Community Health Equity & Promotion Performance Objectives FY 2021-22

FY 20-21 Community Health Equity and Promotion (CHEP) Performance Objectives

Agency	Program & Objectives
AGUILAS	Special Project Latino MSM - El Ambiente (Cat #5)
Objective #1	By the end of the contract term, AGUILAS will conduct a total of 150 HIV tests for Latino men who have sex with men as measured by EvaluationWeb.
Objective #2	By the end of the contract term, 90% of Latino men who have sex with men clients of AGUILAS will be offered at least one HIV test annually as measured/or documented by client consent for service form.
Objective #3	By the end of the contract term, 80% of HIV-negative/unknown status Latino men who have sex with men clients of AGUILAS will report having had an HIV test in the prior 6 months, as measured or documented by self-report, EvaluationWeb and/or client surveys and electronic charts.
Objective #4	By the end of the contract term, AGUILAS will distribute at least 2,000 of condoms annually as measured by invoices and inventory.
APIWC dba SFCHC	Special Project - Trans Women - Transform Collaborative (Cat #7)
Objective #1	By the end of each Fiscal Year (FY), Transform Collaborative will distribute at least 6,000 condoms as documented in the condom inventory.
Objective #2	By the end of each FY, 90% of HIV/HCV-negative clients will be referred to HIV/HCV testing services as documented on the client intake form.
APIWC dba SFCHC	Special Project - Trans Women - Transform Space (Cat #7)
Objective #1	By the end of each Fiscal Year (FY), Transform Space will distribute at least 6,000 condoms as documented in the condom inventory.
Objective #2	By the end of each FY, 90% HIV/HCV-negative clients will be referred to HIV/HCV Counseling and Testing services as documented on the client intake form.
Objective #3	By the end of each FY, 80% of HIV/HCV-negative/unknown status clients engaged in services for the first 6 months of the FY will be offered an additional HIV/HCV test at the 6 month mark as documented on an Excel tracking document which indicates date of intake and date test offered.
APIWC dba SFCHC	HERR for API MSM (Cat #2)
Objective #1	90% of HIV/HCV-negative/unknown status clients will be offered an HIV/HCV test at intake.
Objective #2	80% of HIV/HCV-negative/unknown status clients engaged in services for the first 6 months of the FY will be offered an additional HIV/HCV test at the 6 month mark.
Objective #3	90% of HIV-positive clients who have not seen an HIV primary care provider will be offered linkage to care at intake.
Objective #4	The Connection will distribute at least 6,000 condoms annually.
APIWC dba SFCHC	PrEP Navigation (BoS) (GTZ)
Objective #1	By the end of each Fiscal Year (FY), 35 new participants from the target community will report having initiated PrEP (i.e. took the first dose of medication) as documented by client files, surveys or medication logs.
Objective #2	By the end of each FY, 70% of new participants who initiate PrEP will report having taken the first dose within three months of decision as documented by client files, surveys or medication logs.
Objective #3	By the end of each FY, 70% of clients who initiated PrEP and for whom follow-up data is available will report still being on PrEP after 6 months as documented by client files, surveys or medication logs.
APIWC dba SFCHC	PrEP for Trans Latina Women (Community Engagement) (GTZ)
Objective #1	By the end of each Fiscal Year, 20 new participants from the target community will report having initiated PrEP (i. e. took the first dose of medication) as documented by client files, surveys or medication logs.
Objective #2	By the end of each Fiscal Year, 70% of new participants who initiate PrEP will report having taken the first dose within three months of decision as documented by client files, surveys or medication logs
Objective #3	By the end of each Fiscal Year, 70% of clients who initiated PrEP and for whom follow-up data is available will report still being on PrEP after 6 months, as documented by client files, surveys or medication logs.
BAART CHC	HIV Testing in a Sub Use Tx Setting (HIV Set Aside)
Objective #1	By the end of each contract term, the program will have an HIV/HCV test planned and/or performed on all HIV/HCV negative/unknown status clients.
Objective #2	By the end of each contract term, the program will offer appropriate linkage to care and partner services to all clients testing positive.
BVHP	HIV Testing in a Methadone Program (HIV Set Aside)
Objective #1	By the end of each contract term, 100% of HIV/HCV negative/unknown status program clients will have an HIV/HCV test planned and/or performed, as documented in client records
Objective #2	By the end of each contract term, 100% of program clients who test positive, will be offered appropriate linkage to care and partner services, as documented in the client records.
