1) CALL TO ORDER
Present: Commissioner Edward A. Chow M.D., President
   Commissioner Dan Bernal
   Commissioner Laurie Green, MD
   Commissioner David J. Sanchez Jr., Ph.D.

Excused: Commissioner Cecilia Chung
   Commissioner Tessie Guillermo
   Commissioner James Loyce, Jr., M.S., Vice President

The meeting was called to order at 4:08pm.

2) APPROVAL OF THE MINUTES OF THE HEALTH COMMISSION MEETINGS OF SEPTEMBER 6, 2018 AND SEPTEMBER 18, 2018

   Action Taken: The Health Commission unanimously approved the September 6, 2018 and September 18, 2018 minutes.

3) Greg Wagner, Acting Director of Health, gave the report. The full report can be viewed at: http://www.sfdph.org/dph/comupg/aboutdph/insideDept/dirRpts/default.asp

Federal Administration announces proposed changes to public charge

On September 22nd, the Federal Administration announced that it will be proposing a new rule to change “public charge” policies that govern how the use of public benefits affect individuals’ immigration status. This proposal would change longstanding policy and could significantly impact immigrants’ use of public assistance programs, like Medi-Cal, and their ability to settle into the United States. The rule is expected to be formally released in the coming weeks, at which point it must undergo a 60-day comment period and several other steps of review before it is finalized. As of now, the rules for California’s public assistance benefits have not changed.
The San Francisco Human Services Agency, San Francisco Department of Public Health, and other city agencies are coordinating efforts to examine the proposed rule’s impact on residents and potential response strategies. Over the summer, Mayor Breed submitted a letter to the Federal Administration raising concerns regarding potential changes to public charge and the harmful effects it would have on the health of residents and the City’s economy. The Department will continue to update the Health Commission after the proposed rule is officially released.

State Bill Introduced to Expand and Strengthen California Conservatorship Laws

On September 27th, Governor Jerry Brown signed Senate Bill 1045 (SB 1045), which would create a new type of conservatorship with the aim of better meeting the needs of individuals who have serious mental illness and substance (other than alcohol) use disorders. SB 1045 authorizes San Francisco, San Diego, and Los Angeles Counties to set up a procedure (per Board of Supervisor’s approval) to appoint a conservator for a person who is incapable of caring for their own health and well-being due to serious mental illness and substance use disorder, as evidenced by frequent placement under a 72-hour involuntary hold. The bill creates a five-year pilot program allowing for strengthened conservatorship laws to provide the least restrictive and most clinically appropriate alternative needed for the protection of the person, such as placement in supportive community housing that provides wraparound services. Currently, mental health based-conservatorship appointments are limited to persons determined to be gravely disabled as a result of a mental health disorder or an impairment by chronic alcoholism. The Department will continue to update the Commission as the City develops an implementation plan.

San Francisco assists Bladen County, NC during a time of great need

The Department of Public Health, Department of Emergency Management, Sheriff’s Departments, and Police Department deployed a team of four, one from each department, to North Carolina as part of the Emergency Management Assistance Compact (EMAC) team through California Governor’s Office of Emergency Services (Cal OES). On arrival to Raleigh, NC, the team was sited 100 miles away to Bladen County, NC, to assist with incident management at the county’s Emergency Operations Center (EOC).

As remnants of Hurricane Florence continued to affect Bladen County, the first three nights consisted of three tornado warnings, multiple medical patient evacuations, ongoing rescues, and power outages to 76 percent of the county. In the days that followed, impacts from flooding were major issues as flash flooding and river flooding affected the ability to transport resources (food, water, medications) to smaller communities. The team had to improvise, adapt, and overcome many challenges including relying on low-tech resources and incident management basics to assist.

State scan of Shipyard Parcel A finds an object from the Navy, public health not at risk

SFDPH stands with the community and supports all efforts to ensure safety

The radiological scan of the Hunters Point Shipyard Parcel A was more than 90 percent complete, with no findings of concern, when the state scanners found an elevated reading on September 7. They called in the Navy, per protocol, to investigate.

On September 11, the San Francisco Department of Public Health joined the California Department of Public Health (CDPH), the federal Environmental Protection Agency and the San Francisco Office of Community Infrastructure and Investment to observe the Navy respond, and dig up the item that caused the elevated reading.

