| DSCT 5 (EP 5) - The medical record contains sufficient information to document the course and results of care, treatment, and services | • The Stroke Program physician leadership team have initiated the use of a time stamp for the results of the CT scan that is now included in the dictation of the radiology report. This documentation supports the course and treatment of the acute stroke patient.  
  • Physician Critical Care leadership and the Stroke Program Medical Director re-educated the Neurology residency staff to the Intracerebral Hemorrhage (ICH) score and NIHSS. These severity rating scales are currently included in a template for the initial consult on Stroke patients. The severity scoring scales are an educational component included in the monthly Stroke simulation for residency education. | Initiated April 18th 2016, anticipate completion August 2016.  
Responsible Person/s:  
Claude Hemphil MD  
Medical Director, Primary Stroke Program  
Christine Martin MS CNS  
Stroke Program Coordinator |
<table>
<thead>
<tr>
<th>Monitoring: The Stroke Program Coordinator and/or designee(s) will audit the medical records of 100% of all acute stroke patients activated for a stroke code weekly for four consecutive months for evidence of documentation of basic severity scores and time stamp of CT reporting and results.</th>
</tr>
</thead>
</table>
| **Monitoring**:
| * There was a formal roll out of a stroke documentation flow sheet, a paper tool containing the elements of the neurological assessment and the ability to time stamp the required intervals for assessment which was created to ensure documentation of these elements from time of acute stroke activation through the next 24 hour period.  
* The stroke documentation flow sheet is currently being revised to include the MENDS exam plus the GCS to enhance assessment practice. |
| **DSDF 3 (EP 3)** - Assessment and reassessment of patients are not completed according to the patients’ needs and clinical practice guidelines.  
1. In multiple tracers the patient did not have a neurological evaluation in a consistent or ongoing manner. |
| **Initiated April 18th 2016, anticipate completion August 2016.**  
**Responsible Person/s:**  
Claude Hemphil MD  
Medical Director, Primary Stroke Program  
Christine Martin MS CNS  
Stroke Program Coordinator |
### C. Joint Commission Traumatic Brain Injury Program Certification Survey – March 1st, 2016

**Joint Commission Traumatic Brain Injury Program Certification Survey**

<table>

<tr>
<th>Action Items:</th>
<th>Update(s):</th>
<th>Target Completion Date:</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>DSPR 1 (EP 2) - The Program defines the accountability of its leaders.</strong></td>
<td>• Indirect finding: action plan needs to be submitted within 60 days to Joint Commission.</td>
<td>Anticipate completion by April 30, 2016</td>
</tr>
<tr>
<td>1. The program does not define the accountability of its leaders. The program showed job descriptions but could not produce documented evidence (signed jobs descriptions) that the medical director and the program coordinator are held accountable to the program</td>
<td></td>
<td>(Responsible person(s)) Amy Winkleman MSN NP Traumatic Brain Injury Program Coordinator</td>
