such orders to vacate and close to the Chief of Police or the Chief’s designee to be executed and enforced by officers in the same manner as provided by San Francisco Health Code section 597. As a condition of allowing a Business to reopen, DPH may impose additional restrictions and requirements on the Business as DPH deems appropriate to reduce transmission risks, beyond those required by this Order and other applicable health orders and directives.

13. **Effective Date.**

This Order is effective at 12:01 a.m. on June 15, 2021 and will continue, as updated, to be in effect until the Health Officer rescinds, supersedes, or amends it in writing. The changes made in the January 26, 2022 update are effective immediately subject to certain changes becoming operative on February 1, 2022 as provided in this Order.
14. **Relation to Other Orders of the San Francisco Health Officer.**

Upon issuance, this Order revises and entirely replaces the prior update to Health Officer Order No. C19-07y (issued January 10, 2022). Leading up to and in connection with the effective date of this Order, the Health Officer has rescinded a number of other orders and directives relating to COVID-19, including those listed in the Health Officer’s Omnibus Rescission of Health Officer Orders and Directives, dated June 11, 2021. On and after the effective date of this Order, the following orders and directives of the Health Officer shall continue in full force and effect: Order Nos. C19-16 (hospital patient data sharing), C19-18 (vaccine data reporting), C19-19 (minor consent to vaccination), and C19-20 (test collection sites); and the directives that this Order references in Sections 3 and 5, as the Health Officer may separately amend or later terminate any of them. Health Officer Order No. C19-15 was also reinstated on August 19, 2021, and remains in effect as outlined in that order (including as it is amended in the future). Also, this Order also does not alter the end date of any other Health Officer order or directive having its own end date or that continues indefinitely.

15. **Copies.**

The County must promptly provide copies of this Order as follows: (1) by posting on the DPH website [www.sfdph.org/healthorders](http://www.sfdph.org/healthorders); (2) by posting at City Hall, located at 1 Dr. Carlton B. Goodlett Pl., San Francisco, CA 94102; and (3) by providing to any member of the public requesting a copy.

16. **Severability.**

If a court holds any provision of this Order or its application to any person or circumstance to be invalid, then the remainder of the Order, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this Order are severable.

**IT IS SO ORDERED:**

Susan Philip, MD, MPH, Health Officer of the City and County of San Francisco

Dated: January 26, 2022

Attachments:
- Appendix A – Face Covering Requirements (last updated January 26, 2022)
- Appendix B – Proof of Vaccination Requirements (last updated January 26, 2022)
1. **General Requirement to Wear Well-Fitted Mask.**

   Everyone, including people who have received their initial course of vaccination (also referred to as being Fully Vaccinated) or are Up-to-Date on Vaccination (meaning they have completed their initial course of vaccination and are at least seven days after having received a Booster once eligible for a Booster, as further defined in Section 1 of the body of the Order), must for the time being wear a Well-Fitted Mask in indoor public settings at all times except as provided in Sections 4 and 5, below. In coordination with health officers from other Bay Area jurisdictions, the Health Officer will, by a further amendment to the Order, terminate the general requirements in this Appendix A when all three of the following health and vaccination benchmarks are met (subject to any required State rules):

   a. The case count in the County is at or below CDC level of yellow transmission for at least three continuous weeks (i.e., fewer than 50 cases per 100,000 of population for the past seven days and less than 8% rate for positive tests over the past seven days);

   b. The total number of patients hospitalized in the County due to COVID-19 is no more than 65 (i.e., patients hospitalized not due to COVID-19 do not count towards this number); and

   c. The earlier of the following occurs:

      i. 80% of the total population in the County (including children of all ages) have received their final dose of vaccine, subject to the Health Officer’s consideration of the equitable distribution of the vaccine among children ages 5 to 11 years living in communities in the County that are vulnerable and highly impacted by COVID-19; or

      ii. December 24, 2021, which is eight weeks after the FDA granted emergency use authorization of any COVID-19 vaccine for children ages 5 to 11 years.

   After these conditions are met and the requirements under this Appendix A terminate, the Well-Fitted Mask and other face covering requirements and recommendations in the body of the Order will continue, as well as all Face Covering Requirements under any other federal, state, or local law, order, rule or regulation.

2. **Ventilation.**

   Businesses and operators of other public and private facilities where people are allowed to remove their Well-Fitted Masks indoors (under any of the exceptions provided in Section 5, below) may only allow people to remove their Well-Fitted Masks if they use at least one of the following ventilation strategies: (1) all available windows and doors accessible to fresh outdoor air are kept open as long as air quality and weather conditions
permit; (2) fully operational HVAC system; or (3) appropriately sized portable air cleaners in each room. For clarity, if windows and doors are closed due to air quality or weather conditions, then a Business or operator of a public or private facility must follow at least one of remaining ventilation strategies before allowing people to remove their Well-Fitted Masks under this Order.

