SFGHMC CHIEF OF STAFF REPORT (ACTION ITEMS)
Presented to the JCC-SFGH on September 24, 2015
(09/14/15 Leadership, and 09/17/15 Business MEC)

ACTION ITEMS:

Dental and Oral Maxillofacial Surgery Service Rules and Regulations
MEC approved the Dental and Oral Maxillofacial Surgery Service Rules and Regulations with no changes. Copy of Dental and Oral Maxillofacial R&R was emailed to the Commissioners.

Credentials:
- Revised OB Privileges List (both with tracked changes, and final version attached):
  -Create a new category called Emergency Gynecology
  -Create a single “Inpatient Gynecology and Gynecologic Surgery”
  -Combine the 2 inpatient OB Categories (24.03, 24.04) into one and call it “Inpatient Obstetrical Care”.
- Positive Health Program (PHP)/Infectious Disease Privilege List Merger (attached):
  MEC members were informed about the historical background of the two divisions which were formed separately in 1983, and which is not the usual practice in the rest of the country (e.g. to have an HIV Division separate from the ID Division). MEC approved the proposal to merge the hospital’s PHP and Infectious Diseases divisions into one division, with a new title – HIV, Infectious Diseases and Global Medicine. To accommodate current faculty who are not Infectious Disease (ID) trained, and are seeing HIV patients at Ward 86, the merged privilege lists will include “61.00 Core privileges”. Faculty members who were ID trained will be applying for “60.10 Infectious Diseases” under “Special Privileges”.
- OB/GYN SP Renewal (Proctoring/Reappointment Grid attached; Copy of SP emailed to the Commissioners). Summary of changes include:
  -Proctoring requirements for core protocols (acute/urgent care, prenatal care, primary care, furnishing, and discharge of inpatients) were clarified (top of page 5).
  -Language was added to the definition of Health Care Management/Primary Care (protocol 2) to limit scope to primary care issues related to well woman, gynecologic, reproductive, and breast care.
  -Anoscopy (formerly protocol 11) was removed.
  -Vulvar biopsy (protocol 22) was added.