Facente Consulting	OPT-In Qualitative Project (OPT-In)
Objective #1	At the end of each year on December 31, between 2019 and 2023, Shelley Facente of Facente Consulting will prepare a final report summarizing project activities and accomplishments, as measured by submission of the final report.
Facente Consulting	Ending the HIV Epidemic (EtHE)
Objective #1	By September 30, 2020, Shelley Facente of Facente Consulting will prepare a final Ending the HIV Epidemic plan, as measured by submission of the final plan.
Objective #2	At the end of each year between 2021 and 2023, by December 31 Shelley Facente of Facente Consulting will prepare a final report summarizing planning activities and accomplishments for each year, as measured by submission of the final report.
Facente Consulting	End Hep C (HCV)
Objective #1	At the end of each year between 2021 and 2023, by December 31, Shelley Facente of Facente Consulting will prepare a final report summarizing planning activities and accomplishments for each year, as measured by submission of the final report.
Glide	OPT-IN - HIV/HCV Linkage to Care – CDC Demo Project (HCV)
Objective #1	By the end of each contract term, 50 Percent of people identified as HCV Positive will have initiated HCV treatment.
Objective #2	By December 31, each contract year, 50 Percent of people identified as HIV Positive, who are "out of care" will be linked to care within 30 days.
Objective #3	By December 31, each contract year, 50 Percent of people expressing that they would like to be initiated on PrEP, will be connected to a PrEP program.

FY 20-21 Community Health Equity and Promotion (CHEP) Performance Objectives

Agency	Program & Objectives
Glide	HIV/HCV Linkage to Care & Harm Reduction Programs (HCV)
Objective #1	By June 30, 156 clients living with HCV will have completed the Glide Prep-C screen and a Patient Navigation Assessment and Care Plan, finally enrolling in Glide's HCV Active Linkage services.
Objective #2	By June 30, at least 85 clients not already engaged in primary medical care will have been linked to primary care to receive HCV-related care, as measured by SFDPH data collection forms.
Objective #3	By June 30, at least 17 clients with HCV who are already in primary care but who have been denied access to HCV treatment as a result of their drug use will be actively linked to a supportive provider, as measured by SFDPH data collection forms.
Objective #4	By June 30, at least 43 clients previously untreated for HCV will receive treatment as a result of participation in Glide's HCV Active Linkage program, as measured by SFDPH data collection forms.
Objective #5	By June 30, at least 575 individuals at high risk for HCV will have been screened for HCV, as measured by the SFDPH HCV Screening Forms submitted to SFDPH each month.
Harm Reduction Coalition	Harm Reduction Training Institute (GF)
Objective #1	By the end of the contract term, the Capacity Building Services (CBS) Coordinator will reach out to 90% the DPH/DPH-funded substance use agencies as directed by the DPH contact list.
Objective #2	By the end of the contract term, the CBS Coordinator will complete a needs assessment with 80% of the substance use agencies as directed by the DPH contact list.
Objective #3	By the end of the contract term, the CBS Coordinator will provide harm reduction trainings to 90% of the programs that completed the needs assessment.
Harm Reduction Coalition	TORO (GF)
Objective #1	For the period 2/1/2020 - 1/31/2021 By the end of the contract term, the DOPE Project - SRO project program will have worked with at least 2 high priority SRO's for at least 6 months a piece, including training staff in those SRO's. Documentation of training locations and names will be submitted to CHEP.
	For the period 2/1/2021 - 1/31/2022 By the end of the contract term, the DOPE Project - SRO program will have surveyed tenants at two SRO sites and work in collaboration with each site staff to determine appropriate engagement and recommitment of tenants/participants for overdose and Naloxone training and other relevant, engagement activities.
Objective #2	For the period 2/1/2020 - 1/31/2021 By the end of the contract term, DOPE Project - SRO program staff will have trained at least 2 high priority SRO's in the availability and use of the Naloxone emergency boxes that were installed by SFDPH. Documentation of training locations and names will be submitted to CHEP.
	For the period 2/1/2021 - 1/31/2022 By the end of the contract term, the DOPE Project - SRO program will have developed a short term and long term SRO tenants training plan towards an SRO Overdose Prevention Specialists Peer Training program.
