

Number of CANS pairs with strengths developed (372) and Number of CANS pairs with strengths maintained (1264) do not add up to Number of CANS pairs in this report (1410) because a child/youth can be helped to develop a strengths as well as to maintain a different strength

All Programs

FY18-19 Q3 Performance Objective A.2b Strengths Outcomes Item-Level Report

7/1/2018 - 3/31/2019

The charts below display the Strengths items from the CANS. The stacked bars represent the total number of episodes for which at least two useful or centerpiece strengths were developed or maintained.*

Paired episodes exist within CANS pairs

Mean number of months between CANS: 12.3 • Median number of months between CANS: 11.5 → Minimum is 8 months

Number of children/youth: 1338 • Number of CANS pairs in this report: 1410

Number of CANS pairs with strengths developed: 372 • Number of CANS pairs with strengths maintained: 1264

DEVELOPED

Strength item that was rated as 2 or 3 at Time 1 and the child/youth was helped to develop it into a 0 or 1 at Time 2

MAINTAINED

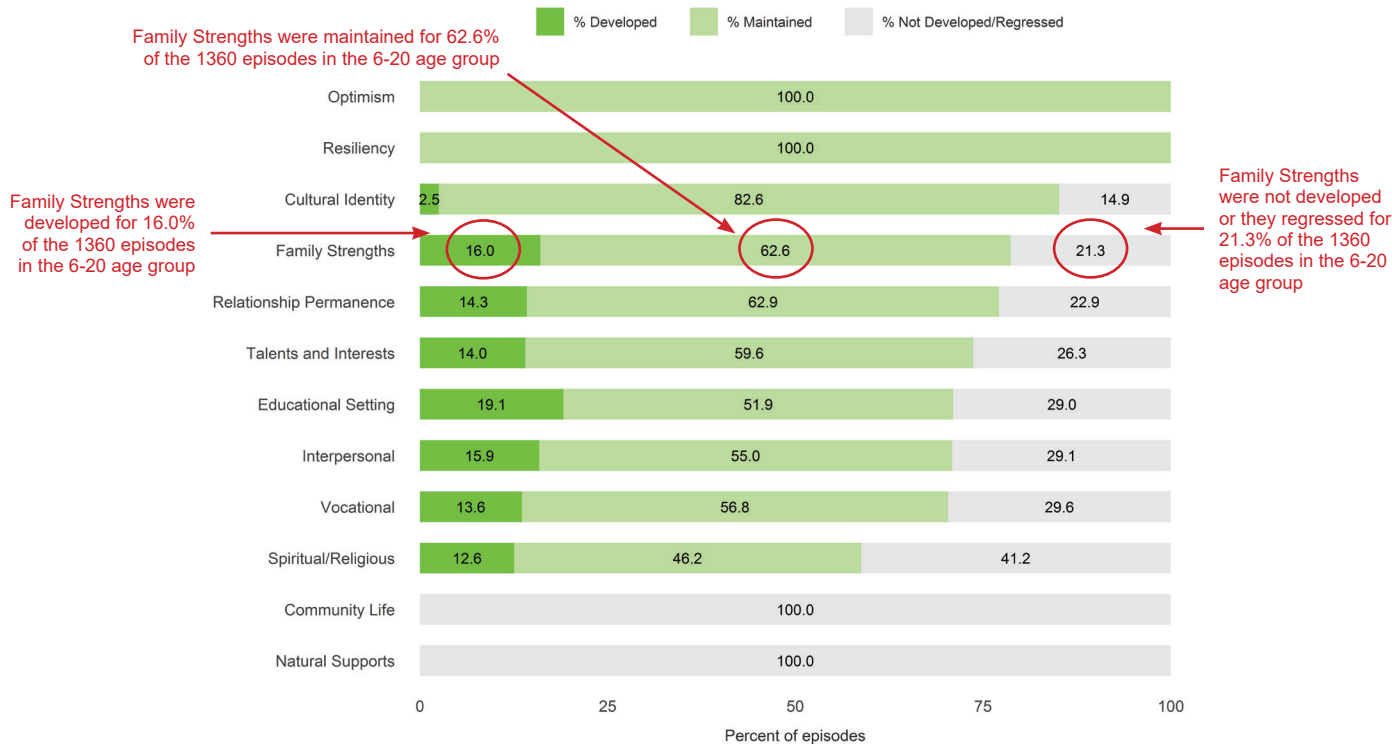

Strength item that was rated as 0 or 1 at Time 1 and the child/youth maintained it as 0 or 1 at Time 2

NOT DEVELOPED/REGRESSED

Strength item that was rated as 2 or 3 at Time 1 and Time 2, or was rated as 0 or 1 at Time 1 and 2 or 3 at Time 2

Number of CANS pairs in this report (1410) is a sum of CANS pairs for 6 thru 20 (1360) and CANS pairs for 0 thru 5 (50)

CANS pairs for 6 thru 20: 1360

*The two most recent CANS are included for each child/youth episode, with the most recent CANS occurring during the reporting period. Only CANS with a minimum of 8 months of treatment between assessments are included. In the bar charts, items with no data shown do not have a CANS pair.

---	---	--

CANS pairs for 0 thru 5: 50

New items added in CANS 2.0; data are not shown because these items do not have a CANS pair

Percent of episodes cannot be calculated from data shown above because the percent is based on strengths developed, maintained, or both, as required by the objective. In the above data, developed and maintained are shown separately for greater clinical relevance

Percent of episodes for which at least two useful or centerpiece strengths were maintained and/or developed
