ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

ORDER OF THE HEALTH OFFICER
OF THE CITY AND COUNTY OF SAN FRANCISCO
ENCOURAGING COVID-19 VACCINE COVERAGE
AND REDUCING DISEASE RISKS
(Safer Return Together)

DATE OF ORDER: June 11, 2021, updated July 8, 2021, July 20, 2021, August 2, 2021,
August 12, 2021, August 24, 2021, September 10, 2021, October 13, 2021,
December 14, 2021, December 29, 2021, January 10, 2022, January 26, 2022, and
February 14, 2022

NOTE (REVISED FEBRUARY 14, 2022) On February 7, 2022, the State of California issued
revisions to its COVID-19 orders related to the use of face masks indoors (available online at
www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/guidance-for-face-coverings.aspx)
and to the thresholds for mega-events (available online at
www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Beyond-Blueprint-Framework.aspx). Under these revised rules, universal indoor masking is no longer required
in California for most public settings, although masking is still required in public indoor
settings for anyone who has not completed their full initial vaccine series, and the definition of
indoor and outdoor mega-events was adjusted back to the definition used before the surge
associated with the Omicron variant. The update to this Order includes changes to conform
San Francisco’s local rules regarding masking indoors and mega-events. Additionally, the
update to this Order makes other important changes.

Please read this Order carefully. Violation of or failure to comply with this Order is a
misdemeanor punishable by fine, imprisonment, or both. (California Health and Safety
Code § 120295, et seq.; California Penal Code §§ 69, 148(a)(1); and San Francisco
Administrative Code § 7.17(b).)

Summary: As of February 16, 2022, this Order replaces the prior update of this health
order, Health Officer Order No. C19-07y (issued January 26, 2022), in its entirety.

The Health Officer is updating the Order in light of the recent changes to State guidelines
and the decreasing (though still high) number of cases in the community and lower
number of hospitalizations associated with the spread in San Francisco and the Bay Area
region of the Omicron variant of SARS-CoV-2, the virus that causes COVID-19. Still,
there remains the ongoing threat that the virus poses to the health of vulnerable residents
and also potentially to the capacity of San Francisco’s healthcare system. Current
evidence indicates that the Omicron variant is much more transmissible than Delta and
other variants of the virus, and that individuals who have had only their initial vaccine
series are susceptible to the Omicron variant. Medical data to date also show that
individuals who have received a booster shot increase their immunity to a level that confers significantly more protection from all circulating SARS-CoV-2 variants, including the Omicron variant, and generally prevents severe disease. The United States Centers for Disease Control and Prevention and the California Department of Public Health now recommend that everyone who has been vaccinated receive a booster shot as soon as they are eligible because immunity wanes several months after completion of the initial vaccine series. And the CDC and CDPH recommend that people receive the Pfizer-BioNTech or Moderna booster if they can.

Vaccination remains a critical component in preventing COVID-19 and its associated health harms. Individuals who have not received their initial vaccine series or a booster shot are more likely to become infected and spread infection to others, and more likely to become seriously ill and die. It is critical that community members receive their initial vaccine series and booster shots when eligible to maintain the protective effect of the high community-wide vaccination rates in San Francisco.

Even though a high percentage of people are vaccinated in San Francisco and the Bay Area region against the virus that causes COVID-19 and an increasing percentage are boosted, there remains a risk that people may come into contact with others who have COVID-19 when outside their residence. Many COVID-19 infections are caused by people who have no symptoms of illness. Also, there are people in San Francisco who have not completed their initial vaccine series or who are not yet eligible to receive a booster, including children under five years old, and people who are immunocompromised and may be particularly vulnerable to infection and disease. Everyone who is eligible, including people at risk for severe illness with COVID-19—such as unvaccinated older adults and unvaccinated individuals with health risks—and members of their households, are strongly urged to get vaccinated and receive their booster as soon as they can if they have not already done so.

Further, to address the continuing number of cases and hospitalizations due to the Omicron variant as well as the risk of future variants, and consistent with CDPH orders requiring vaccination and boosters for most healthcare workers, the Health Officer has determined that all people working in designated high-risk settings be both vaccinated and boosted as soon as they are eligible. People working in these high-risk settings (1) can expose highly vulnerable people who are at increased risk of severe illness and death to COVID-19, (2) must therefore be protected from COVID-19 to the maximum extent possible to ensure adequate staffing in these critical settings, and (3) particularly for jails, shelters, and skilled nursing facilities, can cause large outbreaks if workers are infected.

Accordingly, this Order imposes a requirement, layered on top of the recently revised CDPH health orders, for (1) personnel working in designated high-risk settings—meaning general acute care hospitals, skilled nursing facilities, intermediate care facilities, residential care facilities for the elderly, homeless shelters, and jails, all as further defined below—as well as (2) personnel working in other higher-risk settings—including adult care facilities, adult day programs, dental offices, home health care
workers, and pharmacists, and (3) personnel who visit higher-risk settings as part of the work, such as paramedics, emergency medical technicians, police officers, and lawyers who visit people in the jails—to both receive the full initial course of vaccination and, once they are eligible, to receive a booster. Businesses and governmental entities with personnel in these high-risk settings have until March 1, 2022 to comply with the booster verification requirement, meaning those who are eligible to receive a booster on or before February 14, 2022 must have received their booster by March 1, 2022. And those who are eligible for a booster after February 14, 2022 must receive it within 15 days after they become eligible. Personnel working in high-risk settings who are eligible for a booster and have not yet received one must be tested once or twice a week for COVID-19, depending on the setting, and provide proof of a negative test, until one week after they receive a booster. For Personnel who are not permanently stationed or regularly assigned to High-Risk Settings but who in the course of their duties may enter or work in High-Risk Settings even on an intermittent or occasional basis or for short periods of time (such as police, firefighters, paramedics and emergency medical technicians), the deadline for receipt of a Booster is also March 1, 2022, but employers of such Personnel can extend that deadline subject to certain health precautions until April 15, 2022 due to critical staffing shortages.

On February 7, 2022, CDPH updated its order regarding the requirement to wear a face covering indoors, eliminating its “universal” face covering requirement for individuals in most indoor public settings and returning to the pre-Omicron surge requirements that anyone who is unvaccinated and two years or older to wear a mask in those settings. A copy of the updated CDPH masking order is available online at [www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/guidance-for-face-coverings.aspx](http://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/guidance-for-face-coverings.aspx). This Order has been updated to largely align with the new CDPH masking rules, while maintaining local requirements in certain areas and encouraging, at least for the time being, even people who are Vaccinated with a Complete Initial Series or Up-to-Date On Vaccination to continue wearing masks in indoor public settings where they are not otherwise required. Operators and hosts of indoor Mega-Events, as well as the operators of other indoor facilities that continue to have proof of vaccination or testing requirements (like gyms, bars, and restaurants) are allowed, but not required, beginning February 16, 2022 to align with the State’s rule for indoor masking. That change means people who are Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination may remove their Well-Fitted Masks, though for the time being the Health Officer still recommends that even vaccinated people continue to wear Well-Fitted Masks in public indoor settings. Also, particularly in light of the Omicron variant and risk of future variants, the Health Officer continues to recommend that whenever possible everyone wear a non-vented respirator, such as an N95, KN95, or KF94 respirator, when wearing a mask. A well-fitting surgical/procedural mask with a cloth mask worn over it to increase fit is also recommended. Finally, the Order maintains face covering requirements in other settings such as public transit, K-12 schools and childcare, as well as health care facilities, skilled nursing facilities, homeless shelters, and jails, consistent with federal and state rules.

This Order includes requirements related to entry to indoor gatherings of different types.
For indoor Mega-Events, patrons must show proof they either are vaccinated as required by the Order (including for most adults to be Up-to-Date on Vaccination, including having a Booster once Booster-Eligible) or have a negative COVID-19 test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. Consistent with CDPH rules, self-administered antigen tests are not acceptable for pre-admission testing unless there is third-party verification. Also, Businesses that operate gyms, other fitness centers, bars, restaurants, and certain other facilities are allowed to accept proof of a negative Test (or a religious and medical exemption to vaccination for patrons and staff/personnel, subject to certain health protections, including providing proof of a negative COVID-19 test) before entry (but people are not required to be tested more than twice each week so long as each test is done at least three days apart). This Order also includes a number of recommendations—but not requirements—for individuals, businesses, and governmental entities to reduce COVID-19 risk, including the strong recommendation everyone be Up-to-Date on Vaccination, including Boosters.

And this Order maintains other minimum COVID-19 safety requirements on businesses and governmental entities, such as a general requirement to report positive cases in the workplace and in schools, and limited requirements for signage for patrons that apply to certain indoor businesses.

UNDER THE AUTHORITY OF CALIFORNIA HEALTH AND SAFETY CODE SECTIONS 101040, 101085, AND 120175, THE HEALTH OFFICER OF THE CITY AND COUNTY OF SAN FRANCISCO ORDERS:

1. Definitions.

For purposes of this Order, the following initially capitalized terms have the meanings given below.

a. **Booster.** A “Booster” means an additional dose of a vaccine authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization (WHO), for which a person is Booster-Eligible. Consistent with CDC and CDPH guidance, either the Pfizer-BioNTech (Comirnaty) or Moderna (Spikevax) COVID-19 vaccine is preferred for the Booster.

b. **Booster-Eligible.** A person is “Booster-Eligible” once they meet criteria to receive a Booster under CDC guidance. For example, as of the date of issuance of this update to the Order, individuals who are 18 or older may receive a booster of the Pfizer-BioNTech (Comirnaty), Moderna (Spikevax), or Johnson & Johnson’s Janssen COVID-19 vaccine at least five months after receiving a second dose of the Pfizer-BioNTech (Comirnaty) or Moderna (Spikevax) COVID-19 vaccine or two months after receiving the single dose Johnson & Johnson’s Janssen COVID-19 vaccine, and adolescents who are 12 to 17 years old may receive a booster of the Pfizer-BioNTech vaccine at least five months after their second dose of that vaccine. Consistent with CDC guidance (available online at [www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html](http://www.cdc.gov/coronavirus/2019-ncov/vaccines/booster-shot.html)), anyone who received a WHO-authorized vaccine...
or a combination of vaccines should receive the Pfizer-BioNTech (Comirnaty) vaccine as their booster pursuant to the timing listing in that guidance. Those preferences apply to all initial vaccination series, regardless of which vaccine an individual received. The CDC has been frequently updating booster eligibility. More up-to-date information on booster eligibility may be found online at www.sfedcp.org/boosters, and individuals, Businesses, and governmental entities are urged to stay informed about changes.

c. Business. A “Business” includes any for-profit, non-profit, or educational entity, whether a corporate entity, organization, partnership or sole proprietorship, and regardless of the nature of the service, the function it performs, or its corporate or entity structure.

d. Cal/OSHA. “Cal/OSHA” means the California Department of Industrial Relations, Division of Occupational Safety and Health, better known as Cal/OSHA.

e. CDC. “CDC” means the United States Centers for Disease Control and Prevention.

f. CDPH. “CDPH” means the California Department of Public Health.

h. County. The “County” means the City and County of San Francisco.

j. DPH. “DPH” means the San Francisco Department of Public Health.

k. DPH Core Guidance. “DPH Core Guidance” means the webpage and related materials titled Core Guidance for COVID-19 that DPH regularly updates and includes health and safety recommendations for individuals and Businesses as well as web links to additional resources, available online at sf.gov/core-guidance-covid-19.
1. **Face Covering Requirements.** “Face Covering Requirements” means the requirements to wear a Well-Fitted Mask (i) under federal or state law including, but not limited to, California Department of Public Health guidance and Cal/OSHA’s regulations; (ii) in indoor common areas of homeless shelters, emergency shelters, and cooling centers, except while sleeping, showering, engaged in personal hygiene that requires removal of face coverings, or actively eating or drinking; (iii) in indoor common areas of jails except while sleeping, showering, engaged in personal hygiene that requires removal of face coverings, or actively eating or drinking; and (iv) under Section 3(b), below and Appendix A, attached to the Order. If a separate state, local, or federal order or directive imposes different face covering requirements, including requirements to wear respirators or surgical masks in certain settings, the more health protective requirement applies.