Objective #3	For the period 2/1/2020 - 1/31/2021 By the end of the contract term, property management and service provider staff will be trained on how to identify an overdose and how to respond with nasal naloxone. Documentation of training locations and names will be submitted to CHEP.
	For the period 2/1/2021 - 1/31/2022 By the end of the contract term, the DOPE Project - SRO program will have held at least 2 tenant/residents training and/or related activities at both sites.
Harm Reduction Coalition	Drug Overdose Prevention Project (GF)
Objective #1	By the end of each contract term, the DOPE Project will collect overdose incident data on 80% of clients who report at time of refill that they used their naloxone kit.
Objective #2	By the end of each contract term, the DOPE Project will conduct 2 Train the Trainer sessions to support naloxone training, which encompasses training providers to deliver overdose prevention training to other providers and clients.
HealthRIGHT360	HCV Linkage to Care (HCV)
Objective #1	By the end of each contract term, 100 unduplicated clients will have been enrolled in the HCV Linkage Program as measured by the client assessment and intake forms.
Objective #2	By the end of each contract term, 75 unduplicated clients who have been enrolled in the HCV Linkage Program will have initiated primary care as measured by client activity logs and case notes.
Objective #3	By the end of each contract term, 75 unduplicated clients who have been enrolled in the HCV Linkage Program will have received a full medical evaluation as measure by client activity logs and case notes.
HealthRIGHT360	HIV Testing in a Sub Use Tx Setting (HIV Set Aside)
Objective #1	By the end of the contract term, 90% of participants testing HIV-positive will be offered partner services as documented by a referral to appropriate service provider.
Objective #2	By the end of the contract term 80% of participants testing HIV-positive will be offered linkage to care as documented by development of a care plan in agency's electronic health record system.
Objective #3	By the end of the contract term 60% of participants previously testing HIV-positive who have been out of care will be offered linkage to care as documented by an assessment resulting in either a referral to appropriate services or the development of a care plan.
Objective #4	By the end of the contract term or as requested by San Francisco Department of Public Health, HR360 CHEP will provide data on HIV positivity rates.

FY 20-21 Community Health Equity and Promotion (CHEP) Performance Objectives

Agency	Program & Objectives
Heluna Health dba PHFE	Jail Health Services HIVIS Testing (Jail Health)
Objective #1	By the end of each term, 85% of patients testing HIV-positive will receive their preliminary and confirmed HIV test results.
Objective #2	By the end of each term, 85% of patients testing HIV-positive will be linked to the HIV-IS CoE for primary care while in custody.
Objective #3	By the end of each term, 85% of patients testing HIV-positive will be referred to the LINCIS team and will be provided with options for notifying their sexual and/or needle-sharing partners as part of disclosure services.
Objective #4	By the end of each term, 85% of patients testing HIV-positive will have follow up HIV+ labs drawn by the Prevention Team.
Instituto Familiar de la Raza	HERR for Drivers Among MSM (Cat #2)
Objective #1	By the end of the contract term, 90% of Latino males who have sex with males clients of Instituto Familiar de la Raza will be offered at least one HIV test annually as measured/or documented by assessment or intake forms.
Objective #2	By the end of the contract term, 60% of HIV-negative/unknown status Latino males who have sex with males clients of Instituto Familiar de la Raza will report having had an HIV test in the prior 6 months, as measured or documented by self-report, EvaluationWeb.
Objective #3	By the end of the contract term, 90% of HIV-positive clients in Instituto Familiar de la Raza testing positive or who have not seen an HIV primary care provider in the prior 6 months will be offered linkage to care as measured or documented by client treatment plans.
Objective #4	By the end of the contract term, Instituto Familiar de la Raza will distribute at least 10,000 of condoms annually as measured by invoices and program records.
Instituto Familiar de la Raza	Special Project for Latino MSM (Cat #5)
Objective #1	By the end of the contract term, Instituto Familiar de la Raza will conduct a total of 850 HIV tests for Latino males who have sex with males as measured by EvaluationWeb.
Objective #2	By the end of the contract term, 60% of HIV-negative/unknown status Latino males who have sex with males clients of Instituto Familiar de la Raza will report having had an HIV test in the prior 6 months, as measured or documented by self-report, EvaluationWeb and/or core variables.
