

San Francisco Food Security Task Force Food Security Screening Policy Recommendations

BACKGROUND: San Francisco invests heavily in meeting the food and nutrition needs of its most vulnerable residents. This investment includes a robust privately- and publicly-funded safety net of food support and implementation of food insecurity screening in diverse settings.

An important goal of San Francisco’s Food Security Task Force is to provide city-wide coordination of food security efforts in order to maximize their impact. Consistent assessment of food insecurity across diverse settings would allow San Francisco to more effectively track progress toward eliminating hunger, coordinate services, and assess the impact of new policies and programs. Therefore, the San Francisco Food Security Task Force recommends the adoption of a consistent, city-wide food security screening protocol.

SUMMARY OF RECOMMENDATIONS: Tracking food insecurity in San Francisco requires assessment of 2 essential components:

1) **Food security:** The USDA’s Household Food Security Survey Module is recognized nationally as the gold standard for food security screening. We recommend the use of either of two validated, shortened versions of this survey module. These items are intended to be administered to adults and are also validated in Spanish (page 5) and Chinese (page 6). The SF Food Security Task Force is working on obtaining translations into other languages. Food insecurity assessment in children/adolescents may differ (page 4).

2) **Food program utilization:** A strength of San Francisco’s mature hunger safety net is its capacity to offer frequent, reliable food access to people who need it to meet their caloric and nutritional needs. Our system is often so good at achieving this goal that many people who regularly use it no longer view themselves as food insecure. This is good; it shows our programs are working. However, it is problematic from a tracking perspective because we have no way to capture the high-risk population of residents who are only food secure because they rely on San Francisco’s food programs. Assessing food program utilization ensures that we are also tracking the needs of individuals who would be immediately food insecure in the absence of the hunger safety net. This question is also designed to allow organizations to efficiently assess the extent to which their programs are reaching target populations and inform coordination of programmatic efforts.

	BRIEF Assessment	COMPREHENSIVE Assessment
Food security (Page 2)	<u>2-item</u> Advantages: minimizes respondent and administrator burden Disadvantages: can only differentiate food security and food insecurity	<u>6-item</u> Advantages: allows differentiation of food security, low food security, and very low food security Disadvantages: requires additional administration time
Food program utilization (Page 3)	<u>1-item</u> Advantages: minimizes respondent and administrator burden Disadvantages: does not capture utilization of all services; lower sensitivity and specificity <u>Ideally, “yes” responses are followed with the COMPREHENSIVE food program utilization assessment.</u>	Advantages: captures utilization frequency and types of services used Disadvantages: requires additional time

SCREENING QUESTIONS - Food Security

2-Item Assessment (BRIEF)
Read the statements below that people have made about their food situation. For each statement, please check the box for whether the statement was often true, sometimes true, or never true for your household in the last 12 months.
1. “We worried whether our food would run out before we got money to buy more.” Was that often true, sometimes true, or never true for your household in the last 12 months? <input type="checkbox"/> Often true <input type="checkbox"/> Sometimes true <input type="checkbox"/> Never true
2. “The food that we bought just didn’t last and we didn’t have money to get more.” Was that often, sometimes, or never true for your household in the last 12 months? <input type="checkbox"/> Often true <input type="checkbox"/> Sometimes true <input type="checkbox"/> Never true
<u>Scoring:</u> A response of “often true” or “sometimes true” to either or both questions is considered “Food Insecurity”

