

City and County of San Francisco
Edwin M. Lee
Mayor

San Francisco Department of Public Health

Barbara A. Garcia, MPA
Director of Health

MEMORANDUM

DATE: May 31, 2017

TO: Dr. Edward Chow, Health Commission President, and Members of the Health Commission

THROUGH: Barbara A. Garcia, MPA, Director of Health

FROM: Colleen Chawla, Deputy Director of Health and Director of Policy & Planning

RE: Proposition Q – St. Mary's Medical Center PROS & Wound Clinic Closure

On February 7th, 2017, St. Mary's advised the Department of Public Health that it had closed its Plastic, Reconstructive, and Orthopedic Surgery (PROS) & Wound Clinic at Dignity Health - St. Mary's Medical Center in San Francisco (St. Mary's) effective August 31, 2016. This memo provides background the regarding this closure for the Health Commission's Proposition Q hearings that will take place on June 6, 2017 and June 20, 2017.

PROPOSITION Q

Proposition Q, passed by San Francisco voters in November 1988, requires private hospitals in San Francisco to provide public notice prior to closing a hospital inpatient or outpatient facility, eliminating or reducing the level of services provided, or prior to the leasing, selling or transfer of management. Upon such notice, the Health Commission is required to hold a public hearing during which the hospital shall be afforded an opportunity to present any information relating to its proposed action and to respond to matters raised by any other persons during that hearing. At the conclusion of the public hearing the Health Commission shall make findings based on evidence and testimony from the public hearings and any submitted written material that the proposed action will or will not have a detrimental impact on health care services in the community.

PROS & WOUND CLINIC CLOSURE

St. Mary's PROS & Wound Clinic closed in August 2016. The PROS & Wound Clinic provided a multi-disciplinary approach to care for patients with acute and chronic wounds, including those that required the expertise of plastics and reconstructive, podiatric, and vascular surgeons. On May 17th, 2017, St. Mary's provided the Department of Public Health with information about the closure of the clinic in a memo, attached. St. Mary's stated that the PROS & Wound Clinic was closed due to the \$1.4 million annual loss the facility incurred. At the time of the closure, there was an interim hospital president and leadership team, which has been noted as the reason behind the delay between closure and notification to the Health Commission and the Department of Public Health.

The PROS & Wound Clinic saw an average of 1,026 patients per year and was providing care to 437 patients around the time of closure (June 21, 2016 - August 31, 2016).¹ The following table shows the patients by coverage type during that time. Of the 437 patients, the large majority of patients had either commercial insurance or Medicare coverage.

¹ Data provided by St. Mary's across FYs 2014-2015 and 2015-2016. St. Mary's made efforts to provide unduplicated patient counts.

**PROS & Wound Clinic Patients by Insurance Type
(June 2016-August 2016)**

Coverage Type	N	% of Total
Self-pay or Uninsured	4	0.9%
Medi-Cal	17	3.8%
Medicare & Advantage	205	46.9%
Commercial Insurance	211	48.3%
Total	437	100.0%

Prior to closure, all patients were informed via mail or in-person and information regarding the closure was placed in the clinic and on the website. St. Mary’s cannot confirm whether these notifications were made in any language other than English. St. Mary’s reports that there were no wound care services/treatments unique to their clinic that cannot be provided elsewhere in the city or nearby.

BACKGROUND

Wound Care

Wound Care clinics and centers are facilities that treat chronic or non-healing wounds. These wounds typically do not improve with conventional treatments, and have not healed within 30 days. These types of wounds are often associated with underlying health conditions or procedures such as cancer, diabetes, serious infections, or surgery. Patients most likely affected include: diabetics, amputees, older adults, surgical patients, veterans, cancer survivors, and cardiac patients.²

In the US, the prevalence for chronic wounds is two percent, similar to the prevalence of heart failure.³ Approximately 6.7 million Americans suffer from a non-healing wound, with the most common wounds being pressure ulcers (2.9 million) and Diabetic foot ulcers (2.1 million).² Caring for chronic, non-healing wounds exceeds \$50 billion in costs to the healthcare system per year.³ Wound care is becoming increasingly important with the increased rates of diabetes and obesity in the US.

Studies have shown that wound care treatment facilities have increased wound healing rates, lowered amputation rates, and shortened hospital stays. Clinics may treat acute and chronic wounds of different acuity levels that require basic to advanced treatment options. There are many treatment options that are offered for wounds, starting with basic wound care – debridement, dressings and wraps. Other more advanced options include: bio-engineered tissue substitutes, negative pressure therapy, and hyperbaric oxygen therapy. Non-healing chronic wounds are likely treated as outpatient services in wound care clinics and centers within hospitals or stand-alone locations, but can also be treated in long-term care facilities and as hospital inpatient services.³ There are three wound care clinics/centers in San Francisco, and each facility specializes in particular types of injuries. The San Francisco Health Network operates a Burn and Wound Clinic at Zuckerberg San Francisco General Hospital; the UCSF Center for Limb Preservation & Wound Care serves patients at high risk of foot and leg amputation, especially diabetic patients; the Kaiser Permanente Injury Center treats patients with acute musculoskeletal injuries.