2. **FDA.** “FDA” means the United States Food and Drug Administration.

3. **Fully Vaccinated.** “Fully Vaccinated” has the same meaning as the newer term “Vaccinated with a Complete Initial Series,” defined below. Because other pre-existing Health Officer orders and directives and other DPH or County guidance materials may still use the term Fully Vaccinated that term continues to be defined in this Order.

4. **Health Officer.** “Health Officer” means the Health Officer of the City and County of San Francisco.

5. **High-Risk Settings.** “High-Risk Settings” means certain care or living settings involving many people, including many congregate settings, where vulnerable populations reside out of necessity and where the risk of COVID-19 transmission is high, consisting of general acute care hospitals, skilled nursing facilities (including subacute facilities), intermediate care facilities, residential care facilities for the elderly, homeless shelters, and jails (including, but not limited to, the Juvenile Justice Center Juvenile Hall).

6. **Household.** “Household” means people living in a single Residence or shared living unit. Households do not refer to individuals who live together in an institutional group living situation such as in a dormitory, fraternity, sorority, monastery, convent, or residential care facility.

7. **Mega-Event.** “Mega-Event” means an event with either more than 1,000 people attending indoors or more than 10,000 people attending outdoors. As provided in the State’s Post-Blueprint Guidance, a Mega-Event may have either assigned or unassigned seating, and may be either general admission or gated, ticketed and permitted events.

8. **Personnel.** “Personnel” means the following people who provide goods or services associated with a Business in the County: employees; contractors and sub-contractors (such as those who sell goods or perform services onsite or who deliver goods for the
ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

Business); independent contractors; vendors who are permitted to sell goods onsite; volunteers; and other individuals who regularly provide services onsite at the request of the Business. “Personnel” includes “gig workers” who perform work via the Business’s app or other online interface, if any.

t. **Qualifying Medical Reason.** “Qualifying Medical Reason” means a medical condition or disability recognized by the FDA or CDC as a contra-indication to COVID-19 vaccination.

u. **Religious Beliefs.** “Religious Beliefs” means a sincerely held religious belief, practice, or observance protected by state or federal law.

v. **Residence.** “Residence” means the location a person lives, even if temporarily, and includes single-family homes, apartment units, condominium units, hotels, motels, shared rental units, and similar facilities. Residences also include living structures and outdoor spaces associated with those living structures, such as patios, porches, backyards, and front yards that are only accessible to a single family or Household.

w. **Schools.** “Schools” mean public and private schools operating in the County, including independent, parochial, and charter schools.

x. **State’s Post-Blueprint Guidance.** The “State’s Post-Blueprint Guidance” means the guidance entitled “Beyond the Blueprint for Industry and Business Sectors” that the California Department of Public Health issued on May 21, 2021 and updated as of February 7, 2022, including as the State may further extend, update or supplement that guidance in the future. (See www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Beyond-Blueprint-Framework.aspx.)

y. **Test and Tested.** “Tested” means to have a negative test (a “Test”) for the virus that causes COVID-19 within the applicable timeframe as listed in this Order. Both nucleic acid (including polymerase chain reaction (PCR)) and antigen tests are acceptable. The following are acceptable as proof of a negative COVID-19 test result: a printed document (from the test provider or laboratory) or an email, text message, webpage, or application (app) screen displayed on a phone or mobile device from the test provider or laboratory. The information should include person’s name, type of test performed, negative test result, and date the test was administered. If any state or federal agency uses a more restrictive definition of what it means to be Tested for specified purposes (such as Cal/OSHA rules for employers in workplaces), then that more restrictive definition controls for those purposes. Some sections of this Order require antigen tests to be third-party verified (meaning administered or observed by the third-party) to meet requirements for showing proof of a negative Test.

z. **Unvaccinated.** “Unvaccinated” refers to a person age two or older who is eligible for COVID-19 vaccination and who is either (i) not at least Vaccinated with a Complete Initial Series or (ii) in an indoor setting where this Order requires proof of being
Vaccinated with a Complete Initial Series as a condition of entry but has not provided such proof.

aa. *Up-to-Date on Vaccination*. “Up-to-Date on Vaccination” means when a person both (i) is Vaccinated with a Complete Initial Series and (ii) has received a Booster once the person is Booster-Eligible. A person is Up-to-Date on Vaccination immediately on receipt of a Booster. Until a person is Booster-Eligible, they are considered Up-to-Date on Vaccination two weeks after completing their full initial series of vaccination.

bb. *Vaccinated with a Complete Initial Series*. “Vaccinated with a Complete Initial Series” means two weeks after completing the entire recommended initial series of vaccination (usually one or two doses) with a vaccine authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization (WHO). For example, as of the date of issuance of this Order, an individual has completed an initial vaccination series at least two weeks after receiving a second dose of the Pfizer-BioNTech (Comirnaty) or Moderna (Spikevax) COVID-19 vaccine or two weeks after receiving the single dose Johnson & Johnson’s Janssen COVID-19 vaccine. A list of FDA-authorized vaccines is available at [www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/covid-19-vaccines](http://www.fda.gov/emergency-preparedness-and-response/coronavirus-disease-2019-covid-19/covid-19-vaccines). A list of WHO-authorized vaccines is available at [https://extranet.who.int/pqweb/vaccines/covid-19-vaccines](https://extranet.who.int/pqweb/vaccines/covid-19-vaccines). On August 23, 2021, the FDA granted full approval for the Pfizer-BioNTech (Comirnaty) vaccine for people age 16 and older, and on January 31, 2022, the FDA granted full approval for the Moderna (Spikevax) vaccine for people age 18 and older. And, on October 29, 2021, the FDA granted emergency use authorization for the Pfizer-BioNTech vaccine for children age five to 11.

Unless otherwise specified, the following are acceptable as proof of being Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination: (i) the CDC vaccination card, which includes name of person vaccinated, type of vaccine provided, and date last dose administered, or similar documentation issued by another foreign governmental jurisdiction, (ii) a photo of a vaccination card as a separate document, (iii) a photo of the a vaccination card stored on a phone or electronic device, (iv) documentation of vaccination from a healthcare provider, (v) unless prohibited elsewhere in this Order in a specific context, written self-attestation of vaccination signed (including an electronic signature) under penalty of perjury and containing the name of the person vaccinated, type of vaccine taken, and date of last dose administered, or (vi) a personal digital COVID-19 vaccine record issued by the State of California and available by going to [https://myvaccinerecord.cdph.ca.gov](https://myvaccinerecord.cdph.ca.gov) or similar documentation issued by another State, local, or foreign governmental jurisdiction, or by an approved private company (a list of approved companies offering digital vaccine verification is available at [www.sfdph.org/dph/alerts/files/vaccine-verification-sites.asp](http://www.sfdph.org/dph/alerts/files/vaccine-verification-sites.asp)). If any state or federal agency uses a more restrictive definition of what it means to be Vaccinated with a Complete Initial Series or to prove that status for specified purposes (such as
ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

Cal/OSHA rules for employers in workplaces), then that more restrictive definition controls for those purposes. Also, to the extent Cal/OSHA approves an alternate means of documenting whether an employee has completed the full initial series or is “fully vaccinated,” even if less restrictive than the definition contained here, employers may use the Cal/OSHA standard to document their employees’ vaccination status.

cc. Ventilation Guidelines. “Ventilation Guidelines” means ventilation guidance from recognized authorities such as the CDC, the American Society of Heating, Refrigerating and Air-Conditioning Engineers, or the State of California (available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Interim-Guidance-for-Ventilation-Filtration-and-Air-Quality-in-Indoor-Environments.aspx), including Cal/OSHA.

dd. Well-Fitted Mask. A “Well-Fitted Mask” means a face covering that is well-fitted to an individual and covers the nose and mouth especially while talking, consistent with the Face Covering Requirements. CDC guidance regarding Well-Fitted Masks may be found at www.cdc.gov/coronavirus/2019-ncov/your-health/effective-masks.html. A well-fitting non-vented N95, KN95, or KF94 respirator is strongly recommended as a Well-Fitted Mask, even if not fit-tested, to provide maximum protection. A well-fitting surgical/procedural mask with a cloth mask worn over it to increase fit is also recommended. Given higher transmissibility of the Omicron variant, cloth masks alone are no longer recommended. A Well-Fitted Mask does not include a scarf, ski mask, balaclava, bandana, turtleneck, collar, or single layer of fabric or any mask that has an unfiltered one-way exhaust valve.

2. Purpose and Intent.

a. Purpose. The public health threat of serious illness or death from COVID-19 is much lower in the County and the Bay Area than many parts of the State and country due to the high rate of vaccination of the community. But COVID-19 continues to pose a risk especially to individuals who are not eligible to be vaccinated or are not yet Up-to-Date on Vaccination, and certain safety measures continue to be necessary to protect against COVID-19 cases and deaths. Being Up-to-Date on Vaccination, including receiving a Booster as soon as Booster-Eligible, is the most effective method to prevent transmission and ultimately COVID-19 hospitalizations and deaths. It is important to ensure that as many eligible people as possible are vaccinated against COVID-19. Further, it is critical to ensure there is continued reporting of cases to protect individuals and the larger community. Accordingly, this Order allows Businesses, schools, and other activities to resume fully while at the same time putting in place certain requirements designed to (1) extend vaccine coverage to the greatest extent possible; (2) limit transmission risk of COVID-19; (3) contain any COVID-19 outbreaks; and (4) generally align with guidance issued by the CDC and the State relating to COVID-19 except in limited instances where local conditions require more restrictive measures. This Order is based on evidence of continued community transmission of SARS-CoV-2 within the County as well as
scientific evidence and best practices to prevent transmission of COVID-19. The Health Officer will continue to monitor data regarding the evolving scientific understanding of the risks posed by COVID-19, including the impact of vaccination, and may amend or rescind this Order based on analysis of that data and knowledge.

b. Intent. The primary intent of this Order is to continue to protect the community from COVID-19 and to also increase vaccination rates to reduce transmission of COVID-19 long-term, so that the whole community is safer and the COVID-19 health emergency can come to an end.

c. Interpretation. All provisions of this Order must be interpreted to effectuate the purposes and intent of this Order as described above. The note and summary at the beginning of this Order as well as the headings and subheadings of sections contained in this Order are for convenience only and may not be used to interpret this Order. In the event of any inconsistency between the summary, headings, or subheadings and the text of this Order, the text will control. Certain initially capitalized terms used in this Order have the meanings given them in Section 1 above. The interpretation of this Order in relation to the health orders or guidance of the State is described in Section 10 below.

d. Application. This Order applies to all individuals, Businesses, and other entities in the County. For clarity, the requirements of this Order apply to all individuals who do not currently reside in the County when they are in the County. Governmental entities must follow the requirements of this Order that apply to Businesses, unless otherwise specifically provided in this Order or directed by the Health Officer.

e. DPH Core Guidance. All individuals and Businesses are strongly urged to follow the DPH Core Guidance (available online at sf.gov/core-guidance-covid-19) containing health and safety recommendations for COVID-19.

f. Effect of Failure to Comply. Failure to comply with any of the provisions of this Order constitutes an imminent threat and menace to public health, constitutes a public nuisance, and is punishable by fine, imprisonment, or both, as further provided in Section 12 below.