Objective #3	By the end of the contract term, 90% of Latino males who have sex with males clients of Instituto Familiar de la Raza will be offered at least one HIV test annually as measured/or documented by assessment intake form.
Objective #4	By the end of the contract term, 90% of people testing HIV-positive at Instituto Familiar de la Raza will be offered partner services as measured by EvaluationWeb.
Objective #5	By the end of the contract term, 90% of HIV-positive clients in Instituto Familiar de la Raza testing positive or who have not seen an HIV primary care provider in the prior 6 months will be offered linkage to care as measured or documented by client treatment plans.
Objective #6	By the end of the contract term, Instituto Familiar de la Raza will distribute at least 10,000 of condoms annually as measured by invoices and program records.
Instituto Familiar de la Raza	PrEP Services for Latino MSM (GTZ)
Objective #1	By the end of each contract term, 50 new participants will report having initiated PrEP (i.e., took the first dose of medication).
Objective #2	By the end of each contract term, 40 (80%) of new participants who initiate PrEP will report having taken the first dose within three months of decision.
Objective #3	At six-month follow-up 70% of clients who initiated PrEP and for whom follow-up data is available will report still being on PrEP.
LYRIC	PrEP Services for Youth (GTZ)
Objective #1	By the end of each contract term, 135 new participants will have been asked about their interest in PrEP and, if interested, will be offered PrEP navigation support by the end of the term. Assessments to be documented in agency's participant database.
Objective #2	By the end of each contract term, 10 new participants will report having initiated PrEP (i.e. took the first dose of medication) by the end of the term, as measured by self-report and/or staff observation and documented in their participant profiles.
Objective #3	By the end of each contract term., at the 3- months follow-up, 50% of participants who initiated PrEP, and for whom follow-up data is available, will still be on PrEP as measured by self-report and/or staff observation and documented in their participant files.
MNHC	PWP in the CoE (CoE)
Objective #1	90% of PWP participants will receive at least one session focused on addressing barriers to adherence as identified in their assessment, and measured by program records.
Objective #2	At least 50% of clients identified as out-of-care or tenuously in-care and enrolled in the PWP program will be engaged in care as measured by attendance at two (2) or more HIV Primary Care Evaluation visits at least three months apart during the contract period.
Objective #3	Within 1 year of enrollment in PWP, 35% of clients will have undetectable viral loads (<40 copies/ml) as measured by laboratory results.

FY 20-21 Community Health Equity and Promotion (CHEP) Performance Objectives

Agency	Program & Objectives
Native American Health Center	Hozhoni Project (CoE)
Objective #1	By the end of the contract term, Hozhoni will conduct a total of 60 targeted HIV rapid tests to MSM, MSM-IDU, and TFMS clients of NAHC.
Objective #2	By the end of the contract term, 70% of HIV-negative/unknown status MSM, MSM-IDU, and TFMS clients of NAHC, who are at clinic site for services, will report having had an HIV test in the prior 6 months, as measured by testing data.
Objective #3	By the end of the contract term, 65% of HIV-negative/unknown status MSM, MSM-IDU, and TFMS attendees of Hozhoni groups will report having had an HIV test in the prior 6 months, as measured by self-report and data on linkage to testing.
Objective #4	By the end of the contract term, 80% of people testing HIV-positive at NAHC will be offered partner services, as documented by their LINC case report form. Their partners will also be offered NAHC services.
Objective #5	By the end of the contract term, 90% of HIV-positive Hozhoni clients who have completed case management intake and who have not seen an HIV primary care physician will be offered linkage to care by their prevention case manager, within six months of intake/ onset of case management.
Objective #6	During the contract term, Hozhoni will distribute 4000 condoms (male/female) annually.
San Francisco AIDS Foundation	HIV Testing (Cat #1)
Objective #1	By the end of the contract term, SFAF (and its subcontractors) will report an 85% linkage to care rates for newly diagnosed clients in all programs, linkage to care being defined as attending first medical appointment within 3 months of diagnoses.
Objective #2	By the end of the contract term, SFAF will report the number of unduplicated clients who are on PrEP and testing in this program.
Objective #3	By the end of the contract term 80% of clients testing at SFAF programs will report having had an HIV test within the last 6 months.