Diabetes

According to the CDC, 29 million Americans are living with diabetes and 86 million have prediabetes. Diabetes is the leading cause of lower-limb amputations, and it is estimated that one-fourth of all diabetics will develop a diabetic foot ulcer that will require amputation.^{4,5} Patients aged 65 years and older are 70% more likely to face amputation and that

³ Fife, C.E., Carter M.J., Walker, B., and Thomson B., (2012). Wound Care Outcomes and Associated Cost Among Patients Treated in US Outpatient Wound Center: Data from the US Wound Registry. *Wounds*; 24(1): 10-17

⁴ Centers for Disease Control and Prevention. (2016). Diabetes. Retrieved from: <https://www.cdc.gov/chronicdisease/resources/publications/aag/diabetes.htm>

⁵ Sen, C.K et al. (2009). Human skin wounds: A major and snowballing threat to public health and the economy. *The International Journal of Tissue Repair and Regeneration*; 17(6):763-771

risk increases with age. Men are twice as likely to have an amputation as women, and black men with diabetes are 56% more likely to experience an amputation compared to their white counterparts.⁵ The most recent CDC data estimates 7.9 percent of San Franciscans are diagnosed with diabetes – roughly 66,800 people. While men and women are equally as likely to develop the condition, blacks or African Americans are 6.6 times more likely to be hospitalized for diabetes than their white counterparts.⁶

Aging Population

Older adults (65 years and older) are the fastest growing population segment in San Francisco and the US. Between 2014 and 2030, San Francisco’s population is projected to grow to 970,000, and the population aged 65 and older will rise from 14% to make up one-fifth of all residents. Over the same period, residents 75 years and over are projected to grow by 42% and comprise 10 percent of the City’s total population. In contrast, the proportion of people aged 25-64 years are expected to shrink by 6.3 percentage points over those same years.⁶ This mirrors national projections that expect the population 65 years and older to grow by 40% and make up 21% of the US population. The proportion of people aged 18-64 years are expected to decrease four percentage points over those same years.⁷

Wound healing slows with age due to changes in the skin that put elderly patients at a substantially greater risk for chronic wounds such as leg ulcers, diabetic foot ulcers, and pressure ulcers. Persons aged 80 years and older are three to four times more likely to develop leg ulcers and five to seven times more likely to develop pressure ulcers than those aged 65 to 70.⁸

According to St. Mary’s, the PROS & Wound Clinic had 10,579 encounters with 2,052 unduplicated patients over fiscal years 2014-2015 and 2015-2016. The average age of the patient population during that period was 60.2 years, and the majority of patients (55%) were non-elderly adults (18-64 years). Still, while adults 65 years and older comprise 14% of the City’s population, they accounted for 44% of unduplicated patients at the clinic. Adults aged 80 years and older make up only two percent of San Franciscans, but nearly one in five clinic patients.

**PROS & Wound Clinic Patient Characteristics
(July 2014- June 2016)**

	N	%
Total Encounters	10,579	
Total Unduplicated Patients	2,052	
Age Group (years)		
Average Age	60.2	
Aged <18	6	0.3%
Aged 18-64	1,137	55.4%
Aged 65+	909	44.3%
Aged 80+	390	19.0%
Coverage Type		
Self-pay or Uninsured	35	1.7%
Medi-Cal	90	4.4%
Medicare or Medicare Advantage	971	47.3%
Commercial Insurance	956	46.6%

That older adults were a disproportionate share of patients at the PROS & Wound Clinic supports the trend that this segment of the population requires extra medical resources and vigilance to address their increased health risks from

⁶ San Francisco Department of Public Health (2016). San Francisco Community Health Needs Assessment 2016. Population Health Division. Retrieved from: <https://www.sfdph.org/dph/files/hc/HCAgen/HCAgen2016/May%2017/2016CHNA-2.pdf>

⁷ Colby, S.L. & Ortman, J.M. (2015). Projections of the Size and Composition of the U.S. Population: 2014-2060. US Census Bureau.

⁸ Gould, L. et al. (2015). Chronic Wound Repair and Healing in Older Adults: Current Status and Future Research. Journal of the American Geriatric Society; 63(3): 427-438.

wounds. With San Francisco’s older adult population increasing in age and numbers, wound care centers may become increasingly necessary moving forward.