3. General Requirements for Individuals.

a. Vaccination. Individuals are strongly urged to be Up-to-Date on Vaccination, meaning, as further provided in Section 1, that they are Vaccinated with a Complete Initial Series and, as soon as they are Booster-Eligible, receive their Booster. In particular, people at risk for severe illness with COVID-19—such as unvaccinated older adults and unvaccinated individuals with health risks—and members of their Household, are urged to be Up-to-Date on Vaccination, including receiving a Booster, as soon as they can. Information about who is at increased risk of severe illness and people who need to take extra precautions can be found at www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-with-medical-
For those who are not yet Up-to-Date on Vaccination, making informed choices about the risk of different activities, wearing a Well-Fitted Mask indoors, or choosing outdoor activities as much as possible with physical distancing from other Households whose vaccination status is unknown, are the best ways to prevent the risk of COVID-19 transmission. Individuals who are Up-to-Date on Vaccination are subject to fewer restrictions as provided in this Order, and there are allowances for certain large gatherings where all the participants are Up-to-Date on Vaccination or have been Tested and received a negative Test result.

b. Face Coverings. All persons must follow the Face Covering Requirements. More specifically, people who are Unvaccinated must continue to wear a Well-Fitted Mask in public settings indoors, as further described in Appendix A to this Order. Also, everyone is required to wear a Well-Fitted Mask, regardless of vaccination status, in the following indoor settings: public transit; TK-12 schools and childcare; High-Risk Settings; health care and other long-term care facilities where masking is required by regulatory orders and rules; and anywhere else that federal or state health orders require doing so, as described in Section 3(b)(i) and Appendix A. Appendix A lists exceptions and allowances when a Well-Fitted Mask is not required, including an exception in certain situations where a person is Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination. People who are Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination are encouraged to continue to wear a Well-Fitted Mask when in indoor public settings where masking is not otherwise required. Everyone should consistently wear the best mask they can obtain, considering fit and filtration (and without using a one-way exhalation valve that is not filtered), when they are indoors with other people, especially with people whose vaccination status is unknown. As provided in the definition of a Well-Fitted Mask, a well-fitting non-vented N95, KN95, or KF94 respirator is strongly recommended. A well-fitting surgical/procedural mask with a cloth mask worn over it to increase fit is also recommended. More information about fit and filtration and the best mask options is available online at [www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Get-the-Most-out-of-Masking.aspx](http://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Get-the-Most-out-of-Masking.aspx). People should respect an individual’s decision to wear face coverings even in settings where they are not required, such as crowded outdoor settings, and no Business or other person should take an adverse action against individuals who chose to wear a face covering to protect their health.

i. Other Federal and State Requirements. Under current federal law, when riding or waiting to ride on public transit people who are inside the vehicle or other mode of transportation or are indoors at a public transit stop or station, must wear Well-Fitted Masks. This requirement extends to all modes of transportation other than private vehicles, such as airplanes, trains, subways, buses, taxis, ride-shares, maritime transportation, street cars, cable cars, and school buses. But any passenger who is outdoors or in open-air areas of the mode of transportation, such as open-air areas of ferries, buses, and cable-cars, is not required by federal law to wear a face covering. Personnel and passengers on public transit are urged to be Up-to-Date on Vaccination, and

[conditions.html](http://conditions.html)
those who are not Up-to-Date on Vaccination are strongly urged to wear a Well-Fitted Mask or respirator when not otherwise required by the Face Covering Requirements. Under Cal/OSHA’s regulations, employers may also be required to ensure employees continue to wear Well-Fitted Masks or respirators, particularly in indoor settings. Businesses and other entities must adhere to Cal/OSHA regulations relating to COVID-19 health and safety measures in the workplace, and more information can be found online at www.dir.ca.gov/dosh/coronavirus/covid19faqs.html. Nothing in this Order is intended to reduce any of those requirements or otherwise modify them in a way that is less protective of public health, or to limit an individual’s own choices to take more health protective measures.

ii. Additional Face Covering Recommendations.

1. **Outdoor Crowded Gatherings.** People who are outdoors in close proximity to other people who are not part of their Household are recommended to wear a Well-Fitted Mask.

2. **Indoor Private Gatherings.** It is safest when everyone participating in indoor private gatherings in Residences with members from different Households is Up-to-Date on Vaccination (including having a Booster as soon as Booster-Eligible). An additional layer of protection is for people to Test negative before the gathering. And if not everyone at the gathering is Up-to-Date on Vaccination, or if their vaccination status is not known, everyone attending is encouraged to wear a Well-Fitted Mask at all times during the gathering while they are indoors. For clarity, anyone who is Unvaccinated must wear a Well-Fitted Mask in common areas of a Residence that are used as a shared rental with multiple Households.

c. **Monitor for Symptoms.** Individuals should monitor themselves for symptoms of COVID-19. A list of COVID-19 symptoms is available online at www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/symptoms.html. Anyone with any symptom that is new or not explained by another condition must comply with subsections 3(d) and 3(e) below regarding isolation and quarantine.

d. **Isolation.** Anyone who has or likely has COVID-19, meaning that person (i) has a positive COVID-19 test result, (ii) is diagnosed with COVID-19, or (iii) has a COVID-19 symptom that is new or not explained by another condition, must refer to the latest COVID-19 isolation health directive issued by the Health Officer (available online at www.sfdph.org/directives) and follow the requirements detailed there. There are special requirements for healthcare workers and emergency medical services personnel in healthcare settings.

e. **Quarantine.** Anyone who had Close Contact must refer to the latest COVID-19 quarantine health directive issued by the Health Officer (available online at
www.sfdph.org/directives) and follow the requirements detailed there. There are special requirements for healthcare workers and emergency medical services personnel in healthcare settings.

f. **Moving to, Traveling to, or Returning to the County.** Everyone is strongly encouraged to comply with (1) any State travel advisories (available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Travel-Advisory.aspx) and (2) CDC travel guidelines (available online at www.cdc.gov/coronavirus/2019-ncov/travelers/travel-during-covid19.html).

g. **Minimum Requirements.** Based on their risk preferences, individuals may decide for themselves to take greater safety precautions than required or even recommended under this Order. Also, nothing in this section limits any requirements that apply under this Order to indoor public settings, indoor Mega-Events, or that Cal/OSHA or other State authority may impose on any indoor setting involving gatherings.

4. **General Requirements for Businesses and Governmental Entities.**

a. **Vaccination.** Businesses and governmental entities are generally encouraged to require Personnel and patrons to be Up-to-Date on Vaccination, meaning they are Vaccinated with a Complete Initial Series and have received a Booster when they are Booster-Eligible.

i. **Complete Initial Series Vaccination Requirement for Listed Indoor Businesses.** The following Businesses (1) must require patrons and staff (as distinguished from the broader term “Personnel”) to provide either proof of being Vaccinated with a Complete Initial Series or proof of a negative Test (as detailed in Appendix B to this Order), (2) are strongly urged to implement measures as soon as possible to require those patrons and staff to be Up-to-Date on Vaccination, including requiring them to show proof of receipt of a Booster once they are Booster-Eligible, and (3) must comply with the other requirements detailed in Appendix B to this Order:

- Operators or hosts of establishments or events where food or drink is served indoors—including, but not limited to, dining establishments, bars, clubs, theaters, and entertainment venues.

- Gyms, recreation facilities, yoga studios, dance studios, and other fitness establishments, where any patrons engage in cardiovascular, aerobic, strength training, or other exercise involving elevated breathing.

Beginning on February 16, 2022, operators of such Businesses are allowed, but not required by this Order, and as an alternative to checking proof of vaccination status for patrons and staff, to instead accept proof of a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility (but people are not required to be Tested
more than twice each week so long as each Test is done at least three days apart).

For proof of a Test as listed in the preceding paragraph, self-administered antigen testing is not acceptable at this time unless there is third-party verification—the Business must require proof of a negative Test as outlined by CDPH’s guidance in the section titled “What can be used as proof of a negative pre-entry test in settings where pre-entry testing is required?” available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Updated-COVID-19-Testing-Guidance.aspx#pre-entry-testing.

Because testing and masking is not as effective as being Up-to-Date on Vaccination at preventing the spread of COVID-19, a Business may determine that the minimum requirements in this subsection are not sufficient for its operations to protect the health and safety of patrons, staff, or others.

ii. Mega-Events. Operators and hosts of indoor Mega-Events are subject to the proof of vaccination or negative Test requirements for entry by patrons and staff set forth in Section 7 below.

And operators and hosts of outdoor Mega-Events are encouraged to consider requiring patrons and staff to provide proof that they are Up-to-Date on Vaccination (including proof of a Booster if Booster-Eligible) before entering the outdoor area where the event is held.

b. Masking.

i. Mask Requirements and Allowances. Businesses and governmental entities must follow the requirements for masking listed in this Order and Appendix A to this Order and may, but are not required by this Order, allow patrons and Personnel (or staff) who are Vaccinated with a Complete Initial Series to remove masks indoors consistent with the requirements listed in Appendix A to this Order.

ii. Providing a Well-Fitted Mask. Businesses and other entities subject to this Order are encouraged to provide a Well-Fitted Mask at no cost to people (patrons and Personnel) who do not have one upon entry inside the facility.

c. Encourage Activities that Can Occur Outdoors. All Businesses and governmental entities are encouraged to remember that moving operations or activities outdoors, if it makes sense to do so under the circumstances and to the extent allowed by local law and permitting requirements, generally includes less risk of COVID-19 transmission as opposed to indoors.

d. Personnel Health Screening. Businesses and governmental entities should develop and implement a process for screening Personnel for COVID-19 symptoms, but this
requirement does not mean they must perform on-site screening of Personnel. Businesses and governmental entities should ask Personnel to evaluate their own symptoms before reporting to work. If Personnel have symptoms consistent with COVID-19, they should follow subsections 3(d) and 3(e) above. Businesses and governmental entities may be required to conduct such screenings for Personnel under Cal/OSHA’s regulations. Businesses and other entities must adhere to applicable Cal/OSHA regulations relating to COVID-19 health and safety measures in the workplace and should frequently check for updates to those regulations such as by checking online at www.dir.ca.gov/dosh/coronavirus/covid19faqs.html.

e. Businesses Must Allow Personnel to Stay Home When Sick. Businesses are required to follow Cal/OSHA regulations allowing Personnel to stay home where they have symptoms associated with COVID-19 that are new or not explained by another condition or if they have been diagnosed with COVID-19 (by a test or a clinician) even if they have no symptoms, and to not to have those Personnel return to work until they have satisfied certain conditions, all as further set forth in the Cal/OSHA rules. Also, Businesses must comply with California Senate Bill 114 (Labor Code, sections 248.6 and 248.7), which provides that employers with more than 25 employees must give every employee up to 80 hours of COVID-related sick leave retroactive to January 1, 2022 and through September 30, 2022 (pro-rated for less than full time employees), including that employees may use this paid sick leave to get vaccinated or for post-vaccination illness. Each Business is prohibited from taking any adverse action against any Personnel for staying home in any of the circumstances described in this subsection.

f. Signage. In addition to any signage otherwise required in this Order or any directives issued by the Health Officer for specific Business or other sectors, the following general signage requirement applies. All Businesses and governmental entities are required to conspicuously post signage reminding individuals of the following COVID-19 prevention best practices to reduce transmission:

- Get vaccinated and boosted;
- Stay home if sick;
- Wear a mask indoors if you are unvaccinated; and
- Clean your hands.

