**MINUTES
HEALTH COMMISSION MEETING
Tuesday February 18, 2020 4:00 p.m.
101 Grove Street, Room 300
San Francisco, CA 94102**

1) CALL TO ORDER

Present: Commissioner Dan Bernal, President
Commissioner Edward A. Chow M.D.
Commissioner Cecilia Chung
Commissioner Suzanne Giraudo, Ph.D
Commissioner Laurie Green, MD
Commissioner Tessie Guillermo

The meeting was called to order at 4:04pm.

2) APPROVAL OF THE MINUTES OF THE HEALTH COMMISSION MEETING OF FEBRUARY 4, 2020

Action Taken: The Health Commission unanimously approved the February 4, 2020 minutes.

3) DIRECTOR'S REPORT

Grant Colfax, Director of Health, gave the report and requested that Dr. Tomas Aragon, SFDPH Health Officer and Director of the Population Health Division, present an update on COVID-19, Coronavirus, preparedness and responses update. The full report can be viewed at:

<http://www.sfdph.org/dph/comupg/aboutdph/insideDept/dirRpts/default.asp>

COVID-19 Preparedness and Response Update

San Francisco still has zero confirmed cases of COVID-19 (novel coronavirus) among San Francisco residents at this time. If a newly diagnosed case is confirmed in San Francisco, the Department of Public Health (DPH) will announce it, in cooperation with the U.S. Centers for Disease Control and Prevention (CDC) and the California Department of Public Health (CDPH). Residents of the Bay Area are currently at low risk of becoming infected with this novel coronavirus, unless they have recently traveled to Hubei Province, China or have come in close contact with someone who was ill who recently traveled in that area.

Our Public Health Emergency Preparedness and Response (PHEPR) team activated the Departmental Operations Center (DOC) on January 21, 2020. The Department of Emergency Management (DEM) activated the citywide Emergency Operations Center (EOC) on January 27, 2020. Public Health and DEM work closely with the Centers for Disease Control (CDC), California Department of Public Health (CDPH), San Francisco International Airport (SFO), regional public health jurisdictions, and local City and County of San Francisco Departments, to monitor the outbreak and prepare a response that protects the public. We are actively preparing for the possibility of confirmed cases here and focusing on prevention. We know there is a lot of concern in the community. We are continuing to work with all involved agencies and community partners to ensure that the public has access to updated and accurate information while prioritizing outreach to the Chinese community. Recent activities include:

- Inviting Chinese community leaders including family associations, merchants, medical providers, nonprofits and schools to a roundtable discussing about COVID-19 and City's preparedness efforts. The Mayor's Office, DPH and DEM conducted the meeting in English and Cantonese while the Office of Civic Engagement and Immigrant Affairs provided interpretation.
- Issuing a joint statement by the Mayor's Office, DPH and DEM on xenophobia in response to the discrimination against the Asian Pacific Islander community around the world. The risk for this virus depends on travel history, not on race, ethnicity or culture. We know that racial, ethnic and cultural discrimination cause bad health outcomes. This statement has also been translated in Chinese.
- Conducting a parent forum for parents at Gordon J. Lau Elementary School in partnership with the San Francisco Unified School District. Attendance included parents of students from Gordon J. Lau Elementary School, Jean Parker Elementary School, and Edwin and Anita Lee Newcomer School. DPH and DEM answered parents' questions and concerns to COVID-19 in English and Cantonese.
- Partnering with Supervisor Aaron Peskin for a joint press conference, including DEM, Office of Economic Workforce and Development, Chinese Hospital, Chinese Chamber of Commerce and Chinese Consolidated Benevolent Association at New Asia Restaurant. City officials and community leaders came together to promote tourism in Chinatown and the continuation of Lunar New Year festivities while reminding everyone to practice good hygiene and to get a flu shot. DPH provided in-depth interviews with KTSF, Singtao, Skylink TV and WorldJournal.
- Presenting at the Chinatown Disaster Preparedness Committee meeting. Representation from 20 community-based organizations attended in person and online webinar. SFDPH and SFDEM answered questions from community leaders in English and Cantonese.
- Continuing to update and distribute DPH COVID-19 Fact Sheets in [English](#), [Chinese](#), [Filipino](#) and [Spanish](#). These resources are disseminated at community outreach events, to the public, to media and to community organizations.

It is still cold and flu season. The best way that members of the public can protect themselves from getting sick is through frequent hand washing. Also, coughing or sneezing into your sleeve, and staying home if you're sick are important ways to prevent the spread of illness. We recommend getting a flu vaccine to help prevent illness and symptoms similar to COVID 19. There is no recommendation to wear masks or cancel events. We encourage everyone to stay informed and up-to-date through trusted sources such as www.sfdph.org and www.sf72.org.

