Improving the Health of Residents in SRO Hotels

Health Impact Assessment

San Francisco Department of Public Health
Office of Policy and Planning
Introduction:

*Issue Addressed*

In September of 2013, the San Francisco Health Commission passed a resolution requesting that SFDPH carry out an HIA to evaluate conditions to improve the health of residents in Single Resident Occupancy Hotels (SROs).
Process:  
*Policy Proposal*

**KEY ISSUES:**

Informed by 22 in-depth interviews and 3 stakeholder meetings with representatives of SFDPH, non-profit providers, and other City agencies, the HIA is focused on strategies to improve SRO management and reduce health and housing code violations in support of safer SRO environments.

Key health-related issues include:

- Unsanitary living conditions
- Safety
- Mental health
- Interagency coordination
Assessment: *Baseline Conditions. Neighborhood Health Status, SRO Operator Focus Groups*

- **SRO Facilities** – Older, located mostly in 6 zip codes, top 5 violations animals/pests; mold; refuse; sanitation; and structural conditions.

- **Hospitalization and ER Rates** in zip codes associated with common violation types high than City Averages. Adult asthma rates 2x, fall 2-3x, & self-inflicted Injuries 3-4X City Average

- **Fragmentation of City Codes.** Lacke knowledge of primary health outcomes of poor housing quality an how to work wit5h tenants
Recommendations:

Establish a training for SRO operators that focuses on successfully working with the SRO tenant populations, increasing knowledge of health outcomes, and understanding the role of City agencies and management best practices.

The creation of culturally competent and consolidated educational materials for SRO operators that would serve as a one stop guide.
Standardize and automatically publish housing inspection data, including collection of SRO facility attributes.

Incorporate data analytics into business operations.

Create an interagency housing data sub-committee to establish and track performance measures.
Next Steps

• Investigate existing legislation and pathways for applications
• Evaluate options for implementation and funding
• Opportunities for deeper dives and additional focused analyses