Sample signage is available online at https://sf.gov/outreach-toolkit-coronavirus-covid-19. Businesses or governmental entities may modify the sign described above to reflect the rules they adopt related to vaccination status, mask removal, or other restrictions, as long as those restrictions are consistent with Section 4(j) below.

g. Ventilation Guidelines. All Businesses and governmental entities with indoor operations are urged to review the Ventilation Guidelines and implement ventilation strategies for indoor operations as feasible. Nothing in this subsection limits any ventilation requirements that apply to particular settings under federal, state, or local law.
h. Mandatory Reporting by Businesses and Governmental Entities. Consistent with Cal/OSHA regulations, Businesses and governmental entities must require that all Personnel immediately alert the Business or governmental entity if they test positive for COVID-19 and were present in the workplace either (1) within 48 hours before onset of symptoms or within 10 days after onset of symptoms if they were symptomatic; or (2) within 48 hours before the date on which they were tested or within 10 days after the date on which they were tested if they were asymptomatic. If a Business or governmental entity is concerned about a workplace outbreak among Personnel, it may get additional information [www.sfcdp.org/covid19-positive-workplace](http://www.sfcdp.org/covid19-positive-workplace). Businesses and governmental entities must also comply with all case investigation and contact tracing measures directed by DPH including providing any information requested within the timeframe provided by DPH, instructing Personnel to follow isolation and quarantine protocols specified by CDPH and Cal/OSHA and any additional protocols specified by DPH, and excluding positive cases and unvaccinated close contacts from the workplace during these isolation and quarantine periods.

Schools and Programs for Children and Youth are subject to separate reporting requirements set forth in Health Officer Directive Nos. 2020-33 and 2020-14, updated as of January 4, 2022, respectively, including as those directives are further updated in the future.

i. Compliance with CDPH Vaccination Status Order’s Mask Requirements. Businesses and governmental entities with Personnel in Acute Health Care Settings, Long-Term Care Settings, High-Risk Congregate Settings, and Other Health Care Settings—as those terms are defined in the CDPH Vaccination Status Order, available online at [www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Unvaccinated-Workers-In-High-Risk-Settings.aspx](http://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Unvaccinated-Workers-In-High-Risk-Settings.aspx)—must provide appropriate face coverings as required by the CDPH Vaccination Status Order.

j. Minimum Requirements; Ability to Adopt More-Restrictive Measures. This Order establishes the minimum requirements related to COVID-19 protections. Nothing in this Order is intended to reduce any other federal, state, or local legal requirements or otherwise modify them in a way that is less protective of public health, or to limit an individual Business’ or governmental entity’s choices to take more health protective measures. Businesses or governmental entities may impose further restrictions that are more protective of public health than the minimum requirements under this Order, including requiring patrons or Personnel to be Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination, requiring them to wear a Well-Fitted Mask, or taking other more restrictive measures that are more protective of public health and meet their operational needs.

5. Schools and Programs for Children and Youth

   a. Schools. Based on the demonstrated effectiveness of measures that reduce the risk of
transmission in school settings, including the requirement for universal masking indoors, the use of rapid testing, and vaccinations for children age five and older, the Health Officer strongly believes that schools can and should remain open for in-person classes for all grades. Largely because some children are not eligible to be vaccinated against COVID-19 at this time and many children are not yet Vaccinated with a Complete Initial Series or eligible for a Booster, schools must follow the health and safety requirements set forth in Health Officer Directive No. 2020-33, including as it may be amended in the future, to ensure the safety of all students and Personnel at the school site. All children who are Booster-Eligible (including under an emergency use authorization) are strongly urged to receive a Booster as soon as possible. Also, adult Personnel in TK-12 schools, including educators, aides, administrators, and other staff, are strongly encouraged to be Up-to-Date on Vaccination.

b. Programs for Children and Youth. Largely because some children are not eligible to be vaccinated against COVID-19 at this time and many children are not yet Vaccinated with a Complete Initial Series or eligible for a Booster, the following Programs for Children and Youth must operate in compliance with the health and safety requirements set forth in Health Officer Directive No. 2020-14, including as it may be amended in the future: (1) group care facilities for children who are not yet in elementary school—including, for example, licensed childcare centers, daycares, family daycares, and preschools (including cooperative preschools); and (2) with the exception of schools, which are addressed in subsection (a) above, educational or recreational institutions or programs that provide care or supervision for school-aged children and youth—including for example, learning hubs, other programs that support and supplement distance learning in schools, school-aged childcare programs, youth sports programs, summer camps, and afterschool programs.

c. Mega-Events. Operators or hosts of indoor events held at schools or under Programs for Children and Youth that meet the definition of an indoor Mega-Event must comply with the rules for indoor Mega-Events specified in Section 7 of this Order. Operators or hosts of such outdoor events are urged to follow the rules for outdoor Mega-Events.

6. Vaccination Requirements for Personnel in High-Risk Settings and Other Health Care Personnel.

a. High-Risk Settings. Except for some Personnel as provided in subsections (a)(iii), (b), and (c) below, and for Personnel exempt under subsection (d) below, all of the following requirements apply in High-Risk Settings:

i. Businesses and governmental entities with Personnel in High-Risk Settings must:

1. As of September 30, 2021, ascertain vaccination status of all Personnel in High-Risk Settings who routinely work onsite;
2. As of September 30, 2021, ensure that before entering or working in any High-Risk Setting, all Personnel who routinely work onsite have received their first dose of a one-dose COVID-19 vaccine regimen or their second dose of a two-dose COVID-19 vaccine regimen authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization. Until such Personnel are Vaccinated with a Complete Initial Series, they are subject to at least the minimum public health and safety requirements in subsection (a)(iv) below; and

3. No later than March 1, 2022, ensure that all such Personnel who routinely work onsite, within 15 days of being Booster-Eligible, receive a Booster. And for the period between when such Personnel are Booster-Eligible but have not yet received one and when they become Up-to-Date on Vaccination (meaning one week after receipt of a Booster), the operator of the High-Risk Setting must ensure that each such person comply with the public health and safety requirements in subsection (a)(iv) below regarding testing even though they have already received their full initial course of vaccination. For clarity, those who are Booster-Eligible on or before February 14, 2022 must have received their Booster by March 1, 2022, and those who are Booster-Eligible after February 14, 2022 must receive it within 15 days after they become eligible.

ii. As of September 30, 2021, Personnel who routinely work onsite in High-Risk Settings must have received their first dose of a one-dose COVID-19 vaccine regimen or their second dose of a two-dose COVID-19 vaccine regimen authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization. Until such Personnel are Vaccinated with a Complete Initial Series, they are subject to at least the minimum public health and safety requirements in subsection (a)(iv) below. Beginning on March 1, 2022, Personnel who routinely work onsite in High-Risk Settings must, within 15 days of being Booster-Eligible, receive a Booster. For clarity, those who are Booster-Eligible on or before February 14, 2022 must have received their Booster by March 1, 2022, and those who are Booster-Eligible after February 14, 2022 must receive it within 15 days after they become eligible.

iii. For purposes of this Order, Personnel who are not permanently stationed or regularly assigned to a High-Risk Setting but who in the course of their duties may enter or work in High-Risk Settings even on an intermittent or occasional basis or for short periods of time are considered to routinely work onsite in High-Risk Settings. Businesses and governmental entities with such Personnel are required to (1) ascertain vaccination status of all such Personnel and (2) ensure that before entering or working in any High-Risk Setting, all such Personnel are Vaccinated with a Complete Initial Series with any vaccine authorized to prevent COVID-19 by the FDA, including by way of an
emergency use authorization, or by the World Health Organization, unless exempt under subsection (d) below. Additionally, as of September 29, 2021, all such Personnel must have received their first dose of a one-dose COVID-19 vaccine regimen or their second dose of a two-dose COVID-19 vaccine regimen authorized to prevent COVID-19 by the FDA, including by way of an emergency use authorization, or by the World Health Organization. Until such Personnel are Vaccinated with a Complete Initial Series, they are subject to at least the minimum public health and safety requirements in subsection (a)(iv) below. And no later than March 1, 2022, Personnel who are not permanently stationed or regularly assigned to a High-Risk Setting but who in the course of their duties may enter or work in High-Risk Settings even on an intermittent or occasional basis or for short periods of time—including for example, but not limited to, paramedics, emergency medical technicians, police officers and other law enforcement, and attorneys who enter jail settings or other High-Risk Settings as part of their work—must, within 15 days of being Booster-Eligible, receive a Booster. For clarity, those who are Booster-Eligible on or before February 14, 2022 must have received their Booster by March 1, 2022, and those who are Booster-Eligible after February 14, 2022 must receive it within 15 days after they become eligible.

For purposes only of this subsection (iii), Businesses and governmental entities that have Personnel who are not permanently stationed or regularly assigned to a High-Risk Setting but who in the course of their duties may enter or work in High-Risk Settings even on an intermittent or occasional basis or for short periods of time as provided above, may qualify for a temporary extension beyond the March 1, 2022 deadline for such Personnel to receive a Booster, until no later than April 15, 2022, if they meet both of the following criteria: (1) they determine that there is a critical staffing shortage (determined in writing by the chief executive officer or department head); and (2) they ensure that only such Personnel who are Vaccinated with a Complete Initial Series, are free of any COVID-19 symptom, who wear a Well-Fitted Mask, and who have a negative Test in the manner required by subsection (iv)(1) below may continue to work in the High-Risk Setting.

iv. All Businesses and governmental entities subject to this Section 6 must require any Personnel who are exempt or who are otherwise not Up-to-Date on Vaccination (for clarity, the reference to these Personnel means any person who is Booster-Eligible for but not yet received a Booster or who has received a Booster for the seven days after receipt of the Booster before becoming Up-to-Date on Vaccination) to comply with at least the following public health and safety measures:

1. get Tested for COVID-19 at least once a week—and at least twice a week for Personnel who are in general acute care hospitals, skilled nursing facilities, intermediate care facilities, and jails—using either a nucleic acid (including polymerase chain reaction (PCR)) or antigen test; and
2. at all times at the worksite in the High-Risk Setting wear a face covering in compliance with the State Public Health Officer Order of July 26, 2021 (“CDPH Vaccination Status Order”), available at https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Unvaccinated-Workers-In-High-Risk-Settings.aspx.

Because of the COVID-19 risks to any exempt Personnel who are not Up-to-Date on Vaccination, the High-Risk Setting must provide such Personnel, on request, with a well-fitting non-vented N95 respirator and strongly encourage such Personnel to wear that respirator at all times when working with patients, residents, clients, or incarcerated people.

Regular testing and masking as required under this Section 6 are not as protective of public health as being Up-to-Date on Vaccination in helping prevent transmission of COVID-19; accordingly, those measures are a minimum safety requirement for exempt Personnel in High-Risk Settings. Businesses and governmental entities subject to this Section 6 may require additional safety measures for such Personnel. For example, factors a Business or governmental entity may consider in determining appropriate safety measures for exempt Personnel include, but are not limited to:

a) Whether the Personnel will place other people at risk of transmission of COVID-19 because they are required to come into contact (including on an emergency basis) with other Personnel or with persons whose vaccination status is unknown, who are not yet eligible for the vaccine, or who are members of a vulnerable population (e.g., the elderly, incarcerated people, and acute care patients);

b) The type and frequency of testing available to the Personnel and whether the Business or governmental entity has the ability to provide testing to Personnel, without relying on public health resources, and track the requisite testing;

c) Whether the Business or governmental entity can ensure compliance with the mask mandate whenever the Personnel are around other people in the workplace; and

d) Whether the proposed accommodation imposes an undue burden because it is costly, infringes on other Personnel’s job rights or benefits, compromises workplace safety, decreases workplace efficiency, or requires other Personnel to do more than their share of potentially hazardous or burdensome work.