San Francisco AIDS Foundation	HERR Drivers for MSM (The Stonewall Project) (HIV Set Aside)
Objective #1	By the end of the contract term, SFAF (and its subcontractors) will report a 70% linkage to care rates for newly diagnosed substance users, linkage to care being defined as attending first medical appointment within three months of diagnoses.
Objective #2	By the end of the contract term, SFAF will report an 80% retention rate among HIV positive substances users, retention defined by having had a doctor's appointment, prescription refill or lab work per treatment plan with the past six months.
San Francisco AIDS Foundation	Special Project for AA MSM (Cat #4)
Objective #1	By the end of the contract term, SFAF will report on the percentage of tests among AAMSM.
Objective #2	By the end of the contract term, SFAF will report on linkage to care rates among newly diagnosed AAMSM as defined by attending first medical appointment within 3 months of diagnoses.
Objective #3	By the end of the contract term, SFAF will report an 80% retention rate among HIV-positive AAMSM, retention as defined by having had a doctor's appointment, prescription refill or lab work per treatment plan within the past six months.
San Francisco AIDS Foundation	MSM SP (Stonewall Castro/LIFE Program) (Cat #6)
Objective #1	By the end of the contract term, SFAF will report on the percentage of tests among MSM.
Objective #2	By the end of the contract term, SFAF will report on linkage to care rates among newly diagnosed MSM as defined by attending first medical appointment within 3 months of diagnoses.
Objective #3	By the end of the contract term, SFAF will report an 80% retention rate among HIV-positive MSM, retention as defined by having had a doctor's appointment, prescription refill or lab work per treatment plan within the past six months.
San Francisco AIDS Foundation	PwP - Positive Force (Cat #3)
Objective #1	
San Francisco AIDS Foundation	PrEP Navigation (BoS) (PrEP)
Objective #1	By the end of each contract period, 350 new participants will report having initiated PrEP (i.e., took the first dose of medication).
Objective #2	At six-month follow-up, 70% of clients who initiated PrEP and for whom follow-up data is available will report still being on PrEP.
San Francisco AIDS Foundation	HCV Informed HCV Screening and Linkage to Care (HCV)
Objective #1	By the end of each contract year, 41 clients will have been enrolled in the HCV Linkage Program as measured by the client assessment and intake forms.
Objective #2	By the end of each contract year, 39 clients who have been enrolled in the HCV Linkage Program will have initiated primary care as measured by client activity logs and case notes.
Objective #3	By the end of each contract year, 35 clients who have been enrolled in the HCV Linkage Program will have received a full medical evaluation as measure by client activity logs and case notes.
Objective #4	By the end of each contract year, 27 clients will initiate HCV treatment.
San Francisco AIDS Foundation	HIV HCV OPT-In (HCV)
Objective #1	Of people identified as HCV positive at 6th St HRC or during encampment outreach, 35% will have documented HCV treatment starts.
Objective #2	50% of HIV positive persons who are considered "out of care" verified as linked to care within 30 days of referral.
Objective #3	25% of clients tested for HIV and/or STIs at 6th St HRC will not have had a test in at least a year.

FY 20-21 Community Health Equity and Promotion (CHEP) Performance Objectives

Agency	Program & Objectives
San Francisco AIDS Foundation	SSIP (HIV Set Aside)
Objective #1	By the end of each contract year, at least 648 PLWARH will have been screened with the SIP screener app or via a paper screener if needed, either through street/venue-based outreach or by presenting for services at Strut, as measured by recorded app metrics or manual calculations of paper screeners when applicable.
Objective #2	By the end of each contract year, at least 170 PLWARH with AUDIT-C scores S4 will have completed a SIP counseling session, as measured by the data collection tools developed in collaboration with SFPDH.
Objective #3	By the end of each contract year, at least 90% of SIP participants will report satisfaction with the intervention during the post-intervention evaluation, as measured by the anonymous survey completed by all participants immediately after the counseling session, before leaving SFAF.
Objective #4	By the end of each contract year, at least 110 participants will self-report positive change in binge drinking and/or sexual HIV risk when participating in a one-month follow up, as measured by SIP data collection tools.
San Francisco AIDS Foundation	Syringe Access and Disposal Services (Cat #8)
Objective #1	By the end of each contract term, Syringe Access Collaborative/San Francisco AIDS Foundation will report on the percentage of HIV tests among people who inject drugs.
