STD Prevention and Control Services has released its 2010 annual summary showing increases in all three reportable, bacterial STDs. Compared to 2009, the rate of chlamydia in San Francisco increased by 9.9% in 2010. During the same period, reported gonorrhea increased by 8.6% and early syphilis increased a dramatic 26.4%. In 2010, 4,597 cases of chlamydia were reported to the San Francisco Department of Public Health for a rate of 570.9 per 100,000. One-thousand nine-hundred forty-two cases of gonorrhea were reported for a rate of 241.2 per 100,000. In 2010, 659 early syphilis cases were reported (81.8 per 100,000). The STD Section continues to prioritize activities directed toward STD prevention in the highest risk populations in San Francisco, adolescents and men who have sex with men. The entire 2010 annual summary is available at [http://www.sfdph.org/dph/files/reports/default.asp#annlSTD](http://www.sfdph.org/dph/files/reports/default.asp#annlSTD). KB