Behavioral Health Updates

Three recent announcements exemplify the spectrum of work we are doing in behavioral health in San Francisco. One is an innovation, one is an expansion of a successful program, and one preserves important resources at risk.

Drug Sobering Center

The innovative drug sobering center proposed for 180 Jones St. in the Tenderloin is designed to create safety for people who use drugs – especially methamphetamine – and for the surrounding neighborhood, where public intoxication and overdose mortality are prevalent.

DPH is collaboratively designing a program with HealthRIGHT 360 that implements the top recommendation of the Methamphetamine Task Force in its final report: create a trauma-informed sobering center with harm reduction services for people under the influence of methamphetamine.

The pilot program at 180 Jones St. will prioritize clients experiencing homelessness and substance use disorder in the Tenderloin, working with outreach teams in the neighborhood and police officers from Tenderloin Station to refer clients to the sobering center. Welcoming, supportive care and hospitality services would include:

- Individualized monitoring for health and safety
- Providing respite, showers, hydration and light snacks, and some clothing if necessary
- Assessments for substance use, physical and mental health issues
- Linkage to social services, including assessment of housing needs
- Referrals to continue treatment at various levels of care

DPH and HealthRIGHT 360 are designing a 15-bed facility with a quiet rest area as well as room to walk, in order to accommodate people's needs at various stages of intoxication. The intended staff:client ratio is 1:4, which includes nurses, health workers, and a van driver who can transport clients. As is our practice when siting new programs in San Francisco, DPH will engage with community members to address their concerns and provide regular progress reports on what we expect will be an 18-month program. An affordable housing development is set to begin construction at 180 Jones St. in the fall of 2021, by which time we hope to have replicated the drug sobering center model elsewhere in San Francisco.

Hummingbird Place Expansion

The second recent announcement, of a proposed expansion of DPH's Hummingbird Place partnership with PRC/Baker Places, would allow us to serve more people in need of psychiatric respite. Since 2017, Hummingbird Place next to Zuckerberg San Francisco General Hospital has bridged a gap in care between psychiatric emergency or hospital care and continuing to treatment. It allows clients to rest and consider their next steps, which might include housing and/or substance use treatment, and to be prioritized for those services when they are ready.

Tipping Point Community announced last fall that it would fund an expansion of this model of care in San Francisco. The new center would open this spring at 1156 Valencia St., a Salvation Army property, with PRC/Baker Places and DPH serving 30 overnight clients at a time and up to 25 daytime drop-in clients. Services are designed to include:

- Referral to primary medical and psychiatric community providers
- Coordination of services and discharge planning
- Connection to shelter and housing
- Transportation to medical and social services appointments
- Food, clothing, access to showers, and laundry facilities
- Individual and group counseling to engage in motivational interviewing
- One-on-one peer support
- Daily living skills training

- Referrals to vocational services for assessment of job skills, training, and employment opportunities

City acquires two Board and Care Facilities slated for closure

Finally, the third recent announcement involves the preservation of two residential care facilities that were at risk of closing. The City of San Francisco is financing the acquisition of Grove Street House, a nine-bed, 60-day crisis stabilization facility for adults with chronic, co-occurring mental health and substance use disorders. The longtime operator and lessee of Grove Street House, PRC/Baker Places, will now be able to buy the building. The City also has declared its intent to purchase South Van Ness Manor, a long-term residential care facility with 29 licensed beds.

Black History Month

We are commemorating Black History Month across the department. The Annual Public Health Black History Event will feature Dr. Joy DeGruy, whose research focuses on the intersection of racism, trauma, violence and American slavery. She will speak on “Self-Care for African Americans: Taking Care of Ourselves to Take Care of Our Communities.” Tickets are still available on [Eventbrite](#). Zuckerberg San Francisco General will hold their annual Black History Month event, which this year is called “Next Movement” on February 26 from 11:45am to 2pm in the hospital cafeteria. All are welcome to attend. California Preterm Birth Initiative will be celebrating Black healthcare practitioners at their “Healing, Resistance, and Solidarity” event on Tuesday, March 24th at 5pm, featuring keynote speaker, Dr. Karen Scott. More info here: <https://pretermbirthca.ucsf.edu/events/healing-resistance-and-solidarity-power-black-healthcare-practitioners-policy-development-and>. We are running a social media campaign on [Twitter](#) and [Instagram](#) in honor of Black History Month, honoring a historic Black leader for each day of Black History Month.

