

Home-Based Environmental Services For People With Asthma in San Francisco

In one room-by-room visual assessment of the home, we will provide the following services in English, Spanish, and Cantonese:

Education

- * Identify conditions in the home that can trigger asthma symptoms (e.g. excess moisture, dust mites, second hand smoke, pest and pet allergens).
- * Provide educational information booklets and fact sheets.

Skill Building

- * Learn techniques for eliminating or reducing asthma triggers in the home.
- * Develop an action plan to manage asthma triggers based on need.
- * Identify community resources that may assist in managing triggers (such as location of allergy-control supply stores and home health aid services).

Provision of Allergy Control Products and Service Referrals

- * Inform client about efficacious allergy-control products and where to get them.
- * Provide certain allergy-control products such as mattress & pillow covers.
- * Assist with referrals for housework, building & environmental health problems including housing code.

Asthmatics living in San Francisco can be referred for these services by their medical provider. Simply have your medical provider complete the [MEDICAL PROVIDER REFERRAL FORM](#) and fax it back with the [ASTHMA HOME ACTION PLAN](#) to David Lo at (415) 252-3889. For more information, please contact David Lo at: 415-252-3929 or david.lo@sfdph.org.