6-Item Assessment (COMPREHENSIVE) (Note this scale is historically referred to as the “6-Item Assessment” even though two of the original items are combined into one in order to facilitate self-administration.)	
Read the statements below that people have made about their food situation. For each statement, please check the box for whether the statement was often true, sometimes true, or never true for your household in the last 12 months.	
1. “The food that we bought just didn’t last, and we didn’t have money to get more.” Was that often, sometimes, or never true for you/your household in the last 12 months? <input type="checkbox"/> Often true <input type="checkbox"/> Sometimes true <input type="checkbox"/> Never true	
2. “We couldn’t afford to eat balanced meals.” Was that often, sometimes, or never true for you/your household in the last 12 months? <input type="checkbox"/> Often true <input type="checkbox"/> Sometimes true <input type="checkbox"/> Never true	
3. In the last 12 months, did you ever cut the size of your meals or skip meals because there wasn’t enough money for food? If yes, how many days did this happen? <input type="checkbox"/> Yes, almost every month (in the last 12 months) <input type="checkbox"/> Yes, some months but not every month (in the last 12 months) <input type="checkbox"/> Yes, only 1 or 2 months (in the last 12 months) <input type="checkbox"/> No	
4. In the last 12 months, did you ever eat less than you felt you should because there wasn’t enough money for food? <input type="checkbox"/> Yes <input type="checkbox"/> No	
5. In the last 12 months, were you ever hungry but didn’t eat because there wasn’t enough money for food? <input type="checkbox"/> Yes <input type="checkbox"/> No	
<u>Scoring:</u> Add up points as described below:	Total score
Item 1: “often” or “sometimes” gives 1 point.	0 = Food security
Item 2: “often” or “sometimes” gives 1 point.	1 = Marginal food security
Item 3: “yes, almost every month” or “yes, some months but not every month” gives 2 points. “Yes, only 1 or 2 months” gives 1 point.	2-4 = Low food security
Item 4: “yes” gives 1 point	5-6 = Very low food security
Item 5: “yes” gives 1 point	

Notes:

1. The two-item version has been validated across populations. See Erin Hager et al, Pediatrics, 2010 and Craig Gundersen et al, Public Health Nutrition, 2017. It is also referred to as the **Hunger Vital Sign™** (<http://childrenshealthwatch.org/public-policy/hunger-vital-sign/>).

2. These questions are validated in English, Spanish, and Chinese. The SF Food Security Task Force will be working to obtain translations into other languages.

SCREENING QUESTIONS - Food Program Utilization

1-item Assessment (BRIEF)

In the last 12 months, have you or anyone in your household gotten food from a free food program like a food pantry, free dining room, shelter meal, or senior congregate meals? Include school meals, CalFresh, and WIC.

Yes

No

COMPREHENSIVE Food Program Utilization Assessment

For the COMPREHENSIVE food program utilization assessment, organizations may omit rows that are not of interest or relevant to the population served.

In the last 12 months, how often did you or anyone in your household get <u>free or low-cost</u> food from:	Often (about weekly)	Sometimes (about monthly)	Rarely (about yearly)	Never

For more information about these resources, call 2-1-1.

Notes:

1. The COMPREHENSIVE assessment was tested in January and February 2017 among more than two dozen vulnerable San Francisco residents. It was chosen over other assessments because it was *simpler, more acceptable*, and often *faster* to complete than shorter versions.
2. Assessments such as these often generate respondent questions about how to access additional resources on this list. Organizations may wish to prepare for such questions. 2-1-1 is a helpful resource.

Food Insecurity Screening for Adolescents

Unlike food insecurity screening in adults, there is no gold standard brief screening measure for adolescents. One brief food insecurity screener for adolescents is described below. If possible, these questions should be asked confidentially, or not in the presence of a parent or caregiver.

2-Item Assessment for Adolescents
For each statement, please tell me whether the statement was often true, sometimes true, or never true based on your experiences in the past 12 months.
1. "I worried about not having enough to eat." Was that often, sometimes, or never true for you in the last 12 months? <input type="checkbox"/> Often true <input type="checkbox"/> Sometimes true <input type="checkbox"/> Never true
2. "I tried not to eat a lot so the food at home would last." Was that often, sometimes, or never true for you in the last 12 months? <input type="checkbox"/> Often true <input type="checkbox"/> Sometimes true <input type="checkbox"/> Never true
<u>Scoring:</u> A response of "often true" or "sometimes true" to either or both questions is considered food insecure.