They found an object called a “deck marker” buried 10.5 inches underground. A deck marker is a silver-dollar size object used on Navy ships to mark the edge of the deck (e.g. so that sailors did not fall off the edge in the
This deck marker contains radium 226, which is why it was found by the scanning instruments. These deck markers were removed from ships at the Shipyards in the 1950s.

Once the marker was found 10.5 inches below ground surface it was immediately removed for further study. It poses no hazard to the residents or workers on the site. The deck marker is the single object discovered so far by the CDPH scan that is not naturally occurring. CDPH will continue to complete the scan of Parcel A.

The discovery of the deck marker underscores the value of the CDPH scan of Parcel A. The deck marker did not belong there, and we don’t know how it got there, but we are glad that it was found. The scan is working exactly how it is supposed to, and residents can be confident everything that can be found will be found, and that their safety is our top priority. The scanning by the state health department provides additional oversight and strengthens the process.

We understand no one was exposed to any hazards from the deck marker, which was buried under ground, found during the scan, and removed by the Navy, leaving the remaining soil clear.

Although some media reports characterized the marker as “highly” radioactive, that description is not consistent with the findings of CDPH or the independent expert SFDPH hired to measure it. According to CDPH, the object was producing a relatively low level of radiation, with a reading of 0.09 mrem (mR) per hour. For comparison, an individual would receive 3.5 mR on a flight from Los Angeles to New York (source: US Centers for Disease Control) or 1.5 mR during a dental x-ray (source: US Nuclear Regulatory Commission). Those comparisons are consistent with the measurements prepared for SFDPH. As you can see from the comparison, if anyone had been exposed to the marker, which they were not, they would only be exposed to radiation lower than found in these examples from everyday life.

The San Francisco Health Department stands with the community. We support all efforts to ensure that Parcel A residents feel safe and are safe, including additional scanning and testing by the California Department of Public Health. We will continue to work with the Parcel A residents, State Health Department and the EPA to ensure that Parcel A is safe for current and future residents and workers.

**NACCHO 2018 Model Practice Award**

The National Association of City and County Health Officers (NACCHO) granted a 2018 Model Practices Award to the SFDPH Children’s Environmental Health Promotion Program (CEHP) and the Maternal Child & Adolescent Health Section, for their collaboration entitled “Developing Policies, Plans and Partnerships to Protect and Support Housing Security and Healthy Homes for Pregnant Women and Families Served by Public Health.” Karen Cohn, CEHP Program Manager, presented the project at NACCHO’s annual conference in July on behalf of the collaborative. This working group will soon be issuing a brief to share the evidence on the health impacts of family housing insecurity.

NACCHO Model Practices Program nationally honors and recognizes outstanding local public health practice and shares the outstanding practices through the Model Practices Database. By submitting a practice, local health districts contribute to the overall improvement of public health through effective evidence-based practice methods.

**Rehabilitation Symposium**

On September 20th, Laguna Honda’s Rehab Department hosted Pathways to Improved Care: Rehabilitation Symposium. This lecture series provided up-to-date clinical information that can improve the treatment and outcome of patients with rehabilitation needs. We had three guest speakers, Grace Chen, RN, CNS, CRN, CHPN, DSD, Christopher Focht, Au. D., CCC-A, F-AAA, and J. Claude Hemphill, MD, MAS, present on their specialties: restorative nursing, hearing impairment, and stroke treatment and prevention, respectively. A
two-hour exhibition followed afterwards which covered the topics of speech therapy, occupational therapy, physical therapy, and medical equipment and tutorials. Through social media promotion and network invitations, the event welcomed all staff, professional networks (USF, ZSFGH, SFSU, UCSF, Gurnick, Kindred Transitional Care and Rehabilitation) and the public.

**Interactive text messaging improves adherence and retention in PrEP care**

Population Health Division researchers, Dr. Albert Liu, from Bridge HIV, and Dr. Jonathan Fuchs, from the Center for Learning & Innovation, led a study of a mobile health, text messaging-based intervention, PrEPmate, to improve adherence and retention in pre-exposure prophylaxis (PrEP) care. The study results were published in the September 15th issue of Clinical Infectious Diseases.

