**Hours of Operation:** M – F 8am – 5pm  
**Non-English Languages:**  
**Coordinator:** Aline Armstrong, RN, PHN, MSN  
**Fee:** None

**Brief Program Description:**

Collect and analyze significant factors surrounding the deaths of fetuses (>20 weeks) and infants (up to 12 months old) whose parents are San Francisco residents. This information is reviewed by a multi-disciplinary team, recommendations are made and appropriate interventions are done. Findings are reported to the State FIMR program. An annual community report of the findings, recommendations and interventions is disseminated to appropriate individuals and groups. Individual cases are referred to DPH Public Health Nursing for grief support, nursing assessment and follow-up of the family.
