COVID-19 Update

Grant Colfax, MD
Director of Health

June 16, 2020
Cumulative Cases and Deaths

2,971 Cases
46 Deaths
Hospitalizations

Patients in San Francisco hospitals shown here either have confirmed COVID-19 or are awaiting test results. Those awaiting results are labeled as “Suspected COVID-19” until they are proven either positive or negative by lab tests.

Patients who are suspected of being COVID-19 positive meet the Centers for Disease Control and Prevention guidelines based on their symptoms and other available information when they are admitted.
Containing COVID-19
5 Indicators to help assess progress

- Hospital System
- Cases
- Testing
- Contact Tracing
- Personal Protective Equipment

<thead>
<tr>
<th>Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td>We are hitting our targets. Reopening can continue, taking into account the other indicators and additional data. San Franciscans continue to take precautions, as they are a big part of our success.</td>
</tr>
<tr>
<td>Yellow</td>
<td>Evaluate the other indicators and additional data before further loosening of stay home order. San Franciscans continue to take precautions, to help us get to green.</td>
</tr>
<tr>
<td>Orange</td>
<td>Consider pausing or dialing back reopening based on the status of the other indicators and additional data. San Franciscans should take stronger precautions essential.</td>
</tr>
<tr>
<td>Red</td>
<td>Strongly consider increasing stay home restrictions, and possibly pause or dial back reopening, based on the status of the other indicators and additional data. San Franciscans may need to change behavior to help achieve improvements.</td>
