Methodology and Other Notes on Data Analysis	A	SRO Hotel Census was conducted by SRO Collaborative in Apr/May 2000 determined 453 families with children residing in SROs. Census also identified # of hotel rooms, family size, ethnicity, preferred language, and number of children in each family. Data was obtained directly from families and/or neighbors and hotel managers. *All SRO hotels listed on DBI database were reached (400), 82 were found to be converted to tourist hotels, 8 were vacant, 9 hotel managers did not allow census takers to enter premises, and 2 hotels were not located by outreach workers.																								
	B	Indepth interviews were conducted by SRO Collaborative members with 195 families (a 43% sample). Interviews confirmed that sample represented the profile identified in the Census, thus percents identified from interview sample were believed to generally apply to the greater numbers identified in census. That is, the percents noted above are actuals from interviews, the numbers noted above were calculated by multiplying the percents and rates to the 453 families.																								
	C	The row numbers highlighted above (rows 97, 98, 118, 133, 161, 182, and 186) note that the response to these specific questions was small enough that we did generalize the percent of the specific answers to 453 families. We did apply the response percent to the 453.																								
	D	Sample	SF Total	Chinatown	Mission	Tenderloin	SoMa	Other																		
		Number and percent of all families identified in census:	453	100%	279	62%	52	11%	58	13%	16	4%	48	11%												
	Number and percent of all families interviewed:	195	100%	95	49%	36	18%	35	18%	10	5%	19	10%													
	Sample of families interviewed to families identified in census:	43%		34%		69%		60%		63%		40%														
	*	Family Members include Caregivers, Children, and Dependent Adults																								
	**	Families in SoMa show more expenses than income. It is not clear if this is a problem with how the questions were posed to the families, errors in answers and/or documentation, and/or if families were hesitant to report other types of earned income.																								
	***	Due to a printing error, only 151 (77%) of the 195 interview forms contained this question. The percentages are adjusted according to a total of 151 respondents.																								

2 Total Families Residing in SROs & % of families by district

	# Families
Chinatown Families = 62%	279
Mission Families = 11%	52
