

San Francisco Monthly STD Report

Data for October, 2014
Report prepared November 24, 2014

Table 1. STDs among residents, October, 2014.

	2014		2013	
	month	YTD	month	YTD
Gonorrhea	317	2,685	280	2,122
Male rectal gonorrhea	80	725	97	689
Chlamydia	563	4,943	482	4,266
Male rectal chlamydia	141	1172	117	996
Syphilis (adult total)	106	1061	94	991
Primary & secondary	39	387	31	420
Early latent	53	520	50	440
Unknown latent	2	8	0	1
Late latent	12	146	13	130
Neurosyphilis	0	9	1	12
Congenital syphilis	0	0	0	0
PID	6	89	14	72

Figure 1. Monthly STD trends for San Francisco. Syphilis cases different scale.

Table 2. Selected STD cases and rates for San Francisco by age and race/ethnicity, 2014 through October only. Rates equal cases per 100,000 residents per year based on 2000 US Census data.

	(All races)		Asian/PI		African American		Hispanic		White	
	cases	rate	cases	rate	cases	rate	cases	rate	cases	rate
<i>All ages</i>										
Chlamydia	4,943	763.7	680	323.3	700	1,311.1	702	769.3	1,680	594.9
Gonorrhea	2,685	414.8	184	87.5	427	799.8	428	469.0	1,291	457.1
Early syphilis	907	140.1	70	33.3	81	151.7	183	200.5	498	176.3
<i>Under 20 yrs</i>										
Chlamydia	398	929.7	49	269.8	147	2,679.1	67	725.7	45	486.8
Gonorrhea	105	245.3	7	38.6	51	929.5	14	151.6	10	108.2
Early syphilis	3	7.0	0	0.0	2	36.5	0	0.0	1	10.8

Table 3. HIV testing among City Clinic patients, October, 2014.

	2014		2013	
	month	YTD	month	YTD
Tests	522	5,124	564	5,637
Antibody positive	3	48	5	57
Acute HIV infection	0	2	1	20

Note: All statistics are provisional until the annual report is released for the year. Morbidity is based on date of diagnosis. Totals for past months may change due to delays in reporting from labs and providers.

Figure 3. Average number of recent* sex partners for City Clinic visits by gender and sexual orientation. *Recall period is 3 months.

Expanding PrEP Access in San Francisco

Since September 2012, San Francisco City Clinic has been participating in a 3-site pre-exposure prophylaxis (PrEP) Demonstration Project. The study has demonstrated that there is a high demand for PrEP in San Francisco across age, race/ethnicity and education levels. Preliminary data suggest high levels of adherence and retention throughout the 48-week study, and 94% of participants surveyed expressed an interest in continuing PrEP after the study's completion. **At the beginning of 2014, San Francisco City Clinic began a PrEP pilot program to provide navigation assistance to former Demo Project participants who wanted to continue on PrEP and to other City Clinic clients who wanted to access PrEP for the first time.** Over the past seven months, we have conducted over 200 consultations regarding PrEP through the pilot program. These consultations included providing PrEP education and helping insured clients access PrEP through their primary care providers. Uninsured clients are provided counseling regarding how to access health insurance through the Affordable Care Act. In addition, we have initiated 50 clients on PrEP who were unable to access PrEP through primary care either because of a lack of insurance, cost, or other access related barriers.

For questions about the PrEP pilot program, call: 415-487-5537. Research on PrEP continues with current studies looking at the safety and efficacy of dosing regimens besides daily dosing, microbicide gels, and long-acting injectable PrEP formulations.