3. Proof of Vaccination.

Businesses and other entities are urged to require people to provide proof that they have completed their initial vaccination series (are Fully Vaccinated) before allowing people to remove their Well-Fitted Mask to the extent allowed in Section 5, below. For clarity, even if a Business or other entity does verify that people are Fully Vaccinated, people still must wear a Well-Fitted Mask unless otherwise exempted under this Order. And as provided in the Order, each Business that is required to confirm proof of completion of the full initial course of vaccination (Full Vaccination) is strongly urged to implement measures as soon as possible to require its patrons and staff (as distinct from Personnel) to be Up-to-Date on Vaccination, including requiring them to show proof of receipt of a Booster once they are eligible.

4. Status-Based Exemptions.

a. Medical or Safety Exemption. A person does not need to wear a Well-Fitted Mask when they can show: (1) a medical professional has provided a written exemption to the Face Covering Requirement, based on the person’s medical condition, other health concern, or disability; or (2) that they are hearing impaired, or communicating with a person who is hearing impaired, where the ability to see the mouth is essential for communication; or (3) wearing a Well-Fitted Mask while working would create a risk to the person related to their work as determined by local, state, or federal regulators or workplace safety guidelines. In accordance with CDPH and CDC guidelines, if a person is exempt from wearing a Well-Fitted Mask under this paragraph, they still must wear an alternative face covering, such as a face shield with a drape on the bottom edge, unless they can show either: (1) a medical professional has provided a written exemption to this alternative face covering requirement, based on the person’s medical condition, other health concern, or disability; or (2) wearing an alternative face covering while working would create a risk to the person related to their work as determined by local, state, or federal regulators or workplace safety guidelines.

A Well-Fitted Mask should also not be used by anyone who has trouble breathing or is unconscious, incapacitated, or otherwise unable to remove the Well-Fitted Mask without assistance.

b. Children. In accordance with CDPH and CDC guidelines, any child younger than two years old must not wear a Well-Fitted Mask because of the risk of suffocation. Children age two to nine years must wear Well-Fitted Masks to the greatest extent feasible. Children age two to nine years may wear an alternative face covering (as that term is
described in Section 4.a, above) if their parent or caregiver determines it will improve the child’s ability to comply with this Order. Children age two to nine and their accompanying parents or caregivers should not be refused any essential service based on a child’s inability to wear a Well-Fitted Mask (for example, if a four-year old child refuses to keep a Well-Fitted Mask on in a grocery store), but the parent or caregiver should when possible take reasonable steps to have the child wear a Well-Fitted Mask to protect others and minimize instances when children without Well-Fitted Masks are brought into settings with other people. Parents and caregivers of children age two to nine years must supervise the use of Well-Fitted Masks to ensure safety and avoid misuse. Children must wear face coverings in schools as required under State health rules.

c. Personal Protective Equipment. A person does not need to wear a Well-Fitted Mask when wearing personal protective equipment (“PPE”) that is more protective than a Well-Fitted Mask, including when required by (i) any workplace policy or (ii) any local, state, or federal law, regulation, or other mandatory guidance. When a person is not required to wear such PPE and in an indoor public setting, they must wear a Well-Fitted Mask or PPE that is more protective unless otherwise exempted under this Order.

5. Activity- and Location-Based Exemptions.

To the extent allowed by state or federal rules requiring face coverings for unvaccinated people, and subject to any additional health restrictions a particular Business or government agency may impose for a facility or other setting it owns, operates, or controls, wearing a Well-Fitted Mask is not required in any of the following situations:

a. Indoor Public Setting While Alone or with member of Household. A person does not need to wear a Well-Fitted Mask when they are alone or with a member of their Household in a public building or completely enclosed space such as an office, and people who are not part of their Household are not likely to be in the same space. If someone who is not part of a person’s Household enters the enclosed space, both people must wear a Well-Fitted Mask for the duration of the interaction. For clarity, people must wear Well-Fitted Masks whenever they are in semi-enclosed spaces such as cubicles and common areas for shared living settings, such as hotels, shared rentals with multiple Households, dormitories, fire stations, lobbies, and elevators. A Well-Fitted Mask must be worn if the person is in an indoor public space where others who are not part of their Household routinely are present.

