

San Francisco Monthly STD Report

Data for May, 2016
Report prepared June 21, 2016

Table 1. STDs among residents, May, 2016.

	2016		2015	
	month	YTD	month	YTD
Gonorrhea	388	1,978	343	1,690
Male rectal gonorrhea	114	577	93	428
Chlamydia	592	3,236	566	2,810
Male rectal chlamydia	158	875	132	609
Syphilis (adult total)	84	563	100	594
Primary & secondary	32	226	41	213
Early latent	42	249	44	299
Unknown latent	2	11	3	12
Late latent	8	77	12	70
Neurosyphilis	1	10	1	11
Congenital syphilis	0	0	0	0
PID	4	23	5	44

Figure 1. Monthly STD trends for San Francisco. Syphilis cases different scale.

Table 2. Selected STD cases and rates for San Francisco by age and race/ethnicity, 2016 through May only. Rates equal cases per 100,000 residents per year based on 2000 US Census data.

	(All races)		Asian/PI		African American		Hispanic		White	
	cases	rate	cases	rate	cases	rate	cases	rate	cases	rate
All ages										
Chlamydia	3,236	999.9	383	364.2	321	1,202.4	479	1,049.8	1,198	848.4
Gonorrhea	1,978	611.2	172	163.6	227	850.3	310	679.4	952	674.2
Early syphilis	475	146.8	50	47.6	49	183.6	94	206.0	249	176.3
Under 20 yrs										
Chlamydia	214	999.8	19	209.3	66	2,405.7	52	1,126.5	23	497.6
Gonorrhea	44	205.6	3	33.0	16	583.2	10	216.6	7	151.4
Early syphilis	0	0.0	0	0.0	0	0.0	0	0.0	0	0.0

Table 3. HIV testing among City Clinic patients, May, 2016.

	2016		2015	
	month	YTD	month	YTD
Tests	531	2,659	488	2,353
Antibody positive	5	27	5	23
Acute HIV infection	2	3	1	2

Note: All statistics are provisional until the annual report is released for the year. Morbidity is based on date of diagnosis. Totals for past months may change due to delays in reporting from labs and providers.

Figure 3. Average number of recent* sex partners for City Clinic visits by gender and sexual orientation. *Recall period is 3 months.

UCSF New Generation Health Center to remain open until June 2017

In May 2016, UCSF announced that the New Generation Health Center (New Gen), which was at risk of closure due to a budget deficit, would remain open for another year. New Gen is a critical partner in STD prevention and control efforts in San Francisco because it serves low-income adolescents and young adults of color who are at disproportionate risk for poor sexual health. Keeping New Gen open reflects the shared commitment of community advocates, UCSF, and the San Francisco Department of Public Health (SFPDH) to ensure confidential and youth-friendly sexual health services for those most in need.

Throughout San Francisco, SFPDH continues to recommend annual chlamydia and gonorrhea screening for all women 25 years and younger.

- In 2014, the chlamydia rate for adolescents and young adults ages 15 through 25 was 3 times greater and the gonorrhea rate was 1.5 times greater than for adults over the age of 25.
- In 2014, the rate of chlamydia among Black/African-American youth was 5.9 times greater than for white youth. Similarly, the rate of gonorrhea among Black/African-American youth was 6.5 times greater than the rate for white youth.

SFPDH will continue to work to ensure sexual health services are available to all, and to eliminate STD health disparities in San Francisco. TQN/SP