The clinical trial enrolled young men who have sex with men who are among the most vulnerable to HIV in the US, and also have the lowest rates of PrEP uptake and high rates of PrEP discontinuation. Participants between the ages of 18-29 who were randomized to PrEPmate received weekly text message check-ins about PrEP, and daily reminders for pill-taking in the form of fun facts. Compared to those who received the standard of care, which included PrEP education and counseling provided by a health educator, participants receiving PrEPmate had higher visit retention and PrEP adherence as measured by drug levels. The investigative team believes that this easy to use and highly scalable intervention was effective by fostering communication and connection between the patient and provider, in addition to providing a daily reminder to take PrEP. PrEPmate is currently under study among transgender persons using PrEP and future pilots of the intervention are planned at public health clinics across the US.

**DPH receives Excellence in Environmental Health award**

Environmental Health won the 2018 Excellence in Environmental Health award from the California Conference of Directors of Environmental Health for the development and launch of the Online Retail Food Permit application and payment. This online application and payment is the first in the State for Environmental Health Programs. The award was based on innovation, creativity, collaboration and service to the public.

Congratulations to San Francisco Department of Public Health-Environmental Health Branch staff, Lisa O’Malley, Mary Freschet, Terrence Hong, Kenny Wong, Patrick Fosdahl, Michelle Kanemoto, Kyle Chan, Deborah Quinones and Stephanie Cushing and Julia Dysart, Priscilla Chu, and Gretchen Pauley of QI for their dedication and hard work in developing the online process and the creative presentation for California Conference of Directors of Environmental Health.

**Suicide Prevention Week**

In recognition of Suicide Prevention Week (September 9-15, 2018) and World Suicide Day (September 10, 2018), Behavioral Health Services (BHS) disseminated Each Mind Matters “Know the Signs” materials to providers and community members, as well as hosted an educational activity in the 1380 Howard lobby. For the first time, local businesses, such as The Market and Cumaica partnered with BHS and distributed “Know the Signs” coffee sleeves and drink coasters to spread the word. Slice of Life Café at 1380 Howard also supported the campaign again this year. BHS and local partners continue to encourage those that know someone who needs help to share online suicide prevention resources and National Suicide Prevention lifeline and crisis text line.

**Human Resources Hearing at Board of Supervisors**

On September 19th, the Board of Supervisors’ Government Audit and Oversight Committee held a hearing on African-American Workforce Hiring, Retention, and Promotional Opportunities – Workplace Discrimination and Complaints. The Department of Public Health (DPH) leadership attended this hearing in order to hear firsthand
the frustrations and experiences of staff pertaining to racism and discrimination. Roland Pickens, Tomas Aragon, Tosan Boyo, Rhonda Simmons, Karen Hill, Ayana Bennett, Alice Chen, Denise Fisher, and others, listened as speakers described workplace issues of workplace mistreatment and inequity around the City and within DPH. The Department will continue to address these issues and among other things, partner with unions to end racism and discrimination in the workplace.

Irene Sung, Chief Medical Officer of Behavioral Health, received the J. Elliot Royer Award

Irene Sung, Chief Medical Officer of Behavioral Health for the San Francisco Department of Public Health, received the 2018 J. Elliot Royer Award. This award recognizes those active in the medical field in San Francisco, Alameda, or Contra Costa counties that have made the most significant contribution to the advancement of psychiatry or neurology during the year. The award for community excellence is judged by evidence of service to community, evidence of original, creative contributions to the field, and the general esteem and aspect of the candidate's peers as a role model and mentors to other.

She was awarded for her career long commitment to community psychiatry within the Department of Public Health, and her work at non-profit organizations in both Contra Costa and San Francisco. In 2005, Dr. Sung was hired as Medical Director of CYF in CBHS. Throughout the years she has taken many different positions in DPH including CMO of Community Programs, Chief Medical Information Officer for Community Programs, Medical Director of CBHS and CMO of SFHN BHS. Through her leadership, she increased the number of Psychiatrists in Behavioral Health Services. She created leadership opportunities for psychiatrists in the development of Deputy Medical Directors who oversee the different modalities of psychiatric services across our system of care. She worked with UCSF and ZSFG to provide experiences in public sector psychiatry for residents and fellows – supporting the continuation of existing rotations, the development of the Child and Adolescent Psychiatry second year resident rotations, the development of a Public Psychiatry Fellowship, and support of a longitudinal clinic at one of our busiest clinics serving the homeless population. She supports an Early Career Public Psychiatrist Mentorship program in BHS.

