## FORMULARY ALIGNMENT AND PRESCRIBING

In concert with integration efforts in the San Francisco Health Network, the CBHS and COPC (Healthy San Francisco) Formulary Committees have been working to improve formulary alignment. Each core psychiatric drug class contains several full formulary ("F") options which have been selected as preferred drugs by the CBHS and COPC Formulary Committees. These cross-formulary medications should be used as first-line treatment. Using cross-formulary medications will facilitate patient access to medications, particularly for those individuals who transition between COPC and CBHS providers. In addition please be mindful of health plan formularies such as Medi-Cal managed care providers (San Francisco Health Plan or Anthem Blue Cross) which a patient may be transitioning to in the foreseeable future.
