

Evaluation Framework Diagram (Overarching) | June 2019

This diagram shows the overarching model of how SDDT money/activities and non-SDDT activities will improve health and equity outcomes.

- The three fields represent different levels of impact (system, organization, individual).
- The activities in circles represent how a funded entity (city agency, large grantee, or grassroots grantee) will use money.
- The dashed lines represent the process through which their activity will improve an impact category of concern to the evaluation.
- The solid lines represent the additional effects those initial outcomes will have toward advancing impacts at other levels.

..... Impact Process

— Additional Effects

Evaluation Framework Diagram (Theoretical Examples) | June 2019

- This diagram specifies theoretical impact categories to show how SDDT money will be used to improve health and equity outcomes.
- The three fields represent different levels of impact (system, organization, individual).
 - The activities in circles represent how a funded entity (city agency, large grantee, or grassroots grantee) will use money.
 - The dashed lines represent the process through which their activity will improve an impact category of concern to the evaluation.
 - The solid lines represent the additional effects those initial outcomes will have toward advancing impacts at other levels.
