Figure 3. Average number of recent\* sex partners for City Clinic visits by gender and sexual orientation. \*Recall period is 3 months.

## (1) Updated STD Treatment Guidelines

Last month, the Centers for Disease Control and Prevention (CDC) published its updated Sexually Transmitted Diseases Treatment Guidelines, 2015 and developed resources for clinicians including:

**Apple STD Tx Guide 2015 App** – Easy-to-use mobile reference enabling providers to quickly and easily access STD treatment and diagnostic information. The [free app](#) is currently available for Apple devices; the Android app is expected later this summer.

**Wall Chart and Pocket Guide** – Provide overview of CDC's 2015 STD Treatment Guidelines. The full guidelines and clinician resources are available at [www.cdc.gov/std/tg2015](http://www.cdc.gov/std/tg2015). The guidelines are also on the City Clinic website: [www.sfcityclinic.org](http://www.sfcityclinic.org). Changes of note will be highlighted in upcoming issues of this report.

## (2) Recommended Meningococcal Vaccination for men who have sex with men from Chicago

As of June 2015, due to an increase in cases of meningococcal disease in Chicago among men who have sex with men (MSM), meningococcal vaccination is recommended for San Francisco gay, bisexual, and transgender male to female persons, and others who expect to have close or intimate contact with MSM from Chicago. Additional information, including where the vaccine is available, is on the health department's website: <http://www.sfcdep.org/meningococcal.html>. TQN