Nothing under the Order limits the ability of a Business or governmental entity under applicable law to determine whether they are unable to offer a
ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

reasonable accommodation to unvaccinated Personnel with an approved exemption and to exclude such exempt Personnel from a High-Risk Setting.

v. All Businesses and governmental entities subject to this Section 6 must, consistent with applicable privacy laws and regulations, maintain records of employee vaccination or exemption status.

vi. All Businesses and governmental entities subject to this Section 6 must provide these records to the Health Officer or other public health authorities promptly upon request, and in any event no later than the next business day after receiving the request.

vii. This mandated vaccination schedule allows Businesses, governmental entities, and affected Personnel adequate time to comply with this Order. In the interest of protecting residents of High-Risk Settings, Personnel, and their families, Businesses, governmental entities, and affected Personnel are strongly urged to meet these vaccination requirements as soon as possible.

For clarity, this requirement applies to Personnel in other buildings in a site containing a High-Risk Setting, such as a campus or other similar grouping of related buildings, where such Personnel do any of the following: (i) access the acute care or patient, resident, client, or incarcerated person areas of the High-Risk Setting; or (ii) work in-person with patients, residents, clients, or incarcerated people who visit those areas. All people in San Francisco who work in a clinical setting with a population that is more vulnerable to COVID-19 are strongly urged to be Up-to-Date on Vaccination, including receiving a Booster as soon as Booster-Eligible.

If a person covered by the requirements of this Section 6 to be Up-to-Date on Vaccination recently had COVID-19 when that person would otherwise have been Booster-Eligible based on the period since becoming Vaccinated with a Complete Initial Series, then that person should try to obtain the Booster as soon as possible at least 10 days after recovering and ending isolation. But to continue working in the High-Risk Setting that person does not need to receive the Booster until 30 days after recovering from infection and discontinuing isolation, unless a healthcare provider recommends in a note that the Booster be delayed for a longer specified period.

b. CDPH Requirements For Adult Care Facilities, Direct Care Workers, Other Health Care Workers, and Pharmacists. Businesses and governmental entities with Personnel in certain types of facilities and contexts, including those that provide health care, certain other care services, services in congregate settings, and the Personnel who work in those settings must comply with the following CDPH Orders and All Facilities Letters, including as they are updated in the future, which require Personnel of such Businesses and governmental entities to be Up-to-Date on Vaccination, including receipt of a Booster when Booster-Eligible, unless exempt under those Orders and All Facilities Letters by the deadlines listed in each order or
ORDER OF THE HEALTH OFFICER No. C19-07y (updated)

letter:

“Adult Care Facilities and Direct Care Worker Vaccine Requirement”, updated January 25, 2022, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Adult-Care-Facilities-and-Direct-Care-Worker-Vaccine-Requirement.aspx

“Health Care Worker Vaccine Requirement”, updated January 25, 2022, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Health-Care-Worker-Vaccine-Requirement.aspx

c. Dental Offices. Personnel who provide healthcare in dental offices are considered to provide care in “Clinics & Doctor Offices (including behavioral health, surgical)” under the following CDPH order and must comply with the requirements in that order: “Health Care Worker Vaccine Requirement”, updated January 25, 2022, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Order-of-the-State-Public-Health-Officer-Health-Care-Worker-Vaccine-Requirement.aspx.

d. Limited Exemptions. Personnel covered by this Section 6 may be exempt from the vaccination requirements under this section only upon providing the requesting Business or governmental entity a declination form stating either of the following: (1) the individual is declining vaccination based on Religious Beliefs or (2) the individual is excused from receiving any COVID-19 vaccine due to Qualifying Medical Reasons. A sample ascertainment and declination form is available online at www.sfdph.org/dph/covid-19/files/declination.pdf. As to declinations for Qualifying Medical Reasons, to be eligible for this exemption Personnel must also provide to their employer or the Business a written statement signed by a physician, nurse practitioner, or other licensed medical professional practicing under the license of a physician stating that the individual qualifies for the exemption (but the statement should not describe the underlying medical condition or disability) and indicating the probable duration of the individual’s inability to receive the vaccine (or if the
duration is unknown or permanent, so indicate). As to declinations based on Religious Beliefs, a Business or governmental entity may seek additional information as allowed or required by applicable law to determine whether Personnel have a qualifying Religious Belief. Personnel who qualify for and are granted by the employing Business or governmental entity an exemption due to Religious Beliefs or Qualifying Medical Reasons, as provided above, must still follow at least the minimum health and safety requirements in subsection (a)(iv), above. Nothing in this Order is intended to limit any Business’s or governmental entity’s ability under applicable law to determine whether they are able to offer a reasonable accommodation to Personnel with an approved exemption. Because testing and masking is not as effective as being Up-to-Date on Vaccination at preventing the spread of COVID-19, a Business may determine that the minimum requirements in subsection (a)(iv) above are not sufficient to protect the health and safety of people in High-Risk Settings.

e. **Record Keeping Requirements.** Businesses or governmental entities subject to this Section 6 must maintain records with following information:

i. For Personnel who are Vaccinated with a Complete Initial Series, and also for Personnel where being Up-to-Date on Vaccination is required by this Order: (1) full name and date of birth; (2) vaccine manufacturer; and (3) date of vaccine administration (for first dose and, if applicable, all subsequent doses required by this Order). Nothing in this subsection is intended to prevent an employer from requesting additional information or documentation to verify vaccination status, to the extent permissible under the law.

ii. For unvaccinated Personnel: signed declination forms with written health care provider’s statement where applicable, as described in subsection (d) above.

f. **Compliance with CDPH Orders.** In addition to the requirements set forth above:

i. Until any more health protective requirements in this section take effect, Businesses and governmental entities with Personnel in High-Risk Settings must comply with the requirements of the CDPH Vaccination Status Order; and

ii. Businesses and governmental entities with Personnel in adult care facilities and Other Health Care Settings—as that term is defined in the CDPH Vaccination Status Order—must be in full compliance with the requirements of the CDPH Vaccination Status Order.

iii. Businesses and governmental entities with Personnel who provide services or work in facilities covered by the State Public Health Officer Order of August 5, 2021, updated on December 22, 2021 and January 25, 2022 (titled “Health Care Worker Vaccine Requirement”), must comply with the requirements of that order, including as that order may be amended in the
g. **Cooperation with Public Health Authorities.** Businesses or governmental entities with Personnel subject to this Section 6 must cooperate with Health Officer or DPH requests for records, documents, or other information regarding the Business or governmental entity’s implementation of these vaccination requirements. This cooperation includes, but is not limited to, identifying all jobs or positions within the organization and describing: (1) whether a given job or position is subject to the vaccination requirements of this Section 6, (2) how the Business or governmental entity determined a job or position is subject to vaccination requirements of this Section 6, and (3) how the Business or governmental entity is ensuring full compliance with the vaccination requirements set forth in this Section 6. Complete responses to these requests must be provided to the Health Officer or DPH promptly upon request, and in any event within three business days after receiving the request.

h. **Chart.** For convenience of reference, a chart summarizing which settings and Personnel are subject to which state and local vaccination requirements is available at [https://www.sfdph.org/dph/alerts/files/C19-07-State-and-Local-Mandates-Chart.pdf](https://www.sfdph.org/dph/alerts/files/C19-07-State-and-Local-Mandates-Chart.pdf).

7. **Mega-Events.**

a. **Compliance with State’s Post-Blueprint Guidance.** All Businesses, governmental entities, and other organizations hosting Mega-Events, including when held at schools or under Programs for Children and Youth as provided in Section 5 above, must comply with the requirements in the State’s Post-Blueprint Guidance for indoor Mega-Events, available online at [www.cdpd.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Beyond-Blueprint-Framework.aspx](https://www.cdpd.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Beyond-Blueprint-Framework.aspx), and are strongly urged to follow the recommendations in the State’s Post-Blueprint Guidance for outdoor Mega-Events.

b. **Vaccine Verification or Negative Test Requirements.**

i. **Patron Vaccination or Testing Pre-Entry Requirements.** Operators or hosts of indoor Mega-Events must require all patrons to show proof, before entering the facility, of either a) being Up-to-Date on Vaccination, including for patrons age 12 and up receipt of a Booster as soon as they are Booster-Eligible, or b) having had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. For multi-day indoor Mega-Events, patrons are not required to be Tested more than twice each week so long as each Test is done at least three days apart. For patrons aged 12 to 15, operators or hosts of indoor Mega-Events are urged to enforce the mandate to show proof of a Booster as part of being Up-to-Date on Vaccination as soon as possible and are required to do so beginning March 1, 2022 unless the patron aged 12 to 15 shows proof of having had a negative
COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. Patrons age five to 11 (or their parents or guardians) must show for each such child either proof of being Vaccinated with a Complete Initial Series or a negative COVID-19 test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility. Patrons age two to four (or their parents or guardians) must show for each such child proof of a negative COVID-19 test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility.

Operators or hosts of indoor Mega-Events may not accept a written self-attestation as proof of being Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination. For proof of a Test, self-administered antigen testing is not acceptable at this time unless there is third-party verification—the Business must require proof of a negative Test as outlined by CDPH’s guidance in the section titled “What can be used as proof of a negative pre-entry test in settings where pre-entry testing is required?”, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Updated-COVID-19-Testing-Guidance.aspx#pre-entry-testing. And consistent with State rules, operators or hosts of indoor Mega-Events are required to cross check proof of being Vaccinated with a Complete Initial Series or proof of negative COVID-19 test, as provided below, for each patron age 18 and up against a photo identification, unless photo identification is integrated into the digital COVID-19 vaccine record. Under no circumstance—including in response to a claim by a patron of an exemption of any kind—is the operator or host of an indoor Mega-Event allowed to admit a patron (except children under age two) who has not shown, as listed in this subsection, proof of either being Vaccinated with a Complete Initial Series or of a negative Test.

Staff Vaccination or Testing Pre-Entry Requirements. Operators or hosts of indoor Mega-Events must require all staff to show proof, before entering the facility, of either (1) being Up-to-Date on Vaccination, including receipt of a Booster within 15 days of their being Booster-Eligible or (2) having a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility (but staff is not required to be Tested more than twice each week so long as each Test is done at least three days apart). Staff can work at the Mega-Event so long as they get the Booster by the 15th day of being Booster-Eligible. These requirements for staff are subject to any applicable requirements for federal, state, or local laws requiring accommodation. Unvaccinated Staff must wear a Well-Fitted Mask at all times except while actively performing or playing or as otherwise allowed to remove the mask by Appendix A of this Order.

If a staff member covered by the requirements of this Section 7 to be Up-to-Date on Vaccination (in lieu of testing and masking for those who with a qualified exemption) recently had COVID-19 when that person would otherwise have been Booster-Eligible based on the period since becoming
Vaccinated with a Complete Initial Series, then that person should try to obtain the Booster as soon as possible at least 10 days after recovering and ending isolation. But to continue working in the indoor Mega-Event setting that person does not need to receive the Booster until 30 days after recovering from infection and discontinuing isolation, unless a healthcare provider recommends in a note that the Booster be delayed for a longer specified period.

For clarity, “staff” as used in this Section 7 does not include all individuals included in the broader term “Personnel.” Individuals who enter or work in a Mega-Event facility for short periods of time (e.g., individuals who deliver goods or packages) are not covered by the requirements in this Section, but anyone who is present for a single event or who provides setup or post-event services onsite for even part of a day is considered staff and is covered by this Section.

iii. Masking Requirements Indoors.

a. Mask Requirements and Allowances. Operators or hosts of indoor Mega-Events must follow the requirements for masking listed in this Order and Appendix A to this Order and may, but are not required by this Order, allow patrons and Personnel (or staff) who are Vaccinated with a Complete Initial Series to remove masks indoors consistent with the requirements listed in Appendix A to this Order.

b. Providing a Well-Fitted Mask. Operators or hosts of indoor Mega-Events are encouraged to provide a Well-Fitted Mask at no cost to people (patrons and Personnel (or staff)) who do not have one upon entry inside the facility.

c. Recommendations for Outdoor Events. All Businesses, governmental entities, and other organizations hosting outdoor Mega-Events, including when held at schools or under Programs for Children and Youth as provided in Section 5 above, are encouraged to consider requiring all patrons age 12 and up to show proof, before entering the event, that they are Up-to-Date on Vaccination (including having received a Booster as soon as they are Booster-Eligible) or have a negative Test, subject to any applicable requirements of federal, state, or local laws requiring accommodation, and to follow the recommendations in the State’s Post-Blueprint Guidance for outdoor Mega-Events.