Lunar New Year Parade

Happy Year of the Rat! In celebration of Lunar New Year, the City’s annual Chinese New Year Parade was held on February 8th. San Francisco Department of Public Health (DPH) participated in the City’s Emergency Operations Center (EOC) with Emergency Medical Services monitoring call volume and activating additional resources if needed. DPH also coordinated with other City agencies including the Department of Emergency Management, Police Department and Fire Department to ensure the safety of parade attendees. This year required extra education, planning, preparation and coordination due to concerns about COVID-19 (novel coronavirus).

Hearts in SF

Hearts in SF, an annual event, benefitting the San Francisco General Hospital Foundation, celebrates the work happening every day at the hospital. This year, special guests included Denise Tyson, former Mayor Willie Brown, Mayor London Breed, and a special video from Senator Kamala Harris, and was focused on the important work of ZSFG to address the mental health crisis. Among other significant donations, Kaiser Permanente pledged to invest \$3 million in the amazing Addiction Care Team at ZSFG.

Leaders with Heart Awards were presented during the program, which recognized extraordinary leaders who exemplify the compassion and commitment of ZSFG – caring for all San Franciscans. Leaders with Heart Awards went to: **Dr. Mark Leary**, who has dedicated his career to serving the most vulnerable with compassion and dignity. Joining the Department of Psychiatry in 1989, Dr. Leary has focused on community mental health needs in San Francisco, playing an integral role in the response to the HIV/AIDS epidemic, spearheading access to psychiatric care for incarcerated populations, and ensuring San Francisco’s only 24/7 Psychiatric Emergency Services is open and available to all. The other recipient was **the Social Medicine team**, a multidisciplinary team of physicians, social workers, pharmacists, nurses, patient navigators, community partners, and performance improvement specialists who look beyond the medical needs of frequent Emergency Department visitors and create a model of care that addresses medical, social, and psychological factors facing patients. Led by Jack Chase, MD, Hemal Kanzaria, MD, and Jenna Bilinski, RN, the Social

Medicine team is redefining whole-person care - meeting patients where they are, and finding the support and resources to help them live healthier lives.

Students talk about recent fentanyl-laced cocaine epidemic

<https://theaggie.org/2020/02/03/students-talk-about-recent-fentanyl-laced-cocaine-epidemic/>

Commissioner Comments:

Commissioner Bernal acknowledged the impactful work of Dr. Colfax, Dr. Aragon, and Dr. Bobba in the COVID-19 preparation activities. On behalf of the Commission, he extends gratitude for the entire team in keeping the public informed and feeling safe.

Commissioner Girardo stated that communication from the SFDPH in regard to COVID-19 preparation has been excellent. She requested guidance in regard to communicating to medically fragile patients who are concerned about participating in normal community activities. Dr. Aragon suggested stating the facts that there have been no community transmission cases to date. He added the diagnostic testing will be available in approximately one week.

Commissioner Chow stated that the SFDPH should be proud for how its leadership and teams have handled communications in regard to the COVID-19 preparation. He is also thankful that the SFDPH has conducted effective outreach to the Chinatown communities. He reiterated that good hand hygiene is important in prevention.

Dr. Colfax acknowledged Dr. Aragon, Dr. Bobba and the Department of Emergency Management, which has been an effective partner to the SFDPH. He also noted the many SFDPH staff who have been activated for this process.

4) GENERAL PUBLIC COMMENT

Ron Weigelt stated that he provided public comment in the fall of 2019 regarding the San Francisco Examiner article stating that Dr. Colfax asked for his resignation. He has not been able to obtain work since his departure from the SFDPH. He noted that while employed at the SFDPH, he received no negative performance evaluations and feels the situation that led to his departure was unfair. He requested that the Health Commission pass a resolution asking the Examiner to “have the article unpublished.”

Barry Pearl , resident of District 11, stated that he received a letter from Recology, dated January 17, 2020 stating that the property was not maintaining its garbage properly. He noted that all District 11 residents were sent this letter. He suggested that the SFDPH should rethink its relationship with Recology.

5) COMMUNITY AND PUBLIC HEALTH COMMITTEE

Commissioner Bernal, chair, stated that the Committee discussed a presentation on Housing Conservatorship which included information on SB1045 and SF40. The Committee also discussed a Methamphetamine Task Force presentation which included a recommendation for a drug sobering center.

6) SECOND HEARING ON FY2020-2021 AND FY2021-22 BUDGET

Greg Wagner, CFO, and Jen Louie, DPH Budget Director, presented the item.

Public Comment:

Marcy Katz Baralae, Compass Family Services, asked for support of an overdose prevention site and TAY-specific access point prevention sites.

Anthony Carroscio, Compass Family Services, advocated for effective substance use prevention services.

Wesley Saver, Glide Foundation Policy Manager, stated that funding is needed for transitional age youth (TAY) and youth substance use prevention and treatment services.

Marnie Regen, Larkin Street Services Director of Public Funding advocated for funding of TAY substance use residential treatment programs.

