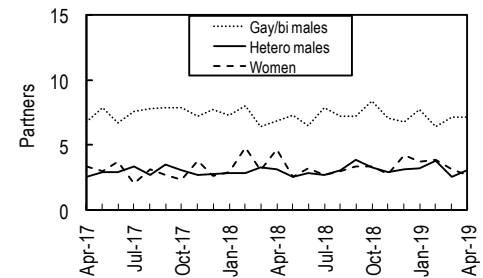

Figure 3. Average number of recent* sex partners for City Clinic visits by gender and sexual orientation. *Recall period is 3 months.

Release of 2017 STD Annual Summary

The 2017 San Francisco STD Annual Summary is now available online:
<https://www.sfdph.org/dph/files/reports/StudiesData/STD/SFSTDAnnSum2017.pdf>

This report provides detailed information about the epidemiology of STDs in San Francisco, highlighting differences in disease trends by demographics such as age, race/ethnicity, gender of sex partners, and provider type.

The ability to understand the sexual health trends and needs in San Francisco relies on information submitted on the Confidential Morbidity Report (CMR) form. **Providers are reminded that complete and timely submission of CMRs is mandated in the health code.** Complete case reporting is integral to our ability to identify key populations at high risk of STD infection. These surveillance data are analyzed to inform prevention and testing programs and policies. We are committed to using these data to improve our prevention efforts, and to show them widely through multiple channels, including our monthly and annual reports.

The current CMR is available here: <http://sfccityclinic.org/providers/Reportable-Diseases-List-CMR-SFDPH-FINAL-07.17.2018.pdf>