8. COVID-19 Health Indicators. The City will continue to make publicly available on its website updated data on COVID-19 case rates, hospitalizations and vaccination rates.
That information can be found online at https://sf.gov/resource/2021/covid-19-data-and-reports. The Health Officer will monitor this data, along with other data and scientific evidence, in determining whether to modify or rescind this Order, as further described in Section 2(a) above.

9. Incorporation of State and Local Emergency Proclamations and Federal and State Health Orders. The Health Officer is issuing this Order in accordance with, and incorporates by reference, the emergency proclamations and other federal, state, and local orders and other pandemic-related orders described below in this Section. But this Order also functions independent of those emergency proclamations and other actions, and if any State, federal, or local emergency declaration, or any State or federal order or other guidance, is repealed, this Order remains in full effect in accordance with its terms (subject to Section 13 below).

a. State and Local Emergency Proclamations. This Order is issued in accordance with, and incorporates by reference, the March 4, 2020 Proclamation of a State of Emergency issued by the Governor, the February 25, 2020 Proclamation by the Mayor Declaring the Existence of a Local Emergency, and the March 6, 2020 Declaration of Local Health Emergency Regarding Novel Coronavirus 2019 (COVID-19) issued by the Health Officer, as each of them have been and may be modified, extended, or supplemented.

b. State Health Orders. This Order is also issued in light of the various orders, directives, rules, and regulations of the State, including, but not limited to, those of the State’s Public Health Officer and Cal/OSHA. The State has expressly acknowledged that local health officers have authority to establish and implement public health measures within their respective jurisdictions that are more restrictive than those implemented by the State Public Health Officer.

c. Federal Orders. This Order is further issued in light of federal emergency declarations and orders, including, but not limited to, the January 20, 2021 Executive Order on Protecting the Federal Workforce and Requiring Mask-Wearing, which requires all individuals in Federal buildings and on Federal land to wear masks, maintain physical distance, and adhere to other public health measures, and the February 2, 2021 Order of the CDC, which requires use of masks on public transportation, as each of them may have been and may be modified, extended or supplemented.

10. Obligation to Follow Stricter Requirements of Orders.

Based on local health conditions, this Order includes a limited number of health and safety restrictions that are more stringent than those contained under State orders. Where a conflict exists between this Order and any state or federal public health order related to the COVID-19 pandemic, the most restrictive provision (i.e., the more protective of public health) controls. Consistent with California Health and Safety Code section 131080 and the Health Officer Practice Guide for Communicable Disease Control in California, except where the State Health Officer may issue an order expressly directed
at this Order and based on a finding that a provision of this Order constitutes a menace to public health, any more restrictive measures in this Order continue to apply and control in this County.

11. **Obligation to Follow Health Officer Orders and Directives and Mandatory State Guidance.**

   In addition to complying with all provisions of this Order, all individuals and entities, including all Businesses and governmental entities, must also follow any applicable orders and directives issued by the Health Officer (available online at [www.sfdph.org/healthorders](http://www.sfdph.org/healthorders) and [www.sfdph.org/directives](http://www.sfdph.org/directives)) and any applicable mandatory guidance issued by the State Health Officer or California Department of Public Health. To the extent that provisions in the orders or directives of the Health Officer and the mandatory guidance of the State conflict, the more restrictive provisions (i.e., the more protective of public health) apply. In the event of a conflict between provisions of any previously-issued Health Officer order or directive and this Order, this Order controls over the conflicting provisions of the other Health Officer order or directive.

12. **Enforcement.**

   Under Government Code sections 26602 and 41601 and Health and Safety Code section 101029, the Health Officer requests that the Sheriff and the Chief of Police in the County ensure compliance with and enforce this Order. The violation of any provision of this Order (including, without limitation, any health directives) constitutes an imminent threat and immediate menace to public health, constitutes a public nuisance, and is punishable by fine, imprisonment, or both. DPH is authorized to respond to such public nuisances by issuing Notice(s) of Violation and ordering premises vacated and closed until the owner, tenant, or manager submits a written plan to eliminate all violations and DPH finds that plan satisfactory. Such Notice(s) of Violation and orders to vacate and close may be issued based on a written report made by any City employees writing the report within the scope of their duty. DPH must give notice of such orders to vacate and close to the Chief of Police or the Chief’s designee to be executed and enforced by officers in the same manner as provided by San Francisco Health Code section 597. As a condition of allowing a Business to reopen, DPH may impose additional restrictions and requirements on the Business as DPH deems appropriate to reduce transmission risks, beyond those required by this Order and other applicable health orders and directives.

13. **Effective Date.**

   This Order is effective at 12:01 a.m. on June 15, 2021 and will continue, as updated, to be in effect until the Health Officer rescinds, supersedes, or amends it in writing. The changes made in the February 14, 2022 update are effective at 12:01 a.m. on February 16, 2022. For clarity, the January 26, 2022 update remains in effect until 12:01 a.m. on February 16, 2022.
14. Relation to Other Orders of the San Francisco Health Officer.

At 12:01 a.m. on February 16, 2022, this Order revises and entirely replaces the prior update to Health Officer Order No. C19-07y (issued January 26, 2022). Leading up to and in connection with the effective date of this Order, the Health Officer has rescinded a number of other orders and directives relating to COVID-19, including those listed in the Health Officer’s Omnibus Rescission of Health Officer Orders and Directives, dated June 11, 2021. On and after the effective date of this Order, the following orders and directives of the Health Officer shall continue in full force and effect: Order Nos. C19-16 (hospital patient data sharing), C19-18 (vaccine data reporting), C19-19 (minor consent to vaccination), and C19-20 (test collection sites); and the directives that this Order references in Sections 3 and 5, as the Health Officer may separately amend or later terminate any of them. Health Officer Order No. C19-15 was also reinstated on August 19, 2021, and remains in effect as outlined in that order (including as it is amended in the future). Also, this Order also does not alter the end date of any other Health Officer order or directive having its own end date or that continues indefinitely.

15. Copies.

The County must promptly provide copies of this Order as follows: (1) by posting on the DPH website (www.sfdph.org/healthorders); (2) by posting at City Hall, located at 1 Dr. Carlton B. Goodlett Pl., San Francisco, CA 94102; and (3) by providing to any member of the public requesting a copy.

If a court holds any provision of this Order or its application to any person or circumstance to be invalid, then the remainder of the Order, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this Order are severable.

IT IS SO ORDERED:

Susan Philip, MD, MPH, Health Officer of the City and County of San Francisco

Dated: February 14, 2022

Attachments:
- Appendix A – Face Covering Requirements (last updated February 14, 2022)
- Appendix B – Proof of Vaccination Requirements (last updated February 14, 2022)
1. **General Requirement to Wear a Well-Fitted Mask.**

People who are Vaccinated with a Complete Initial Series or are even Up-to-Date on Vaccination (meaning they have completed their initial course of vaccination and have received a Booster once eligible for a Booster, as further defined in Section 1 of the body of the Order), are recommended, for the time being, to continue to wear a Well-Fitted Mask in indoor public settings where they are not otherwise required to do so, subject to the exemptions and allowances in Sections 4 through 8, below. But anyone who is Unvaccinated is required for the time being to wear a Well-Fitted Mask in indoor public setting at all times, except as provided in Sections 4 through 7, below. Additional Face Covering Requirements may be imposed elsewhere in this Order or by state or federal rules or regulations.

Also, everyone is required to wear a Well-Fitted Mask, regardless of vaccination status, in the following indoor settings: public transit; TK-12 schools and childcare; High-Risk Settings (as defined in Section 1(p) of the Order); health care and other long-term care facilities where masking is required by regulatory orders and rules; and anywhere else that federal or state health orders require doing so, as described in Section 3(b)(i) of the Order and this Appendix.

Employees may be subject to additional restrictions or be required to provide additional documentation under state or federal laws and regulations, including Cal/OSHA’s regulations. Businesses and other entities must adhere to applicable Cal/OSHA regulations relating to COVID-19 health and safety measures in the workplace and should frequently check for updates to those regulations such as by checking online at www.dir.ca.gov/dosh/coronavirus/covid19faqs.html.

And as provided in Section 10 below, individual Businesses, governmental entities, or venue operators or hosts may impose requirements regarding masking, in addition to those in this Order, that are more protective of public health.

2. **Ventilation.**

Businesses and operators of other public and private facilities where people are allowed to remove their Well-Fitted Masks indoors are encouraged to allow people to remove their Well-Fitted Masks only if they use at least one of the following ventilation strategies: (1) all available windows and doors accessible to fresh outdoor air are kept open as long as air quality and weather conditions permit; (2) fully operational HVAC system; or (3) appropriately sized portable air cleaners in each room. For clarity, if windows and doors are closed due to air quality or weather conditions, then a Business or operator of a public or private facility should whenever feasible follow at least one of remaining ventilation strategies before allowing people to remove their Well-Fitted Masks under this Order.
3. **Proof of Vaccination.**

Businesses, governmental entities, and other venue operators or hosts are encouraged to require people to provide proof that they are Vaccinated with a Complete Initial Series or are Up-to-Date on Vaccination (including receipt of a Booster once Booster-Eligible) before allowing people to remove their Well-Fitted Mask (to the extent they are allowed to do so in Sections 5 through 8, below). For clarity, even if a Business or other entity does verify that people are Vaccinated with a Complete Initial Series, people who are Unvaccinated still must wear a Well-Fitted Mask unless otherwise exempted under this Order. And as provided in the Order, each Business, governmental entity, and other entity that is required to confirm proof of being Vaccinated with the Complete Initial Series is strongly urged to implement measures as soon as possible to require its patrons and staff (as distinct from Personnel) to be Up-to-Date on Vaccination, including requiring them to show proof of receipt of a Booster once they are eligible.

Except as required by more stringent masking requirements imposed elsewhere in this Order or Appendix, in indoor settings where people who are Vaccinated with a Complete Initial Series are allowed to remove their Well-Fitted Masks, Businesses, governmental entities, and other venue operators or hosts may confirm the vaccination status of patrons (including, without limitation, guests, attendees, and other visitors) in any of the following ways:

a. **Self-attestation,** by providing information to all patrons regarding vaccination requirements, such as by posting signs at public entrances and at appropriate locations inside the facility, and allowing vaccinated individuals to self-attest that they are in compliance before entry;

b. **Verification,** by confirming proof of vaccination status using the methods listed in the definition of “Vaccinated with a Complete Initial Series” in Section 1(n) of the Order (e.g., checking the CDC vaccination card, a personal digital vaccination record issued by the State or other jurisdiction or entity, or documentation from a healthcare provider); or

c. **Imposing another, more restrictive option,** that meets their operational needs.

In the alternative, Businesses, governmental entities, and other venue operators or hosts may require all patrons to wear a Well-Fitted Mask. And no person can be prevented from wearing a Well-Fitted Mask as a condition of participation in an activity or entry into a Business.

