- Hospital Council sponsor

March
2017

PACC Convenes

- Healthcare leaders from public and private sectors – Public/Private Partnerships
- Facilitate, deliberative, and data driven process

June
2017

PACC Establishes Mission/Vision and Identifies High-Risk Populations

- To identify implementable, financially sustainable solutions to the post-acute care challenge for high- risk individuals in the city and County of San Francisco
- Deliberative process to identify populations – **Cognitively Impaired** and **Behaviorally Challenged**

November
2017

PACC Approves Report with Solutions

- Standardized Level of Care Assessment Tool
- Roving Placement Team
- Access to Supportive Living Alternatives

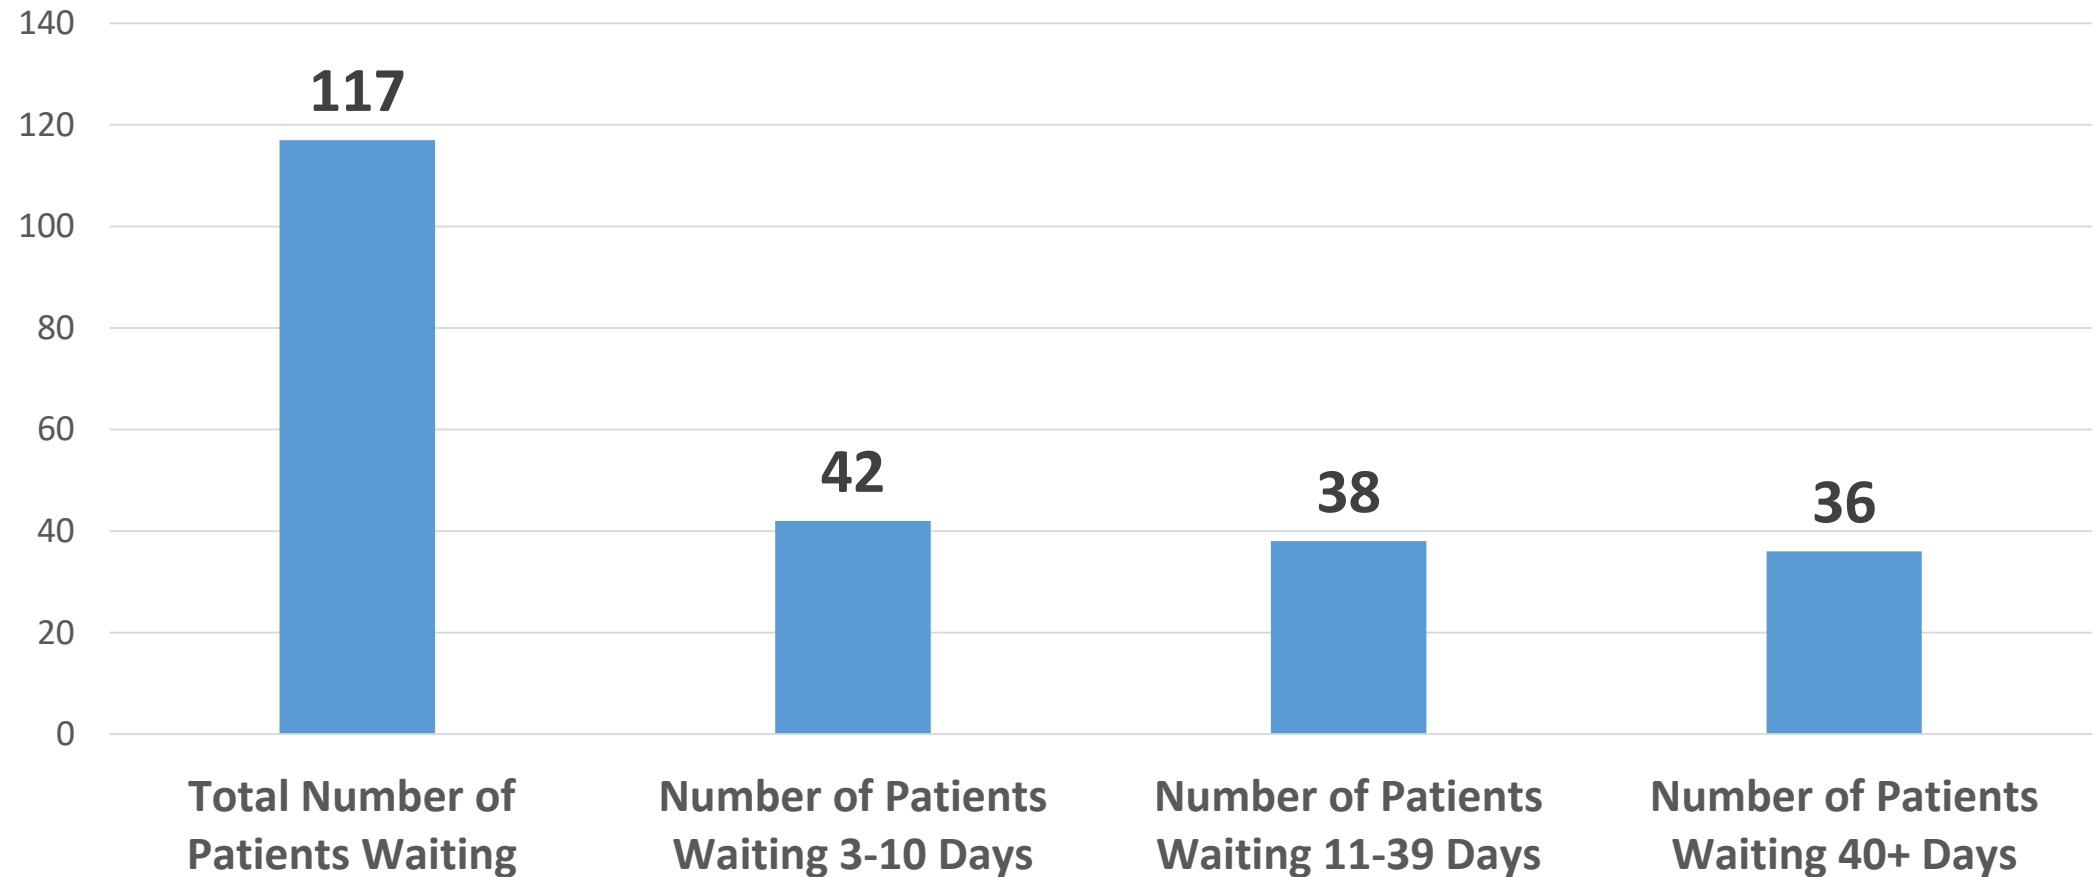

February
2018

San Francisco Section adopts PACC Report

- Next steps

A Deliberative and Data Driven Process

Point-In-Time Survey Results – April 20, 2017

Target Population

Cognitively
impaired

- Post-acute care patients requiring 24/7 supervision
- References an inability to independently self-manage activities of daily living (ADLs)

Behaviorally
Challenged

- Post-acute care patients with the following diagnoses:
 - Traumatic brain injury
 - Cognitive impairment from dementia, substance abuse, hypoxia
 - Mental health disorders: psychotic, mood, personality, and/or substance abuse

Recommended Solutions

Solution # 1

Adopt Level of Care Utilization System (LOCUS) for standardized post-acute care placement assessment

Solution # 2

Citywide Roving Placement Team

Solution # 3

Increase Access to Residential Care Facilities for the Elderly and Independent Housing with Wraparound Services