OPTIONS FOR WOUND CARE

Of the 437 patients at the time of closure, St. Mary’s is unable to determine whether alternate providers were chosen to continue their care or the number the patients concluding their care before the August 31, 2016 closure. St. Mary’s reported that physicians who provided care at the PROS & Wound Clinic also provide care at alternate locations such as the UCSF Center for Limb Preservation and private practices.⁹ In order to preserve continuity of care, patients were directed to existing physicians’ alternate locations, particularly the centers listed below.¹⁰ Prior to closure, St. Mary’s staff provided referral assistance based on patients’ desires and/or need for continued care. Any potential new patients requiring care were directed to the three centers via the website and voicemail after closure. St. Mary’s has reported that they have not received any patient complaints between closure in August 2016 and May 2017.

Seton Center for Advanced Wound Care
1500 Southgate Avenue
Daly City, CA 94015
650-991-6780

Stanford Healthcare Advanced Wound Care Center
450 Broadway Street, Pavilion B, Suite 17
Redwood City, CA 94063
650-721-8800

UCSF Center for Limb Preservation
400 Parnassus Avenue, 5th Floor
San Francisco, CA 94113
415-353-2357

*** UCSF Center for Limb Preservation only provides wound care for lower extremities*

The Department of Public Health contacted each of the three centers to understand more about the potential impacts of the closure of the St. Mary’s PROS & Wound Clinic. Below is a list of findings:

- Stanford reported that very few St. Mary’s patients transferred.
- Stanford received a few calls regarding patients from a correctional facility where St. Mary’s provided wound care. They saw a few of these patients, but some had to be referred to UC Davis due to the distance to Stanford.
- Seton and UCSF could not easily provide the number/estimate of patients transferred from St. Mary’s.
- All three clinics indicated that that impact of closure does not seem significant for their programs, in terms of new patients.
- Stanford Advanced Wound Care Center and UCSF Center for Limb Preservation reported that they have been growing quickly and are at capacity currently.
- One clinic staff expressed concern that wound care is a much needed service for San Francisco, and it was unfortunate to see St. Mary’s wound clinic close.

CONCLUSION

With the limited data available to understand whether patients from St. Mary’s PROS & Wound Clinic are receiving care elsewhere, it is difficult to conclude the impact of the closure. Wound care is becoming increasingly important with the aging population, increasing rates of diabetes, and high number of patients at surrounding wound care centers. Although there are wound care centers in San Francisco and nearby that can provide care at the same level of acuity, we cannot determine whether these are enough to care for San Franciscans that currently require or will require wound care in the future.

⁹ St. Mary’s physicians: Dr. Charles Lee, Dr. Shant Vartanian, Dr. Alex Reyzelman, Dr. Mher Vartivarian, Dr. Scott Hansen, Dr. Colin Traynor, Dr. Jamie Kim, and Dr. David Young

¹⁰ Stanford HealthCare Advanced Wound Care Center reported that they do not share medical staff with St. Mary’s. They were asked by St. Mary’s in summer 2016 regarding transferring patients, and noted that they had capacity at the time for new patients.

In re: Proposition Q – Health Care Planning Ordinance

Dear Director Garcia:

I write to you today with an issue that may need your attention and for which I sincerely apologize.

As you may know, I became the St. Mary's president in September 2016. Recently, it was brought to my attention that in early 2016 the hospital may have had a Prop Q matter that I must now address.

I would appreciate a meeting with you or your designee at the earliest convenience to discuss my concerns and a more transparent association between St. Mary's and the Department of Public Health. I will also ask Margine Sako, our VP for Philanthropy & External Relations, to join us.

Thank you for your consideration.

Yours truly,

Pamela Lindemoen
President/CEO

PL:ms

cc: Mark Morewitz

May 17, 2017

Colleen Chawla, Deputy Director
Department of Public Health
101 Grove Street, Room 310
San Francisco, CA 94102

Dear Colleen:

Thank you for your understanding and cooperation in St. Mary's Prop Q proceedings for the PROS & Wound Clinic closure. Here is our initial outline for the Department and Health Commission for our June 6th and 20th hearings.

Please know that we accept responsibility for the lengthy delay. At the time of the closure there was an interim hospital president and leadership team. We now have in place Pam Lindemoen, our new permanent hospital president, and I was appointed Vice President for Philanthropy and External Affairs. As you know, I work closely with Wade Rose, VP of External & Government Relations for Dignity Health and am familiar with DPH and the Commission. It is our hope that this team will not only work more closely with DPH, but will also prevent this type of situation.

