The San Francisco Department of Public Health (SFPDH) **LINCS** team (comprised of disease intervention specialists) ensures patients with syphilis are treated and confidentially provides prevention treatment and tests to their sex partners.

- ❖ **LINCS** partner services are voluntary and offered by skilled and client-centered SFPDH staff.
- ❖ Please encourage patients to work with us at SFPDH to prevent syphilis and help them stay healthy.
- ❖ To contact **LINCS**, call 415-487-5531 and fax to 415-431-4628 a confidential morbidity report (<https://www.sfcityclinic.org/providers/reporting>).

UPDATED Tip Sheet for Safer Sex During the COVID-19 Pandemic

On September 5, SFPDH updated its sexual health guidance to provide information about what is known about COVID-19 risk in relation to sexual activity and offers more detailed suggestions to have safer sex and reduce the risk of COVID-19.

Exposure to COVID-19 can occur during sexual activities through direct contact and potential exchange of saliva, semen, mucus and feces; COVID-19 has not been identified in vaginal fluids. **All San Franciscans are required to wear a face covering when outside their residence and within six feet of other people who are not members of their household.** To minimize exposure to COVID-19 if you do have sex with others, keep your partners to a small, stable group and avoid group sex. If you usually meet your sex partners online or make a living by having sex, consider taking a break from in-person dates. Video dates, sexting or chat rooms may be options for you.