b. Active Eating and Drinking. People may remove their Well-Fitted Mask while actively eating or drinking. People are urged to be seated at a table or positioned at a stationary counter or place while eating or drinking. For clarity, Well-Fitted Masks may be removed while actively eating or drinking in both indoor dining and indoor settings other than indoor dining where patrons may eat or drink, such as live performances and movies.
c. **Motor Vehicles.** A person does not need to wear a Well-Fitted Mask when in a personal motor vehicle and either alone or exclusively with other members of the same Household. But a Well-Fitted Mask is required when alone in the vehicle if the vehicle is used as a taxi or for any private car service or ride-sharing vehicle. Persons sharing a personal motor vehicle with people outside of the same Household are strongly encouraged to roll down the vehicle’s windows for ventilation.

Effective at 12:01 a.m. on February 1, 2022, certain Personnel may also remove their Well-Fitted Mask in motor vehicles they use for work or in personal motor vehicles they use to commute to and from work, if all of the following conditions are satisfied:

i. Everyone in the motor vehicle who removes their Well-Fitted Mask must be Up-to-Date on Vaccination. Anyone in the motor vehicle who is Fully Vaccinated but not Up-to-Date on Vaccination (meaning they are eligible for but have not received a Booster or received one in the preceding six days) must keep their Well-Fitted Mask on at all times.

ii. Everyone in the motor vehicle must be Up-to-Date on Vaccination or Fully Vaccinated unless they are unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination. If anyone is unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination, that person (except children under age two) may only be in the motor vehicle if they had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the motor vehicle and keep their Well-Fitted Mask on at all times (but people are not required to be Tested more than twice each week so long as each Test is done at least three days apart).

iii. Everyone in the motor vehicle must be employed by the same Business or other entity. For clarity, this exemption does not apply to carpools where the people in the vehicle are employed by two or more different Businesses or other entities.

iv. In the context of this rule, Well-Fitted Masks may be removed by anyone present based on other exceptions listed in this Appendix (such as removal while actively eating or drinking). But this rule does not apply in the context of TK-12 schools (which are subject to Health Officer Directive No. 2020-33, including as it is amended) or Programs for Children and Youth (which are subject to Health Officer Directive No. 2020-14, including as it is amended).

This Personnel motor vehicle exemption does not apply to use of any mode of public transit, taxis, limousines, or shared transportation networks.
d. **Showering, Personal Hygiene, or Sleeping.** People may remove their Well-Fitted Mask only while showering or actively engaging in personal hygiene that requires removal of the Well-Fitted Mask, including at a gym, fitness center, or other facility. People may remove their Well-Fitted Mask while sleeping in indoor public settings.

e. **Live or Recorded Performance and Professional Sports.** Performers at indoor live or recorded settings or events such as concerts, live music, film, television, recording studios, theater, opera, symphony, and professional sports may remove their Well-Fitted Masks while actively performing or practicing. If they remove their Well-Fitted Mask, performers must maintain at least six feet of distance from attendees and employees and are encouraged to maintain as much distance from other performers as possible. Performers are strongly urged to be Fully Vaccinated or regularly tested, and to wear their Well-Fitted Masks to the greatest extent possible. Attendees and Personnel must remain masked while attending or working at the performance except when another exemption applies.

f. **Religious Gatherings.** Service leaders of indoor public religious gatherings, including by way of example but not limitation, choirs, may remove their Well-Fitted Mask while actively performing religious services. If they remove their Well-Fitted Mask, service leaders must maintain at least six feet of distance from participants except when another exception applies and are encouraged to maintain as much distance from other service leaders as possible. Service leaders are strongly urged to be Fully Vaccinated or regularly tested, and to wear their Well-Fitted Masks to the greatest extent possible. Participants in indoor religious gatherings may remove their Well-Fitted Masks to participate in religious rituals.

Effective at 12:01 a.m. on February 1, 2022, service leaders, participants, and Personnel in indoor public religious gatherings may remove their Well-Fitted Masks (with no distancing requirement) if all of the following conditions are satisfied:

i. All people (including service leaders, participants, and Personnel) entering the facility who remove their Well-Fitted Mask must provide proof they are Up-to-Date on Vaccination. Anyone entering the facility who is Fully Vaccinated but not Up-to-Date on Vaccination (meaning they are eligible for but have not received a Booster or received one in the preceding six days) must keep their Well-Fitted Mask on at all times.

ii. Everyone in the facility must be Up-to-Date on Vaccination or Fully Vaccinated unless they are unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination. If anyone is unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination, that person (except children under age two) may only be in the facility if they had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility and keep their Well-Fitted Mask on at all times (but
people are not required to be Tested more than twice each week so long as each Test is done at least three days apart).