Background

PROS & Wound Clinic (Plastic, Reconstructive, and Orthopedic Surgery)
Program closed on August 31, 2016.
Annual loss for St. Mary's was \$1,400,000.

During June 21 to August 31, 2016, there were 437 patients receiving services whose wounds would heal and no longer require services or they would require longer treatment plans.

As of June 29, 2016 all the patients were contacted by the following methods:

- mail and/or in-person during their appointments (Attachment A)
- information was posted at the Clinic site, however, we cannot confirm if it was posted in languages other than English (Attachment B), and
- posted on the St. Mary's Medical Center website (Attachment C).

Staff provided patients with referral assistance based on their desire/need for continued care and provided a list of nine providers.

The staff persons were Lauren Jones, Office Manager; Cherisse Jones, Business Coordinator; and medical assistants, Brenda Alvarado, Reena Limbachia, Konstantin Sidorov, and Kemberly Acuna-Flores.

Unfortunately, our records and the remaining staff cannot confirm alternate providers chosen by the patients, the acuity of their wounds, the expected length of their recovery, nor the number of patients concluding their care before the August 31st closure.

To date we have received no patient complaints.

A summary of the patient insurance status is as follows and details attached (Attachment D):

4	self-pay uninsured
205	MediCare
15	MediCal
2	City and County of San Francisco
211	Commercial insurance

Staffing Impact

On June 9, 2016 the physicians and staff were informed that the Clinic would close on August 31st. A list of the positions in the Clinic is Attachment E. Human Resources appropriately counseled the 13 employees to other positions in the hospital, voluntary retirement, or new employment. To date we have received no complaints or appeals. We are seeking to reconstruct their final disposition.

Presentation

The presenters will be Pamela Lindemoen, Hospital President, and Dr. Robert Murray, Chief Medical Officer, will be present to respond to any questions. Please note that the hospital leadership who directed and managed the closure are no longer at the hospital or are on extended medical leave.

Again, we deeply regret the oversight and are confident that the current leadership will work closely with the Commission and Department of Public Health. Please let us know if additional information is needed for the May 31 submission to the Health Commission/Mark Morewitz.

We very much appreciate your continued cooperation and assistance.

Respectfully,

Margine Sako
VP Philanthropy & External Relations

ATTACHMENT A

June 29, 2016

We are writing to advise you that **St. Mary's Medical Center Outpatient Wound Healing, Amputation Prevention, and PROS Center** will be closing effective **July 31st 2016**. As of this date, the program will no longer be providing services. Our primary focus is to promote continuity of care and to help ensure a smooth transition to another wound care program for your ongoing clinical needs. The physicians in our program will still be treating patients and you can continue care with them by calling the numbers provided below.

We have also identified several hospital-based programs, any one of which is well-suited to provide wound care services.

To facilitate transition of care, we have included a request for medical records release. Upon completion of the form, please **send via fax or mail to St. Mary's Medical Center, attention: Release of Information.**

Fax: 415-750-8121

Mail: 450 Stanyan St. San Francisco, CA 94117

We apologize for any inconvenience and will be here as a resource until the end of July.

PUBLIC NOTICE

POSTED 7/28/2016

The purpose of this **Public Notice** is to inform you of the closure of the PROS/Wound Clinic located on the 2nd floor (2 West) at Dignity Health – St. Mary's Medical Center in San Francisco effective Friday, August 26, 2016. The PROS/WOUND Clinic provides a multidisciplinary approach to the care of patients with acute and chronic wounds including those that need the expertise of a plastics and reconstructive, podiatric and vascular surgeon.

This closure will not eliminate the number of licensed beds but it may result in the reduction of two employees. Hospital based outpatient programs offering comparable services are listed below. These facilities may serve Medicare and Medi-Cal patients depending upon the specific medical coverage outlined in each Program.

<p>Seton Center for Advanced Wound Care 1500 Southgate Ave Suite 115 Daly City, CA 94015 Phone: 650-991-6780</p>	<p>UCSF Center for Limb Preservation 400 Parnassus Ave. 5th Floor San Francisco, CA 94143 Phone: 415-353-2357</p>	<p>Stanford Healthcare Advanced Wound Care Center 450 Broadway St. Pavilion B, Suite 17 Redwood City, CA 94063 Phone: 650-721-8800</p>

This Public Notice has been posted in keeping with the requirements outlined by the California Department of Public Health in their AFL 11-24.

SMMC Hospital Operator instructions regarding Wound and PROS Center patients:

As of July 29th, 2016 this clinic is no longer accepting new patients.

The outpatient wound healing and PROS clinic will be closed as on Friday August 26th. We will be treating patients on a limited basis until then.

Patients should be instructed to contact their Physician's private office for any non-urgent needs. For urgent needs you can page the PROS resident pager.