Commissioner Comments:
Commissioner Chow asked for more information regarding the recent finding of an object in Parcel A of the Hunters point Shipyard. Dr. Tomas Aragon, SFDPH Health Officer and Director of the Population Health Division, acknowledged the repeated calls of community activists for more testing of the area. He stated that the object found had very low levels of radiation; he estimated that it would take 39 hours of direct contact with the object in order to receive as much radiation as one plane flight. He added that no radioactive dust has been detected by the sensitive instruments used in the recent scan of the area.

4) **GENERAL PUBLIC COMMENT**
There was no general public comment.
5) **FINANCE AND PLANNING COMMITTEE**
Commissioner Bernal chaired the Finance and Planning Committee and stated that the Committee recommended the Consent Calendar items for approval. He noted that the Committee approved the extension of the contract term for MedImpact Healthcare Systems, Inc contract as part of the Contracts Report. However, the contract may be brought back in November with a modification of the contract amount.

6) **CONSENT CALENDAR**

**Commissioner Comments:**
Regarding the AFL Enterprises contract, Commissioner Green noted that the contract summary states that the contractor will target patients “0 to 5 years of age.” She asked for clarification of the target population. Commissioner Chow stated that the DPH has early oral prevention programs for children of all ages; this vendor will fit within those activities.

Commissioner Sanchez noted that the UCSF School of Dentistry has done innovative worked and asked if they will be part of this vendor’s effort? Commissioner Chow noted that the DPH project is a UCSF/SFHIP collaboration.

**Action Taken:** The following were unanimously approved by the Health Commission:

- **OCTOBER 2018 CONTRACTS REPORT**
- **REQUEST FOR APPROVAL OF A NEW CONTRACT WITH THE AFL ENTERPRISES, LLC, IN THE AMOUNT OF $1,621,255 WHICH INCLUDES A 12% CONTINGENCY, TO PROVIDE INITIATIVE BREAKTHROUGH SERIES LEARNING COLLABORATIVE WORKSHOPS TO LOCAL SAN FRANCISCO DENTISTS IN PREVENTIVE DENTAL PRACTICES IN ORDER TO BETTER SERVE CHILDREN BETWEEN THE AGES OF 0-5 FUNDED UNDER THE MEDICAL WAIVER DENTAL TRANSPORTATION INITIATIVE (DTI) LOCAL DENTAL PILOT 1 PROGRAM (LDPP), FOR THE PERIOD AUGUST 31, 2018 THROUGH DECEMBER 31, 2020 (2.41 YEARS).**
- **REQUEST FOR APPROVAL OF A NEW CONTRACT WITH WIPFLI LLP TO PROVIDE PROFESSIONAL CONSULTING SERVICES RELATED TO FEDERALLY QUALIFIED HEALTH CENTERS (FQHC) ISSUES. THE TOTAL CONTRACT AMOUNT IS $640,360, WHICH INCLUDES A 12% CONTINGENCY AND AN OPTION TO EXTEND THE CONTRACT FOR A MAXIMUM OF 2 ONE-YEAR ADDITIONAL TERMS. THE TERM OF THE CONTRACT INCLUDING OPTIONS IS FOR THE PERIOD OCTOBER 1, 2018 TO SEPTEMBER 30, 2023 (60 MONTHS).**

7) **RESOLUTION ACKNOWLEDGING THE WORK OF BARBARA GARCIA AND HONORING HER MANY CONTRIBUTIONS TO THE SAN FRANCISCO DEPARTMENT OF PUBLIC HEALTH**

Edward A. Chow, MD, Health Commission President, presented the item.

**Commissioner Comments:**
Commissioner Green asked how similar the draft resolution is to the Board of Supervisors’ Proclamation written in honor of Ms. Garcia. Mr. Morewitz stated that the section that outlines Ms. Garcia’s major achievements at the DPH are similar but the rest of the document describes accomplishments unique to the DPH.

Commissioner Sanchez requested that another “Whereas’ clause be written to include more information on Ms. Garcia’s leadership qualities. Commissioner Chow requested that Mr. Morewitz work with Commissioner Sanchez on this request.
8) **THE SFDPH DIRECTOR OF HEALTH JOB DESCRIPTION**  
Edward A. Chow, MD, Health Commission President, presented the item.

**Action Taken:** The Health Commission unanimously approved the item.

9) **2016 PUBLIC HEALTH AND SAFETY BOND UPDATE**  
Mark Primeau, SFDPH Capital Projects, Terry Saltz, ZSFG Capital Projects, and Joe Chin, DPW, presented the item.