iii. The religious gathering consists of a stable group of people who participate on a regular basis. No guests or people who are not part of the congregation or do not regularly participate in the religious gathering are present. If any guest or individual who is not part of the congregation or does not regularly participate in the religious gathering is present, everyone must wear a Well-Fitted Mask unless otherwise exempted by this Order.

iv. The operator of the facility or host of the religious gathering controls access to ensure that all people entering the facility are Fully Vaccinated or Up-to-Date on Vaccination except as allowed in subsection f.ii. People who enter the facility on an intermittent or occasional basis for short periods of time (e.g., people who deliver goods or packages) do not need to provide proof of Full Vaccination or being Up-to-Date on Vaccination, but must wear a Well-Fitted Mask unless otherwise exempted under this Order and are strongly encouraged to avoid entering any area of the facility covered by this exemption where people in that area do not need to wear Well-Fitted Masks. For clarity, anyone who participates in the religious gathering at the facility is not considered to be there on an intermittent or occasional basis for a short period of time, regardless of how briefly they may participate or whether the gathering itself does not last long.

v. In the context of this rule, Well-Fitted Masks may be removed by anyone present based on other exceptions listed in this Appendix (such as removal while actively eating or drinking or while showering). But this rule does not apply in the context of TK-12 schools (which are subject to Health Officer Directive No. 2020-33, including as it is amended) or Programs for Children and Youth (which are subject to Health Officer Directive No. 2020-14, including as it is amended).

vi. The operator of the facility or host of the gathering must implement at least one of the ventilation strategies listed in Section 2 of this Appendix A.

vii. An operator of the facility or host of the gathering may provide for distinct gathering spaces where people may remove their Well-Fitted Masks. For example, if a religious gathering occupies two floors in a building, people on one floor could remove their Well-Fitted Masks because everyone present meets the requirements of subsections f.i through f.iv and the space otherwise satisfies all the conditions in this Section, but all the people on another floor must wear a Well-Fitted Mask because they do not
satisfy all the conditions of this Section (e.g., not Fully Vaccinated, not Up-to-Date on Vaccination, or are guests). But, people must wear a Well-Fitted Mask in common areas in that building, such as elevators, lobbies, or restrooms, where people from the two spaces could interact.

viii. Consistent with the Cal/OSHA definition of “outbreak,” people may remove their Well-Fitted Masks under this exemption only if there have been no outbreaks (currently defined as three or more COVID-19 cases in an “exposed group” within a 14-day period) for the past 30 days.

g. Personal Services. Patrons of personal services such as facials, beard trims, facial piercing and tattoos, and facial massages may remove their Well-Fitted Mask only while actively receiving a service or treatment that requires temporary removal of the Well-Fitted Mask. Where they cannot maintain at least six feet of distance, providers of personal services must wear a N-95 mask, respirator, or procedural/surgical mask while administering the service.

h. Recreational Sports. Except as provided in this subsection h below, participants in indoor recreational sports, gyms, and yoga studios may not remove their Well-Fitted Masks except while actively engaged in water-based sports (i.e., swimming, swim lessons, diving, and water polo) and other sports where masks create imminent risk to health (e.g., wrestling and judo). Swim instructors who are not Fully Vaccinated are required to wear a face shield at all times that they are in the water with other people.

Effective at 12:01 a.m. on February 1, 2022, patrons and Personnel of indoor gyms, fitness centers, yoga studios, and other fitness or recreational facilities may remove their Well-Fitted Masks if all of the following conditions are satisfied:

i. All people (including patrons and Personnel) entering the facility who remove their Well-Fitted Mask must provide proof they are Up-to-Date on Vaccination. Anyone entering the facility who is Fully Vaccinated but not Up-to-Date on Vaccination (meaning they are eligible for but have not received a Booster or received one in the preceding six days) must keep their Well-Fitted Mask on at all times.

ii. Everyone in the facility must be Up-to-Date on Vaccination or Fully Vaccinated unless they are unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination. If anyone is unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination, that person (except children under age two) may only be in the facility if they had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility and keep their Well-Fitted Mask on at all times (but people are not required to be Tested more than twice each week so long as each Test is done at least three days apart).
iii. The patrons must be limited to members or other regular participants for whom the operator of the facility maintains contact information. No guests or drop-ins may be present. If a guest or drop-in is present, everyone in the facility must wear a Well-Fitted Mask unless otherwise exempted under this Order.