Objective #2	By the end of each contract term, Syringe Access Collaborative/San Francisco AIDS Foundation will report on linkage to care rates among newly diagnosed people who inject drugs, as defined by attending first medical appointment within three months of diagnosis.
Objective #3	By the end of each contract term, Syringe Access Collaborative/San Francisco AIDS Foundation will report a 70% retention rate among HIV-positive people who inject drugs, retention defined as having had a doctor's appointment, prescription refill, and/or lab work per treatment plan within the past six months.
San Francisco AIDS Foundation	Syringe Access & Disposal Services – 6th Street Harm Reduction Center (Cat #8)
Objective #1	By the end of each contract term, Syringe Access Collaborative/San Francisco AIDS Foundation will report on the percentage of HIV tests among people who inject drugs.
Objective #2	By the end of each contract term, Syringe Access Collaborative/San Francisco AIDS Foundation will report on linkage to care rates among newly diagnosed people who inject drugs, as defined by attending first medical appointment within three months of diagnosis.
Objective #3	By the end of each contract term, Syringe Access Collaborative/San Francisco AIDS Foundation will report a 70% retention rate among HIV-positive people who inject drugs, retention defined as having had a doctor's appointment, prescription refill, and/or lab work per treatment plan within the past six months.
San Francisco AIDS Foundation	Syringe Access & Disposal Services – Syringe Sweeps Program (Cat #8)
Objective #1	By the end of each program year, the Syringe Clean-up Team will collect at least 120,000 syringes annually as documented by disposal clean-up logs.
San Francisco AIDS Foundation	PrEP Services for AAMSM (GTZ)
Objective #1	By the end of the Contract Term, 40 new participants will report having initiated PrEP (i.e., took the first dose of medication).
Objective #2	By the end of the Contract Term, at the six-month follow-up, 70% of clients who initiated PrEP and for whom follow-up data is available will report still being on PrEP.
San Francisco AIDS Foundation	HIV Testing in a Sub Use Tx Setting (HIV Set Aside)
Objective #1	By the end of the contract term, SFAF will report on the percentage of tests among people who inject drugs.
Objective #2	By the end of the contract term, SFAF will report on linkage to care rates among newly diagnosed people who inject drugs as defined by attending first medical appointment within 3 months of diagnoses.
Objective #3	By the end of the contract term, SFAF will report a 70% retention rate among HIV-positive among people who inject drugs, retention as defined by having had a doctor's appointment, prescription refill or lab work per treatment plan within the past six months.
SFPDH JHS	Jail Health Services HIVIS Testing
Objective #1	By the end of each term, 85% of patients testing HIV-positive will receive their preliminary and confirmed HIV test results.
Objective #2	By the end of each term, 85% of patients testing HIV-positive will be linked to the HIV-IS CoE for primary care while in custody.
Objective #3	By the end of each term, 85% of patients testing HIV-positive will be referred to the LINCOS team and will be provided with options for notifying their sexual and/or needle-sharing partners as part of disclosure services.
Objective #4	By the end of each term, 85% of patients testing HIV-positive will have follow up HIV+ labs drawn by the Prevention Team.
SFPDH STD Prevention and Control	HIV Testing, Partner Services, and Linkages to Care – STD Program (Cat #1)
Objective #1	By the end of each contract term, program staff will conduct a total of 5400 HIV tests for HIV negative/unknown MSM (including TMSM), IDU and TFMSM as measured by ISCHTR, Evaluation Web and/or HPS acute infection data.
Objective #2	By the end of each contract term, the program will distribute 80,000 condoms annually as measured by invoices or some other system.
SFPDH Tom Waddell	SFPDH Tom Waddell Urban Health Center HCV Screening, Treatment, & Coordination (HCV)
Objective #1	By the end of each contract year, local HCV Treatment registries will be updated at four additional sites as measured by a log on file with the Population Health Division HCV Lead.
Objective #2	Throughout the contract year, monthly HCV data reports will be produced as measured by a log on file with the Population Health Division HCV Lead.

FY 20-21 Community Health Equity and Promotion (CHEP) Performance Objectives

Agency	Program & Objectives
UCSF Alliance Health Project	HIV Testing (Cat #1)
Objective #1	By the end of the contract term, 60% of HIV-negative/unknown status MSM, IDU, and TFMS clients of UCSF Alliance Health Project HIV Counseling & Testing Program will report having had an HIV test in the prior 6 months, as measured or documented by self-report or EvaluationWeb.
