Personnel in these settings must complete an approved one- or two-shot vaccine regimen by September 29, 2021.</p>

State and Local Reporting and Vaccination Requirements for Health Care and Congregate Settings** (Updated 8/25/2021)

¹ Under the [CDPH Vaccination Status Order](#), “worker” includes, but is not limited to nurses, nursing assistants, physicians, technicians, therapists, phlebotomists, pharmacists, students and trainees, contractual staff not employed by the health care facility, and persons not directly involved in patient care, but who could be exposed to infectious agents that can be transmitted in the health care setting (e.g., clerical, dietary, environmental services, laundry, security, engineering and facilities management, administrative, billing, and volunteer personnel).

² Under the SF [Safer Return Together Order](#), “Personnel” refers to all persons who routinely work onsite, including those who are not permanently stationed or regularly assigned to a High-Risk Setting, but who in the course of their duties may enter or work in High-Risk Settings even on an intermittent or occasional basis or for short periods of time. Personnel also includes those persons working in buildings at a site containing a High-Risk Setting, such as a campus or other similar grouping of related buildings, where Personnel do any of the following: (i) access the acute care or patient, resident, client, or incarcerated person areas of the High-Risk Setting; or (ii) work in-person with patients, residents, clients, or incarcerated people who visit those areas. **Personnel “who are not permanently stationed or regularly assigned to a High-Risk Setting, but who in the course of their duties may enter or work in High-Risk Settings even on an intermittent or occasional basis or for short periods of time” are required to be fully vaccinated by **October 13, 2021** and must complete and approved one- or two-shot vaccine regimen by September 29, 2021. These individuals do not fall within the state’s definition of “workers.”

**This chart is intended to assist facilities and employers with understanding their obligations under the various state and local orders concerning vaccination requirements in health care and congregate settings. In the event of any inconsistency between this chart and any state or local order, the order controls.