4. **Status-Based Exemptions.**

a. **Medical or Safety Exemption.** A person does not need to wear a Well-Fitted Mask when they can show: (1) a medical professional has provided a written exemption to the Face
Covering Requirement, based on the person’s medical condition, other health concern, or disability; or (2) that they are hearing impaired, or communicating with a person who is hearing impaired, where the ability to see the mouth is essential for communication; or (3) wearing a Well-Fitted Mask while working would create a risk to the person related to their work as determined by local, state, or federal regulators or workplace safety guidelines. In accordance with CDPH and CDC guidelines, if a person is required by this Order to wear a Well-Fitted Mask but is exempt from wearing one under this paragraph, they still must wear an alternative face covering, such as a face shield with a drape on the bottom edge, unless they can show either: (1) a medical professional has provided a written exemption to this alternative face covering requirement, based on the person’s medical condition, other health concern, or disability; or (2) wearing an alternative face covering while working would create a risk to the person related to their work as determined by local, state, or federal regulators or workplace safety guidelines.

A Well-Fitted Mask should also not be used by anyone who has trouble breathing or is unconscious, incapacitated, or otherwise unable to remove the Well-Fitted Mask without assistance.

b. Children. In accordance with CDPH and CDC guidelines, any child younger than two years old must not wear a Well-Fitted Mask because of the risk of suffocation. When required to do so by this Order, Children age two to nine years must wear Well-Fitted Masks to the greatest extent feasible. Children age two to nine years may wear an alternative face covering (as that term is described in Section 4(a), above) if their parent or caregiver determines it will improve the child’s ability to comply with this Order. Children age two to nine and their accompanying parents or caregivers should not be refused any essential service based on a child’s inability to wear a Well-Fitted Mask (for example, if a four-year old child refuses to keep a Well-Fitted Mask on in a grocery store), but the parent or caregiver should when possible take reasonable steps to have the child, when required to do so by this Order, wear a Well-Fitted Mask to protect others and minimize instances when children without Well-Fitted Masks are brought into settings with other people. Parents and caregivers of children age two to nine years must supervise the use of Well-Fitted Masks to ensure safety and avoid misuse. Children must wear face coverings in schools as required under State health rules.

c. Personal Protective Equipment. A person required by this Order to wear a Well-Fitted Mask does not need to do so when wearing personal protective equipment (“PPE”) that is more protective than a Well-Fitted Mask, including when required by (i) any workplace policy or (ii) any local, state, or federal law, regulation, or other mandatory guidance. When a person is not required to wear such PPE and in an indoor public setting, they must wear a Well-Fitted Mask or PPE that is more protective unless otherwise exempted under this Order.

d. People who are Vaccinated with a Complete Initial Series. Anyone who is Vaccinated with a Complete Initial Series may be allowed by the Business, governmental entity, or
other venue operator or host to remove their Well-Fitted Mask as provided in this Appendix and subject to the vaccination status verification methods listed in Section 3 above.

5. **Activity- and Location-Based Exemptions.**

The activity- and location-based exemptions in this Section apply to Unvaccinated people and also to everyone in the designated settings where this Order requires everyone, regardless of vaccination status, to wear a Well-Fitted Mask. To the extent allowed by state or federal rules requiring face coverings, and subject to any additional health restrictions a particular Business, governmental entity, or other venue operator or host may impose for a facility or other setting it owns, operates, or controls, people who are Unvaccinated—or everyone, regardless of vaccination status, in settings where this Order requires everyone to wear a Well-Fitted Mask—are not required to wear a Well-Fitted Mask in any of the following situations:

a. **Indoor Public Setting While Alone or With a Member of Household.** An Unvaccinated person does not need to wear a Well-Fitted Mask when they are alone or with a member of their Household in a public building or completely enclosed space such as an office, and people who are not part of their Household are not likely to be in the same space. If someone who is not part of a person’s Household enters the enclosed space, both people must wear a Well-Fitted Mask for the duration of the interaction unless otherwise exempt under Sections 4 and 5 of this Appendix. For clarity, Unvaccinated people must wear Well-Fitted Masks whenever they are in semi-enclosed spaces such as cubicles and common areas for shared living settings, such as hotels, shared rentals with multiple Households, dormitories, fire stations, lobbies, and elevators. A Well-Fitted Mask must be worn if the person is in an indoor public space where others who are not part of their Household routinely are present unless otherwise exempt under Sections 4 and 5 of this Appendix.

b. **Active Eating and Drinking.** People may remove their Well-Fitted Mask while actively eating or drinking. For clarity, Well-Fitted Masks may be removed while actively eating or drinking in both indoor dining and indoor settings other than indoor dining where patrons may eat or drink, such as live performances and movies.

c. **Motor Vehicles.** An Unvaccinated person does not need to wear a Well-Fitted Mask when in a personal motor vehicle and i) either alone or exclusively with other members of the same Household or ii) the person is otherwise exempt from wearing a Well-Fitted Mask under Sections 4 and 5 of this Appendix. But a Well-Fitted Mask is required when alone in the vehicle if the vehicle is used as a taxi or for any private car service or ride-sharing vehicle. Persons sharing a personal motor vehicle with people outside of the same Household are strongly encouraged to roll down the vehicle’s windows for ventilation.
This Personnel motor vehicle exemption does not apply to use of any mode of public transit, taxis, limousines, or shared transportation networks.

d. **Showering, Personal Hygiene, or Sleeping.** People may remove their Well-Fitted Mask only while showering or actively engaging in personal hygiene that requires removal of the Well-Fitted Mask, including at a gym, fitness center, or other facility. People may remove their Well-Fitted Mask while sleeping in indoor public settings.

e. **Live or Recorded Performance and Professional Sports.** Unvaccinated Performers at indoor live or recorded settings or events such as concerts, live music, film, television, recording studios, theater, opera, symphony, and professional sports may remove their Well-Fitted Masks while actively performing or practicing. Performers are strongly urged to be Up-to-Date on Vaccination or regularly tested, and are encouraged to wear a Well-Fitted Mask. Unvaccinated patrons and Personnel must remain masked while attending or working at the performance except when another exemption applies.

f. **Religious Gatherings.** Unvaccinated service leaders of indoor public religious gatherings, including by way of example but not limitation, choirs, may remove their Well-Fitted Mask while actively performing religious services. Service leaders are strongly urged to be Up-to-Date on Vaccination or regularly tested, and are encouraged to wear a Well-Fitted Mask to the greatest extent possible. Unvaccinated Participants in indoor religious gatherings may remove their Well-Fitted Masks to participate in religious rituals.

g. **Personal Services.** Unvaccinated patrons of personal services such as facials, beard trims, facial piercing and tattoos, and facial massages may remove their Well-Fitted Mask i) if otherwise exempt under Sections 4 and 5 of this Appendix or ii) only while actively receiving a service or treatment that requires temporary removal of the Well-Fitted Mask. Where providing services and either the provider or the patron is Unvaccinated, and where they cannot maintain at least six feet of distance, providers of personal services must wear a N-95 mask, respirator, or procedural/surgical mask while administering the service.

h. **Recreational Sports.** Except as otherwise exempt under Sections 4 and 5 of this Appendix, Unvaccinated participants in indoor recreational sports, gyms, and yoga studios may not remove their Well-Fitted Masks except while actively engaged in water-based sports (i.e., swimming, swim lessons, diving, and water polo) and other sports where masks create imminent risk to health (e.g., wrestling and judo).

i. **Indoor Classes, Lectures, and Other Similar Gatherings.** Unvaccinated lecturers and other instructors in indoor classes and speakers at gatherings in other indoor settings outside Residences (each a “speaker”) may remove their Well-Fitted Masks while actively speaking. Speakers are strongly urged to be Up-to-Date on Vaccination (including receiving a Booster as soon as eligible) and recently Tested and to wear their Well-Fitted Masks to the greatest extent possible. Unvaccinated participants must remain
masked while attending the event and Unvaccinated Personnel must remain masked while working at the event, except when the person is otherwise not required to wear a Well-Fitted Mask under Sections 4 through 7 of this Appendix.

j. Smoking or Vaping Activities. To the extent that the County issues a permit for a Business to operate a facility in which people are allowed to smoke or vape (such as cannabis consumption sites, cigar rooms, and facilities allowing smoking steaming stones or non-plant-based products for hookah), a patron is allowed to remove a Well-Fitted Mask i) if the patron is Vaccinated with a Complete Initial Series, ii) when another exemption or allowance under this Order expressly applies, or iii) for Unvaccinated patrons, only while actively smoking or vaping if the patron has provided proof of having had a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility (but people are not required to be Tested more than twice each week so long as each Test is done at least three days apart). For proof of a Test, self-administered antigen testing is not acceptable at this time unless there is third-party verification—the Business must require proof of a negative Test as outlined by CDPH’s guidance in the section titled “What can be used as proof of a negative pre-entry test in settings where pre-entry testing is required?” available online at www.edp.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Updated-COVID-19-Testing-Guidance.aspx#pre-entry-testing.

6. Indoor Mega-Events.

Separate from the requirements in Section 7 of the Order regarding proof that patrons or staff are Up-to-Date on Vaccination or have a negative Test before they may enter an indoor Mega-Event, operators and hosts of indoor Mega-Events may, but are not required to, adopt rules allowing patrons who are Vaccinated with a Complete Initial Series to remove their Well-Fitted Masks as outlined in this Section. Once inside an indoor Mega-Event, any patron who is vaccinated (whether Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination, including receipt of a Booster once Booster-Eligible) may be allowed to remove their Well-Fitted Masks. Patrons who are Unvaccinated must keep their Well-Fitted Masks on except when an exception or allowance listed in this Appendix applies (such as while actively eating or drinking).

Staff may separately be allowed by the operators and hosts of indoor Mega-Events to remove masks subject to the same rules as patrons for removing masks, but operators and hosts of indoor Mega-Events may be required to impose additional restrictions or obtain additional documentation in relation to employees or Personnel under Cal/OSHA’s regulations. Businesses and other entities must adhere to applicable Cal/OSHA regulations relating to COVID-19 health and safety measures in the workplace and should frequently check for updates to those regulations such as by checking online at www.dir.ca.gov/dosh/coronavirus/covid19faqs.html.

Because the State’s Post-Blueprint Guidance for indoor Mega-Events and this Order
require operators and hosts of indoor Mega-Events to check for proof of vaccination or Testing status on entry of all patrons and staff, there is not an additional requirement to check vaccination status for removal of masks indoors under this Section except as provided in this paragraph. Hosts and operators of indoor Mega-Events can satisfy the requirements for mask removal by patrons once the patrons are inside the facility at minimum by posting signs at public entrances and at appropriate locations inside the facility saying that if a patron is Vaccinated with a Complete Initial Series, the patron may remove their mask in the facility, and Unvaccinated patrons may remove their masks while actively eating or drinking. Sample signage for this purpose is available online at https://sf.gov/outreach-toolkit-coronavirus-covid-19. Operators and hosts may adopt requirements that are more protective of public health, such as continuing to require universal masking or requiring additional, more stringent requirements that meet their operational needs.

7. **Covered Businesses (Appendix B).**

Covered Businesses described in Section 4(a)(i) of the Order and defined Appendix B (e.g., restaurants, bars, gyms and fitness facilities, theaters, clubs, and entertainment venues) are required to check for proof of vaccination or Testing status for all patrons and staff before entry (or soon thereafter as allowed by Appendix B). Separate from those requirements, Covered Businesses may, but are not required to, adopt rules allowing patrons who are Vaccinated with a Complete Initial Series to remove their Well-Fitted Masks as provided in this Section. Because such Covered Businesses are required by this Order to check for proof of vaccination or Testing status on entry (or on first interaction as required by Appendix B) of all patrons and staff, there is not an additional requirement to check vaccination status for removal of masks indoors except as provided in this paragraph. Covered Businesses can satisfy the requirements for mask removal by patrons once patrons are inside the facility at minimum by posting signs at public entrances and at appropriate locations inside the facility saying that if a patron is Vaccinated with a Complete Initial Series, the patron, once proof of vaccination or Testing status is confirmed, may remove their mask in the facility, and Unvaccinated persons may remove their masks while actively eating or drinking. Sample signage for this purpose is available online at https://sf.gov/outreach-toolkit-coronavirus-covid-19. Covered Businesses may adopt requirements that are more protective of public health, such as continuing to require universal masking or requiring additional, more stringent requirements that meet their operational needs.

