### **Chapter 1. Authorization**

The Health Commission issues this regulation pursuant to Sections 4.104 and 4.110 of the Charter of the City and County of San Francisco ("City"). The Refuse Collection and Disposal Ordinance of 1932 (as amended and re-codified, in part -- San Francisco Health Code ("SFHC"), Article 6) ("Initiative Ordinance"), authorizes the Director ("Director") of San Francisco Department of Public Health ("Department") to implement this regulation. The Director has delegated this authority to the Director of the Environmental Health Branch. Pursuant to Resolution 259-92, adopted on April 7, 1992, the Board of Supervisors designated the Bureau of Environmental Health Services, now known as the Environmental Health Branch, as the Local Enforcement Agency charged with the enforcement of the California Integrated Waste Management Act of 1989, California Public Resources Code Section 40000 *et seq.*, and its implementing regulations.

### **Chapter 2. Background**

Section 4 of the Initiative Ordinance prohibits any person or entity from collecting, transporting, or disposing of refuse in the City unless they have a license from the Director ("License"), and if applicable, a permit to operate on certain designated routes ("Permit"). In 1992 and 1999, the Health Commission adopted regulations for the issuance of refuse collection permits for federal facilities and facilities under the management and control of the City at Treasure Island and Yerba Buena Island ("TI/YBI") ("1992 Refuse Regulation" and "1999 Refuse Regulation," respectively). With the development of private residences on TI/YBI, it is appropriate for the Director to issue licenses and permits to allow for adequate refuse Service on TI/YBI. These private residences are not subject to the 1992 or 1999 Regulations. Therefore, this regulation is written with the intent to clarify the requirements and procedures that any person, firm, or corporation who is interested in providing refuse Service within the City is required to follow to obtain a license or permit in accordance with the requirements set forth in the Initiative Ordinance and Article 6 of the SFHC.

### **Chapter 3. Scope**

The Health Commission hereby adopts this regulation for the issuance of licenses and permits for refuse Service within the City. This regulation serves to carry out the City's responsibilities under federal, state, and local laws which set forth requirements for the handling of refuse. This regulation also protects the public health and welfare by regulating the Collectors that provide refuse Service in the City.

This regulation shall apply to any Applicant proposing to provide refuse Service within the City, including any land that becomes part of the City after the enactment of this regulation. This regulation provides both

procedural and substantive requirements for issuance of a license to the Applicant to qualify as a Collector and the issuance of a permit to the Collector to provide Service on certain designated routes. This regulation does not govern the issuance of refuse collection permits for federal facilities or facilities under the management and control of the City on TI/YB, which are subject to the 1992 and 1999 Regulations, respectively. This regulation does not apply to persons, firms, or corporations who collect, transport, or dispose of only refuse that has a commercial value, including, for example wastepaper.