Objective #2	By the end of the contract term, 60% of HIV-negative/unknown status MSM, IDU, and TFMS clients of UCSF Alliance Health Project HIV Counseling & Testing Program will report having had an HIV test in the prior 6 months, as measured or documented by self-report or EvaluationWeb.
Objective #3	By the end of the contract term, 90% of people testing HIV-positive at Alliance Health Project HCAT will be offered partner services as measured by EvaluationWeb.
Objective #4	By the end of the contract term, Alliance Health project HPCAT will distribute 6,500 condoms annually as measured by invoices.
UCSF Alliance Health Project	PrEP Navigation (GTZ)
Objective #1	By the end of the funding year, 60 new participants from the target community will report having initiated PrEP (i.e. took the first dose); as documented by client files, surveys, or medication logs.
Objective #2	By the end of the funding year, 80% of new participants who initiate PrEP (i.e. took the first dose) will report having taken the first dose within three months of decision; as documented by client files, surveys, or medication logs.
Objective #3	At 6-month follow-up, 70% of clients who initiated PrEP (i.e. took the first dose) and for whom follow-up data are available will report still on PrEP; as documented by client files, surveys, or medication logs.
UCSF DSAAM	Hepatitis C Treatment in an Opiate Treatment Outpatient Program (OTOP) (HCV)
Objective #1	During fiscal year 2020-21 (7/1/20-6/30/21), the OTOP HCV RN will have 500 patient encounters for HCV Care Coordination Services. The same patient encounters are expected for fiscal years, 2021-22, 2022-23, 2023-24, 2024-25, and 2025-26.
Objective #2	During fiscal year 2020-21 (7/1/20-6/30/21), 40 patients will successfully complete HCV treatment via DOT at OTOP as measured by completion of the prescribed treatment regimen based on medication dosing records in the Methasoft electronic database at OTOP. The same number of patients are expected for fiscal years, 2021-22, 2022-23, 2023-24, 2024-25, and 2025-26.
UCSF DSAAM	HIV Treatment Support (HIV Set Aside)
Objective #1	By the end of the contract term, 95% of HIV-infected patients with detectable HIV viral load will receive at least one treatment adherence intervention by a medical or nursing provider within a month from the time that the detectable viral load is discovered.
Objective #2	By the end of the contract term, 90% of HIV-infected patients entering methadone maintenance who have not seen an HIV primary care provider in the prior six-months will be offered linkage or re-linkage to care.
Objective #3	By the end of the contract term, 100% of patients who have new positive HIV test results are offered linkage to HIV care at the time of test results disclosure to the patient.
Objective #4	By the end of the contract term, 95% of patients of negative or unknown status in treatment will be offered an HIV test.
UCSF Positive Health Program	Rapid and Retention Coordination at Ward 86 & STD services at Ward 86 (GTZ)
Objective #1	Continue STI screening education for staff at Ward 86 and at other SFGH Campus clinics and Urgent Care
Objective #2	Develop a standard workflow for STI screening and treatment.
Objective #3	Add PrEP educational fliers to STI Partner Packs.
Westside	HIV Testing in a Community Health Center (HIV Set Aside)
Objective #1	All HIV-negative/unknown status clients will be offered an HIV test.
Objective #2	At least 70% of HIV negative/unknown status clients of supported programs will report having had an HIV test in the prior 6 months, as measured by self-report and data on linkage to testing.
3rd St. Youth Center & Clinic	STD Evaluation, Screening, Testing, DX & TX for Youth of Color
Objective #1	By the end of each of the contract periods, 85% of Third Street Youth Center and Clinic clients testing positive for gonorrhea and/or chlamydia will be treated within seven working days of receipt of the lab report.
Objective #2	By the end of each of the contract periods, 85% of Third Street Youth Center and Clinic clients testing positive for syphilis will be treated within three working days of receipt of the lab report.
Objective #3	The number of patients diagnosed with gonorrhea, chlamydia, and syphilis will be tabulated along with the date of lab report and date of treatment. This information will be compared to the same information for the previous year to determine the percentage of Third Street Youth Center and Clinic patients that are receiving treatment within seven working days of receipt of lab report.