iv. The operator of the facility controls access to ensure that all people entering the facility are Fully Vaccinated or Up-to-Date on Vaccination except as allowed in subsection h.ii. People who enter the facility on an intermittent or occasional basis for short periods of time (e.g., people who deliver goods or packages) do not need to provide proof of Full Vaccination or being Up-to-Date on Vaccination, but must wear a Well-Fitted Mask unless otherwise exempted under this Order and are strongly encouraged to avoid entering any area of the facility covered by this exemption where people in that area do not need to wear Well-Fitted Masks. For clarity, anyone who participates in the exercise, recreational, or fitness activities at the facility is not considered to be there on an intermittent or occasional basis for a short period of time, regardless of how briefly they may participate or whether the activity itself does not last long.

v. In the context of this rule, Well-Fitted Masks may be removed by anyone present based on other exceptions listed in this Appendix (such as removal while actively eating or drinking or while showering). But this rule does not apply in the context of TK-12 schools (which are subject to Health Officer Directive No. 2020-33, including as it is amended) or Programs for Children and Youth (which are subject to Health Officer Directive No. 2020-14, including as it is amended).

vi. The operator of the facility must implement at least one of the ventilation strategies listed in Section 2 of this Appendix A.

vii. An operator of the facility may provide for distinct exercise spaces where people may remove their Well-Fitted Mask masks. For example, if a gym has two floors, people on one floor could remove their Well-Fitted Masks because everyone present meets the requirements of subsections h.i through h.iv and the space otherwise meets all the conditions listed in this Section, but all the people on another floor must wear a Well-Fitted Mask because they do not meet the conditions listed in this section (e.g., not Fully Vaccinated or Up-to-Date on Vaccination due to a medical exemption or is a guest). Or if the facility has fully-enclosed rooms for separate uses (e.g., a yoga, cardio, or spin room), people in that room could remove their Well-Fitted Mask when they are Up-to-Date on Vaccination, all others present meet the requirements above, and the space otherwise meets all the conditions listed in this Section, where the people
in other shared areas of the facility remain masked. But, people must wear a Well-Fitted Mask in common areas in that facility, such as elevators, lobbies, or restrooms, where people from the two spaces could interact.

viii. Consistent with the Cal/OSHA definition of “outbreak,” people may remove their Well-Fitted Masks under this exemption only if there have been no outbreaks (currently defined as three or more COVID-19 cases in an “exposed group” within a 14-day period) for the past 30 days.

i. Offices. Effective at 12:01 a.m. on February 1, 2022, Personnel in indoor offices may remove their Well-Fitted Masks if all of the following conditions are satisfied:

i. All people entering the facility who remove their Well-Fitted Mask must provide proof they are Up-to-Date on Vaccination. Anyone entering the facility who is Fully Vaccinated but not Up-to-Date on Vaccination (meaning they are eligible for but have not received a Booster or received one in the preceding six days) must keep their Well-Fitted Mask on at all times.

ii. Everyone in the facility must be Up-to-Date on Vaccination or Fully Vaccinated unless they are unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination. If anyone is unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination, that person (except children under age two) may only be in the facility if they had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility and keep their Well-Fitted Mask on at all times (but people are not required to be Tested more than twice each week so long as each Test is done at least three days apart).

iii. The people in the office space must be limited to the Personnel of the Business or other entity. No visitors may be present. If a visitor is present, everyone in the office space must wear a Well-Fitted Mask unless otherwise exempted under this Order.

iv. The Business or other entity controls access to ensure that all people entering the office space are Fully Vaccinated or Up-to-Date on Vaccination except as allowed in subsection i.ii. People who enter the office space on an intermittent or occasional basis for short periods of time (e.g., people who deliver goods or packages) do not need to provide proof of Full Vaccination or being Up-to-Date on Vaccination, but must wear a Well-Fitted Mask unless otherwise exempted by this Order and are strongly encouraged to avoid entering any area of the facility covered by this exemption where people in that area do not need to wear Well-Fitted Masks. For clarity, anyone who works for the employer or in the office
space is not considered to be there on an intermittent or occasional basis for a short period of time, regardless of how irregularly or briefly they may be in the space.

v. In the context of this rule, Well-Fitted Masks may be removed by anyone present based on other exceptions listed in this Appendix (such as removal while actively eating or drinking or while showering). But this rule does not apply in the context of TK-12 schools (which are subject to Health Officer Directive No. 2020-33, including as it is amended) or Programs for Children and Youth (which are subject to Health Officer Directive No. 2020-14, including as it is amended).

vi. The Business or other entity must implement at least one of the ventilation strategies listed in Section 2 of this Appendix A.