8. **Other Businesses and Governmental Facilities.**

Businesses, governmental entities, and other operators or hosts of indoor public settings besides indoor Mega-Events, Covered Businesses (as referenced in Section 7 above), and other facilities where universal indoor masking is still required, may, but are not required to, adopt rules allowing Patrons who are Vaccinated with a Complete Initial Series to remove their Well-Fitted Masks as provided in this Section. These settings include
places like grocery stores, banks, and public buildings. Operators of such settings that opt to allow patrons who are Vaccinated with a Complete Initial Series to remove masks have additional options for confirming vaccination status of those patrons, including self-attestation. They can confirm proof of being Vaccinated with a Complete Initial Series using the methods listed in the definition of “Vaccinated with a Complete Initial Series” in Section 1(n) of the Order (e.g., checking the CDC vaccination card, a personal digital vaccination record issued by the State or other jurisdiction or entity, or documentation from a healthcare provider). Or they can post signs at public entrances and at appropriate locations inside the facility saying that if a patron is Vaccinated with a Complete Initial Series, the patron may remove their mask in the facility, in essence allowing self-attestation by those people consistent with State rules. Sample signage for this purpose is available online at https://sf.gov/outreach-toolkit-coronavirus-covid-19. They can also adopt requirements that are more protective of public health that meet their operational needs.

9. **Signage.**

All Businesses and governmental entities are required to conspicuously post signage as provided in Section 4(f) of the Order. That signage should include any rules specific to the entity or location regarding masking (such as a requirement that patrons be Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination, including a Booster when Booster-Eligible, and whether masks are required of all patrons regardless of vaccination status).

10. **Minimum Requirements; Ability to Adopt More-Restrictive Measures.**

This Order establishes the minimum requirements related to indoor masking. Nothing in this Order, including this Appendix A, is intended to reduce any other federal, state, or local legal requirements or otherwise modify them in a way that is less protective of public health, or to limit an individual Business’ or governmental entity’s choices to take more health protective measures. Businesses or governmental entities may impose further restrictions that are more protective of public health than the minimum requirements under this Order, including, without limitation, requiring patrons or Personnel to be Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination, requiring them to wear a Well-Fitted Mask, or taking other measures that meet their operational needs (such as, by way of example only, mandating that people be Up-to-Date on Vaccination and only allowing a testing alternative if someone has an exemption to vaccination based on Religious Beliefs or a Qualifying Medical Reason.)
1. **Covered Businesses and Events.**

   For purposes of this Appendix B, “Covered Businesses” include:

   a. Operators/hosts of establishments or events where food or drink is served indoors—including, but not limited to, dining establishments, bars, clubs, theaters, and entertainment venues. For clarity, this does not include food or drink provided as part of a religious ceremony (e.g., communion or kiddush).

   b. Gyms, recreation facilities, yoga studios, dance studios, and other fitness establishments, where any patrons engage in cardiovascular, aerobic, strength training, or other exercise involving elevated breathing. For clarity, fitness establishments and activities that are part of a K-12 school or operate as a Program for Children and Youth are covered by separate sector-specific directives (available at [www.sfdph.org/directives](http://www.sfdph.org/directives)) and are not subject to the requirements of this Appendix B.

2. **Vaccination or Testing Requirement for Patrons.**

   a. **Requirement.** Covered Businesses must require all patrons age 12 and older to show proof that they are Vaccinated with a Complete Initial Series before entering any indoor portion of a facility, subject only to the Testing alternative in this Section 2 and any applicable requirements of federal, state, or local laws requiring accommodation. Boosters are not required. But Covered Businesses are strongly urged to require all patrons to show proof that they are Up-to-Date on Vaccination, including receipt of a Booster by patrons age 12 and older as soon as eligible, before entering any indoor portion of a facility, subject only to the exceptions below and any applicable requirement of federal, state, or local laws requiring accommodation.

   For purposes of showing proof of being Vaccinated with a Complete Initial Series, Covered Businesses may not accept a written self-attestation. The following are the only acceptable proof of being Vaccinated with a Complete Initial Series:

   1. the CDC vaccination card, which includes name of person vaccinated, type of vaccine provided, and date last dose administered, or similar documentation issued by another foreign governmental jurisdiction;

   2. a photo or copy of a vaccination card as a separate document;

   3. a photo of a vaccination card stored on a phone or electronic device;

   4. documentation of vaccination from a healthcare provider; or

   5. a personal digital COVID-19 vaccine record issued by the State of California and available by going to [https://myvaccinerecord.cdph.ca.gov](https://myvaccinerecord.cdph.ca.gov) or similar
documentation issued by another state, local, or foreign governmental jurisdiction, or by an approved private company (a list of approved companies offering digital vaccine cards is available at www.sfdph.org/dph/alerts/files/vaccine-verification-sites.asp).

Covered Businesses are required to cross-check proof of vaccination status for each patron against a photo identification, unless photo identification is integrated into the digital COVID-19 vaccine record.

As an alternative to checking proof of vaccination status for patrons and staff, operators of such Covered Businesses are allowed, but not required by this Order, to instead accept proof of a negative COVID-19 Test taken within one day (for antigen tests) or two days (for PCR tests) before entry into the facility (but people are not required to be Tested more than twice each week so long as each Test is done at least three days apart). Patrons and staff who enter based on a negative COVID-19 Test must also wear a Well-Fitted Mask at all times except as allowed under any of the specific exceptions or allowances under Appendix A of this Order.

For purposes of showing proof of a Test as required in the preceding paragraph, self-administered antigen testing is not acceptable at this time unless there is third-party verification—the Covered Business must require proof of a negative Test as outlined by CDPH’s guidance in the section titled “What can be used as proof of a negative pre-entry test in settings where pre-entry testing is required?”, available online at www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Updated-COVID-19-Testing-Guidance.aspx#pre-entry-testing.

b. Exceptions and Clarifications.

i. For clarity, individuals who are Unvaccinated (i.e., who do not provide proof of being Vaccinated with a Complete Initial Series) may, without being required to show proof of a negative Test, use the outdoor portions of Covered Business facilities (but not the indoor portions except solely as provided in subsections (ii), (iii), and (v) below).

ii. Covered Businesses may allow Unvaccinated patrons wearing a Well-Fitted Mask to come indoors to use a restroom.

iii. Dining establishments and bars may require proof of being Vaccinated with a Complete Initial Series or proof of a negative COVID-19 Test to be shown at the time of patrons’ first in-person interaction with staff (e.g., at the time of ordering) rather than at the entrance to the establishment, but only if all such patrons wear Well-Fitted Masks at all times after entering the indoor portion of the facility and before showing such proof. Dining establishments and bars are prohibited from serving any patron indoors who fails to provide this proof.
iv. Theaters where concessions are sold may require proof of being Vaccinated with a Complete Initial Series or proof of a negative COVID-19 Test to be shown at the time of patrons’ purchase of concessions rather than at the entrance to the establishment. Theaters are prohibited from selling food or beverages to any patron indoors who fails to provide this proof.

v. Dining establishments and bars that serve food may allow individuals wearing a Well-Fitted Mask to enter the indoor portion of the facility to order, pick up, or pay for food or drink “to go” without showing either proof of being Vaccinated with a Complete Initial Series or proof of a negative Test.

vi. Businesses may obtain proof of being Vaccinated with a Complete Initial Series and proof of a negative Test in advance of a patron’s arrival at a facility, e.g., by email or through a reservation system, but must confirm identification and timing of the negative Test at the time of entry into the facility.

vii. Businesses operating food courts in indoor shopping centers that offer seated dining are required to obtain proof of being Vaccinated with a Complete Initial Series or proof of a negative COVID-19 Test for patrons who eat at the food court, and such proof may be shown at the time of patrons’ purchase of food or beverages rather than at the entrance to the dining area. Businesses are prohibited from selling food or beverages to any patron for consumption at the food court who fails to provide this proof.

viii. Individuals hosting private events in their homes are not subject to the requirements of this Appendix B but are urged to consider requiring all guests age five and older to show proof that they are Vaccinated with a Complete Initial Series or proof of a negative COVID-19 Test, particularly if the guests include people who may be medically vulnerable.

a. Requirements. Subject to the exceptions below and any applicable requirements of federal, state, or local laws requiring accommodation:

i. Covered Businesses must use their best efforts to ascertain either the vaccination status or proof of a negative Test of all staff who routinely work onsite. A sample Employee Vaccination Program Ascertainment Form is available at www.sfdph.org/dph/covid-19/files/declination.pdf.

ii. Covered Businesses must ensure that all staff who routinely work onsite provide proof that they are Vaccinated with a Complete Initial Series or proof of a negative COVID-19 Test before entering or working in any indoor portion of the facility.
iii. Boosters are not required for staff. But Covered Businesses are strongly urged to ensure that all staff who routinely work onsite provide proof that they are Up-to-Date on Vaccination before entering or working in any indoor portion of the facility.

iv. Consistent with applicable privacy laws and regulations, Covered Businesses must maintain records of staff vaccination or exemption status, and provide these records to the Health Officer or other public health authorities promptly upon request, and in any event no later than the next business day after receiving the request.

v. Businesses and other entities must adhere to applicable Cal/OSHA regulations relating to COVID-19 health and safety measures in the workplace and should frequently check for updates to those regulations such as by checking online at [www.dir.ca.gov/dosh/coronavirus/covid19faqs.html](http://www.dir.ca.gov/dosh/coronavirus/covid19faqs.html). At the time of the issuance of the current update to this Order, those regulations require employers to document the vaccination status of their staff (i.e., no self-attestation).

b. Exceptions and Clarifications.

i. For clarity, “staff” as used in this order does not include all individuals included in the broader term “Personnel.” Individuals who enter or work in a Covered Business facility on an intermittent or occasional basis or for short periods of time (e.g., individuals who deliver goods or packages) are not covered by the requirements in this Appendix B.

4. Signage.

All Covered Businesses are required to conspicuously post signage as provided in Section 4(f) of the Order. That signage can and should include any rules specific to the Covered Business regarding vaccination status (such as listing a requirement that patrons be Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination, including a Booster when Booster-Eligible, and whether a negative Test is allowed instead of being vaccinated).

5. Indoor Mega-Events.

The requirements for entry to indoor Mega-Events are covered in Section 7 of the Order.

6. Minimum Requirements; Ability to Adopt More-Restrictive Measures.

This Order establishes the minimum requirements related to vaccination requirements for Covered Businesses. Nothing in this Order, including this Appendix B, is intended to reduce any other federal, state, or local legal requirements or otherwise modify them in a
way that is less protective of public health, or to limit an individual Business’ or governmental entity’s choices to take more health protective measures. Businesses or governmental entities may impose further restrictions that are more protective of public health than the minimum requirements under this Order, including, without limitation, requiring patrons or Personnel to be Vaccinated with a Complete Initial Series or Up-to-Date on Vaccination, requiring them to wear a Well-Fitted Mask, or taking other measures that meet their operational needs (such as, by way of example only, mandating that people be Up-to-Date on Vaccination and only allowing a testing alternative if someone has an exemption based on Religious Beliefs or Qualifying Medical Reasons.)