Commissioner Comments:

Commissioner Chow thanked Mr. Wagner and Ms. Louie for their comprehensive presentation. He asked if the wage equity initiative has been incorporated into the SFPDH proposed budget. Ms. Louie stated that the City will add these costs to the existing proposed SFPDH budget.

Commissioner Chow asked for more information regarding the ten Quality Management FTEs being added to the budget. Mr. Wagner stated that the discovery of patient incidents at Laguna Honda Hospital showed deficiencies in the LHH Quality staff model. He noted that previously incidents were reported to nursing leadership to investigate. The most effective model is to have Quality staff who are outside of the clinical setting to investigate any potential incidents. He added that new budget will fund a parallel Quality Management structure to the ZSFG Quality Department.

Commissioner Chow asked if the budget initiative for Medical/Surgical unit staff will help address some staffing issues that have been noted by ZSFG Emergency Department employees. Dr. Susan Ehrlich, ZSFG CEO, stated that the initiative will enable permanent FTEs to be hired for this unit; previously ZSFG used temporary staff. She added that psychiatric technicians will assist with the management of ZSFG Emergency Department behavioral health rooms.

Commissioner Chow noted the addition of new SFPDH Human Resources staff to the budget. He asked how the SFPDH determined that this is the correct amount of staffing in this area. Mr. Wagner stated that the SFPDH has added many new FTEs in the past decade but has not added new Human Resource staff to help support the large SFPDH staff amount. He noted that several years ago, the Controller's Office conducted a study and found that the SFPDH has a much lower ratio of fewer Human Resource positions to other staff, than other City departments.

Commissioner Chow asked for more information regarding the decrease in the Mental Health SF budget projections in year two. Mr. Wagner stated that the renovation of space in year one is a necessary cost that will not be repeated in year two. He added that at this time it is not possible to predict the configuration of how the CCSF budget will accommodate implementation of this program.

Commissioner Guillermo asked if the proposed budget takes into considerations of proposed changes to Medi-Cal reimbursement systems. Mr. Wagner stated that the proposals for these changes are so vast that it is not possible to plan until the changes are approved and details for implementation provided. He noted that the proposed changes would disrupt state-wide Medi-Cal reimbursement. Commissioner Guillermo recommended that the SFPDH educate any contractors that may be impacted by these changes.

Commissioner Guillermo asked for more information regarding the projected revenue increases for LHH. Mr. Wagner stated that they took the current Medi-Cal per diem rate and multiplied it by the annual number of LHH bed days to calculate the projection.

Action Taken: The Health Commission unanimously approved the SFDPH FY2020-2021 and FY2021-22 Budget.

7) “DRUG OVERDOSES AND DRUG USE”

Eileen Loughran, Community Health Equity and Promotion Health Program Coordinator and Phillip Coffin, MD, Director of Substance Use Research, presented the item.

Commissioner Comments:

Commissioner Chung noted that sometimes a cause of death is not listed as stimulant related although it may actually be related to psychosis tied to stimulant use. She asked how the City can correctly capture these data and the stories of these individuals. Dr. Coffin stated that the Medical Examiner report includes data on poison by drug use. He noted that a review of all toxicology reports for those who have died may give this contextual information but this is not current practice.

Commissioner Bernal asked if the data indicates if fentanyl was an unknown contaminant in other substances or the chosen substance. Dr. Coffin stated that most people using fentanyl are choosing to do so because it is less expensive and easier to transport into San Francisco.

Commissioner Green requested that the DPH provide information on point of entry using zip code data for syringe access sites and the sobering center.

Commissioner Chow suggested that the DPH be prepared to show how it measures success in this population and the effectiveness of the harm reduction model in this political environment.

Dr. Colfax thanked the team for the presentation. He noted the importance of using good data to drive good decisions. He added that there is not FDA approved overdose treatment for methamphetamine overdose equivalent to naxolone for opiates.

8) FY 2018-2019 SFDPH ANNUAL REPORT

Max Gara, Health Program Planner, presented the item.

Commissioner Comments:

Commissioner Chung thanked Mr. Gara for including footnotes giving context to the lack of data for transgender populations and gaps in SOGI data.

Commissioner Guillermo asked for more information regarding the distribution of the report. Mr. Gara stated that the report is sent to the Mayor’s Office, Board of Supervisors, San Francisco Library, and posted on the SFDPH website.

10) JOINT CONFERENCE COMMITTEE REPORTS

Commissioner Green, who chaired the February 11, 2020 LHH JCC meeting, stated that the meeting was primarily a closed session to discuss quality issues and consider the Credentials Report.

11) ADJOURNMENT

The meeting was adjourned at 6:32pm.