vii. A Business or other entity may provide for distinct work spaces where people may remove their Well-Fitted Masks. For example, if an employer occupies two floors in a building, employees on one floor could remove their Well-Fitted Masks because everyone present meets the requirements of subsections i.i through i.iv and the space otherwise satisfies all the conditions in this Section, but all the employees on another floor must wear a Well-Fitted Mask because they do not satisfy all the conditions of this Section (e.g., not Fully Vaccinated, not Up-to-Date on Vaccination, or are visitors). But, people must wear a Well-Fitted Mask in common areas in that building, such as elevators, lobbies, or restrooms, where people from the two spaces could interact.

viii. Consistent with the Cal/OSHA definition of “outbreak,” people may remove their Well-Fitted Masks under this exemption only if there have been no outbreaks (currently defined as three or more COVID-19 cases in an “exposed group” within a 14-day period) for the past 30 days.

j. Indoor Classes, Lectures, and Other Similar Gatherings. Lecturers and other instructors in indoor classes and speakers at gatherings in other indoor settings outside Residences (each a “speaker”) may remove their Well-Fitted Masks while actively speaking. If a speaker removes their Well-Fitted Mask, then they must maintain at least six feet of distance from participants, and Personnel and are encouraged to maintain as much distance from other speakers as possible. Speakers are strongly urged to be Up-to-Date on Vaccination (including receiving a Booster as soon as eligible) and recently Tested and to wear their Well-Fitted Masks to the greatest extent possible. Participants must remain masked while attending the event and Personnel must remain masked while working at the event, except when another exemption under this Order expressly applies.

Effective at 12:01 a.m. on February 1, 2022, speakers, participants, and Personnel in indoor classes and other similar gatherings may remove their Well-Fitted Masks if all of
the following conditions are satisfied:

i. All people (including speakers, instructors, participants, and Personnel) entering the facility who remove their Well-Fitted Mask must provide proof they are Up-to-Date on Vaccination. Anyone entering the facility who is Fully Vaccinated but not Up-to-Date on Vaccination (meaning they are eligible for but have not received a Booster or received one in the preceding six days) must keep their Well-Fitted Mask on at all times.

ii. Everyone in the facility must be Up-to-Date on Vaccination or Fully Vaccinated unless they are unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination. If anyone is unvaccinated due to a Qualifying Medical Reason, Religious Beliefs, or age restriction to vaccination, that person (except children under age two) may only be in the facility if they had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility and keep their Well-Fitted Mask on at all times (but people are not required to be Tested more than twice each week so long as each Test is done at least three days apart).

iii. The gathering consists of a stable group of people meeting on a regular basis. By way of example but not limitation, this exemption does not apply to one-time lectures or presentations, community events, or secular memorials. No guests or drop-in participant may be present. If a guest or drop-in participant is present, everyone must wear a Well-Fitted Mask unless otherwise exempted by this Order.

iv. The operator of the facility or host of the gathering controls access to the event to ensure that all people entering the facility are Fully Vaccinated or Up-to-Date on Vaccination except as allowed in subsection j.ii. People who enter the facility on an intermittent or occasional basis for short periods of time (e.g., people who deliver goods or packages) do not need to provide proof of Full Vaccination or being Up-to-Date on Vaccination, but must wear a Well-Fitted Mask unless otherwise exempted under this Order and are strongly encouraged to avoid entering any area of the facility covered by this exemption where people in that area do not need to wear Well-Fitted Masks. For clarity, anyone who participates in the class or gathering at the facility is not considered to be there on an intermittent or occasional basis for a short period of time, regardless of how briefly they may participate or whether the class or gathering itself does not last long.

v. In the context of this rule, Well-Fitted Masks may be removed by anyone present based on other exceptions listed in this Appendix (such as removal while actively eating or drinking or while showering). But this rule does not apply in the context of TK-12 schools (which are subject to Health Officer
vi. The total number of people present in the indoor class or other gathering (excluding religious gatherings, which are separately exempted above) does not exceed 100 people.

vii. The operator of the facility or host of the gathering must implement at least one of the ventilation strategies listed in Section 2 of this Appendix A.

viii. An operator of the facility or host of the gathering may provide for distinct gathering spaces where people may remove their Well-Fitted Masks. For example, if a gathering occupies two floors in a building, people on one floor could remove their Well-Fitted Masks because everyone present meets the requirements of subsections j.i through j.iv and the space otherwise satisfies all the conditions in this Section, but all the people on another floor must wear a Well-Fitted Mask because they do not satisfy all the conditions of this Section (e.g., not Fully Vaccinated, not Up-to-Date on Vaccination, or are guests). However, people must wear a Well-Fitted Mask in common areas in that building, such as elevators, lobbies, or restrooms, where people from the two spaces could interact.

ix. Consistent with the Cal/OSHA definition of “outbreak,” people may remove their Well-Fitted Masks under this exemption only if there have been no outbreaks (currently defined as three or more COVID-19 cases in an “exposed group” within a 14-day period) for the past 30 days.
1. Covered Businesses and Events.