**Commissioner Comments:**  
Commissioner Green noted that the costs of the project coordination of the community health center renovation is higher than the same types of costs for the hospital. Mr. Primeau stated that the hospitals are a larger scale project so there are cost benefits at an administration level; this makes the scale less expensive for the hospital projects.

Commissioner Chow asked for more information regarding the Chinatown seismic project. Mr. Chin stated that the next phase of the project will use soil sampling and further testing of the current facility’s steel and concrete to determine the extent of seismic will be needed.

Commissioner Sanchez noted that construction companies are having difficulty hiring local workers due to the competition; he added that he is concerned with possible delays and cost increases. Mr. Primeau stated that the DPH has built in reserves to deal with any possible changes in cost; he acknowledged that the construction hiring market is very competitive.

10) **UCSF RESEARCH AND ACADEMIC BUILDING AT ZSFG UPDATE**  
Michael Bade, UCSF Associate Vice Chancellor, presented the item.

**Commissioner Comments:**  
Commissioner Chow noted that many of the projects are on time but several are not. Mr. Chin stated that the team did not take into account the interdependence of the units on the 3rd floor of Building 5. He added that the rehabilitation unit needs to be completed and licensed first before work can begin on the lab project.

Commissioner Chow asked if the UCSF/DPH project timelines are synchronized. Mr. Primeau stated that the DPH and UCSF designed their project schedules together.

11) **IT, EPIC PROJECT AND EPIC ORGANIZATIONAL CHANGE MANAGEMENT UPDATE**  
Winona Mindolovich, Acting CIO, and Albert Yu, SFHN CIO, presented the item.

**Commissioner Comments:**  
Commissioner Chow requested that future DPH EPIC updates include baseline timeline information to show a comparison.

Commissioner Green asked for more information regarding the in-person versus online training modules and predictions for the impact of implementation of EPIC on work productivity. Dr. Yu stated that the DPH is still assessing the comparison of in-person versus online training modules. He noted that during the initial implementation of EPIC, the DPH will backfill positions while training is being conducted.

Commissioner Bernal asked if the same metrics will be used to measure pre and post implementation. Ms. Mindolovich stated that the DPH is implementing a new service tool that will enhance its ability to measure performance metrics.
Mr. Wagner thanked Ms. Mindolovich and Dr. Yu for their effective work. He also thanked Commissioner Green for hosting a meeting on “Lessons of EPIC Implementation” with CPMC IT staff and DPH SFHN and IT staff. Commissioner Green noted that CPMC sent its highest IT leadership to assist the DPH.

12) **SFDPH HUMAN RESOURCE UPDATE**

Ron Weigelt, Director of Human Resources, presented the item.

**Commissioner Comments:**

Commissioner Green asked if there are any trends in the employee leave data. Mr. Weigelt stated that there have been more local, state, and federal regulations instituted regarding leave in the last few years and the DPH has instituted more effective mechanisms to track leaves and ensure employees receive guidance when to return to work.

Commissioner Sanchez thanked Mr. Weigelt for his effective work.

Commissioner requested that future presentations include trend data on the “Labor Relations Productivity Analytics” slide.

13) **OTHER BUSINESS:**

14) **JOINT CONFERENCE COMMITTEE REPORTS**

Commissioner Chow, ZSFG JCC Chair, stated that at its September 25, 2018 meeting, the Committee reviewed the following reports and presentations: Regulatory Report, Hospital Administrator’s Report, Human Resources Report, Medical Staff Report, “Optimizing a Care Experience Model,” and “The ZSFG Way.” The Committee approved the Performance Improvement and Safety Policy, Environment of Care Annual Report, several new service chiefs, Lab clinical rules and regulations, Urology Standard Procedures, Addiction Privilege list, and Surgery Privilege list. In closed session, the Committee approved the Credentials Report and PIPS Minutes Report.

**Commissioner Comments:**

Commissioner Sanchez noted that the SFGH Foundation held its annual event to award its Hearts grants to ZSFG and SFPDH programs and projects. This year the Foundation awarded $500,000 in grants; overall it is awarded $12 million. He noted that Dan Bernal, Health Commissioner, was the keynote speaker.

15) **ADJOURNMENT**

The meeting was adjourned at 6:13pm.