For purposes of this Appendix B, Covered Businesses include:

a. Operators/hosts of establishments or events where food or drink is served indoors—
    including, but not limited to, dining establishments, bars, clubs, theaters, and
    entertainment venues. For clarity, this does not include food or drink provided as part
    of a religious ceremony (e.g., communion or kiddush).

b. Gyms, recreation facilities, yoga studios, dance studios, and other fitness
    establishments, where any patrons engage in cardiovascular, aerobic, strength
    training, or other exercise involving elevated breathing. For clarity, fitness
    establishments and activities that are part of a K-12 school or operate as a Program
    for Children and Youth are covered by separate sector-specific directives (available at
    www.sfdph.org/directives) and are not subject to the requirements of this
    Appendix B.

2. Vaccination Requirement for Patrons.

a. Requirement. Covered Businesses must require all patrons age 12 and older to show
    proof that they have received the full initial course of vaccination at least two weeks
    earlier (are Fully Vaccinated) before entering any indoor portion of a facility, subject
    only to the exceptions in this Section 2 and below and any applicable requirements of
    federal, state, or local laws requiring accommodation. Covered Businesses are
    strongly urged to require all patrons to show proof that they are Up-to-Date on
    Vaccination, including receipt of a Booster by patrons age 12 and older as soon as
    eligible, before entering any indoor portion of a facility, subject only to the
    exceptions below and any applicable requirement of federal, state, or local laws
    requiring accommodation.

    Beginning on February 1, 2022, operators of such Covered Businesses are allowed,
    but not required by this Order, to accept exemptions from the vaccination
    requirements subject to certain health precautions as listed in Section 4.a.i of the
    Order and referenced below. Patrons and staff may be exempt from the vaccination
    requirements only upon stating either of the following: (1) the individual is declining
    vaccination based on Religious Beliefs or (2) the individual is excused from receiving
    any COVID-19 vaccine due to Qualifying Medical Reasons. For patrons, no
    paperwork regarding the declination is required. For staff, written documentation of
    some kind must be used. A sample ascertainment and declination form that can be
    used for this purpose is available online at www.sfdph.org/dph/covid-
    19/files/declination.pdf. As to declinations based on Qualifying Medical Reasons or
    Religious Beliefs, a Business may seek additional information as allowed or required
    by applicable law to determine whether Personnel have a Qualifying Medical
    Reasons or qualifying Religious Belief.
Patrons and staff who qualify for and are granted by the Business an exemption due to Religious Beliefs or Qualifying Medical Reasons must follow both of these minimum health and safety requirements: a) show proof of having had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility (but people are not required to be Tested more than twice each week so long as each Test is done at least three days apart) and b) wear a Well-Fitted Mask at all times except as allowed under any of the specific exceptions under Appendix A of this Order. For proof of a Test, self-administered antigen testing is not acceptable at this time unless there is third-party verification—the Covered Business must require proof of a negative Test as outlined by CDPH’s guidance in the section titled “What can be used as proof of a negative pre-entry test in settings where pre-entry testing is required?”, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Updated-COVID-19-Testing-Guidance.aspx#pre-entry-testing.

For purposes of this requirement, Covered Businesses may not accept a written self-attestation of vaccination proof of Full Vaccination or being Up-to-Date on Vaccination. The following are the only acceptable proof of Full Vaccination, as well as being Up-to-Date on Vaccination:

1. the CDC vaccination card, which includes name of person vaccinated, type of vaccine provided, and date last dose administered, or similar documentation issued by another foreign governmental jurisdiction;

2. a photo or copy of a vaccination card as a separate document;

3. a photo of a vaccination card stored on a phone or electronic device;

4. documentation of vaccination from a healthcare provider; or

5. a personal digital COVID-19 vaccine record issued by the State of California and available by going to https://myvaccinerecord.cdph.ca.gov or similar documentation issued by another state, local, or foreign governmental jurisdiction, or by an approved private company (a list of approved companies offering digital vaccine cards is available at www.sfdph.org/dph/alerts/files/vaccine-verification-sites.pdf).

Covered Businesses are required to cross-check proof of vaccination status for each patron against a photo identification, unless photo identification is integrated into the digital COVID-19 vaccine record.

b. Exceptions and Clarifications.

i. For clarity, individuals who do not provide proof of Full Vaccination (or being Up-to-Date on Vaccination, if applicable) may use the outdoor portions of
Order No. C19-07y – Appendix B: Proof of Vaccination Requirements

[January 26, 2022]

Covered Business facilities (but not the indoor portions except solely as provided in subsections (ii), (iii), and (v) below).

ii. Covered Businesses may allow patrons wearing a Well-Fitted Mask to come indoors to use a restroom without requiring patrons to show proof they are Fully Vaccinated (or Up-to-Date on Vaccination, if applicable).

iii. Dining establishments and bars may require proof of Full Vaccination (or being Up-to-Date on Vaccination, if applicable) or proof of a negative COVID-19 Test to be shown at the time of patrons’ first in-person interaction with staff (e.g., at the time of ordering) rather than at the entrance to the establishment, but only if all such patrons wear Well-Fitted Masks at all times after entering the indoor portion of the facility and before showing such proof. Dining establishments and bars are prohibited from serving any patron indoors who fails to provide this proof.

iv. Theaters where concessions are sold may require proof of Full Vaccination (or being Up-to-Date on Vaccination, if applicable) or proof of a negative COVID-19 Test to be shown at the time of patrons’ purchase of concessions rather than at the entrance to the establishment. Theaters are prohibited from selling food or beverages to any patron indoors who fails to provide this proof.

v. Dining establishments and bars that serve food may allow individuals wearing a Well-Fitted Mask to enter the indoor portion of the facility to order, pick up, or pay for food or drink “to go” without showing proof of Full Vaccination (or being Up-to-Date on Vaccination, if applicable).

vi. Businesses may obtain proof of Full Vaccination (or being Up-to-Date on Vaccination, if applicable) in advance of a patron’s arrival at a facility, e.g., by email or through a reservation system, but must confirm identification at the time of entry into the facility.

vii. Businesses operating food courts in indoor shopping centers that offer seated dining are required to obtain proof of Full Vaccination (or being Up-to-Date on Vaccination, if applicable) or proof of a negative COVID-19 Test before patrons enter into the food court unless those operators remove seating from the area.

viii. Individuals hosting private events in their homes are not subject to the requirements of this Appendix B but are strongly urged to require all guests age 12 and older to show proof that they are Fully Vaccinated (or Up-to-Date on Vaccination for guests age 16 and older, if applicable) or proof of a negative COVID-19 Test.

3. **Vaccination Requirement for Staff.**
Order No. C19-07y – Appendix B: Proof of Vaccination Requirements

[January 26, 2022]

a. Requirements. Subject to the exceptions below and any applicable requirements of federal, state, or local laws requiring accommodation:

i. Covered Businesses must use their best efforts to ascertain the vaccination status of all staff who routinely work onsite except to the extent exempt under Section 4.a.i of the Order. A sample Employee Vaccination Program Ascertainment Form is available at www.sfdph.org/dph/covid-19/files/declination.pdf.

ii. Covered Businesses must ensure that all staff who routinely work onsite provide proof that they are Fully Vaccinated or, if exempt from vaccination, proof of a negative COVID-19 Test before entering or working in any indoor portion of the facility.

iii. Covered Businesses are strongly urged to ensure that all staff who routinely work onsite provide proof that they are Up-to-Date on Vaccination before entering or working in any indoor portion of the facility.

iv. Consistent with applicable privacy laws and regulations, Covered Businesses must maintain records of staff vaccination or exemption status, and provide these records to the Health Officer or other public health authorities promptly upon request, and in any event no later than the next business day after receiving the request.

b. Exceptions and Clarifications.

i. For clarity, “staff” as used in this order does not include all individuals included in the broader term “Personnel.” Individuals who enter or work in a Covered Business facility on an intermittent or occasional basis or for short periods of time (e.g., individuals who deliver goods or packages) are not covered by the requirements in this Appendix B.

4. Signage.

a. Signage for Patrons. All Covered Businesses are required to conspicuously post at the entrance to the facility signage informing individuals that proof of Full Vaccination is required to enter the indoor portion of the facility. Sample signage is available at https://sf.gov/outreach-toolkit-coronavirus-covid-19.

b. Signage for Staff. All Covered Businesses are required to post signs in employee break rooms or similar areas informing staff that they are required to provide proof of Full Vaccination, and informing them how to obtain additional information about getting vaccinated. Sample signage is available online at https://sf.gov/outreach-toolkit-coronavirus-covid-19.
