STANDARDIZED PROCEDURE
Pain Consultation
Clinical Pharmacist

Title: Pain Consultation Service - Clinical Pharmacist

I. Policy Statement
   
   A. It is the policy of the Community Health Network and Zuckerberg San Francisco General Hospital and Trauma Center (ZSFG) that all standardized procedures are developed collaboratively and approved by the Committee on Interdisciplinary Practice (CIDP) whose membership consists of Nurse Practitioners, Certified Nurse Midwives, Physician Assistants, Registered Nurses, Physicians, Pharmacists, Administrators and other Affiliated Staff and must conform to all eleven steps of the standardized procedure guidelines as specified in Title 16, CCR Section 1474.

   B. A copy of the signed procedures will be kept in Hospital Pharmacy Administration, and on file in the Medical Staff Office.

II. Functions to be performed

   The clinical pharmacist, in accordance to the California Business and Profession Code 4050 to 4052, who has standardized procedures conforming to Title 16, California Code of Regulations, Section 1474, Standardized Procedure Guidelines, may perform the following procedures or functions to provide health care services in a clinic as part of a multidisciplinary group that includes physicians and registered nurses.

   A. Performing patient assessment

   B. Ordering and interpreting drug therapy-related tests

   C. Referring patients to other health care providers

   D. Participating in the evaluation and management of diseases and health conditions in collaboration with other health care providers

   E. Initiating, adjusting, or discontinuing drug therapy; the patient's treating prescriber may prohibit, by written instruction, any adjustment or change in the patient's drug regimen by the clinical pharmacist.
F. Providing consultation, training, and education to patients about drug therapy, disease management, and disease prevention.

A Clinical Pharmacist (CP) is a Registered Pharmacist who has additional preparation and skills in physical diagnosis, psychosocial assessment, and management of health-illness; and who has met the requirements in Title 16, CCR Section 1474. Clinical Pharmacists provide health care, which involves areas of overlapping practice between pharmacy and medicine. These overlapping activities require standardized procedures. These standardized procedures include guidelines stating specific conditions requiring the Clinical Pharmacist to seek physician consultation.

III. Circumstances Under Which a Clinical Pharmacist May Perform Function

A. Setting
The Clinical Pharmacist may perform the following standardized procedure functions with the Pain Consultation Service in both the Inpatient and Outpatient areas consistent with their experience and credentialing training.

B. Scope of Supervision Required
1. The Clinical Pharmacist is responsible and accountable to the Pain Consultation Service Medical Director or physician designee.

2. Overlapping functions are to be performed in areas which allow for a consulting physician to be available to the Clinical Pharmacist by phone or in person, including but not limited to the clinical area.

3. Physician consultation will be obtained as specified in the protocols and under the following circumstances:
   a) Acute decompensation of the patient
   b) Pain which is not resolved as anticipated
   c) Upon request of the patient, pharmacist or physician
   d) Poor patient adherence

IV. Requirements for the Clinical Pharmacist

A. Experience and Education
   1. Active California Registered Pharmacist license
   2. Possession of a Doctor of Pharmacy degree, and completion of a one year American Society of Health-Systems Pharmacy accredited pharmacy residency program; OR
   Possession of a Doctor of Pharmacy degree and completion of a one year pharmacy fellowship program; OR
Possession of a Baccalaureate of Pharmacy degree, completion of a one year pharmacy residency program, and one year of verifiable post-graduate work experience performing clinical functions in medication management.

(Two years of verifiable post-graduate work experience performing clinical functions in medication management, or certification as Board Certified Pharmacotherapy Specialist may be substituted for the one year residency or fellowship experience requirement) Successful completion of a Clinical Pharmacy Residency program which conforms to the American Society of Health-System Pharmacists standards.

B. Special Training
   1. Previous work experience in interdisciplinary pain consultation.
   2. Ongoing review of literature in pain management practices.

C. Evaluation of Clinical Pharmacist (CP) competence in performance of standardized procedures:
   1. Initial: at the conclusion of the standardized procedure training the Medical Director or physician designee will assess the CP's Clinical Pharmacist's ability to practice. Method of proctoring will be direct observation of 5 patients utilizing the Pain Consultation Service.
   2. Annual: Medical Director or physician designee along with Pharmacy Administration will evaluate the Clinical Pharmacist's competence through an annual performance appraisal and appropriate competency validation for the setting. Competency validation review will include direct observation of 5 patients on the Pain Consultation Service.
   3. Follow-up: areas requiring increased proficiency as determined by the initial or annual evaluation will be re-evaluated by the Medical Director or physician designee and Pharmacy Administration at appropriate intervals until acceptable skill level is achieved.

V. Development and Approval of Standardized Procedure

A. Method of Development
   Standardized procedures are developed collaboratively by the Nurse Practitioners, physicians, pharmacists and administrators and must conform to the eleven steps of the standardized procedure guidelines as specified in Title 16, CCR Section 1474.

B. Approval
   All standardized procedures must be approved by the CIDP, Credentials Committee, Medical Executive Committee and Governing Body prior to use.

C. Review Schedule
   The standardized procedure will be reviewed every three years by the practitioner and medical director and as practice changes.
STANDARDIZED PROCEDURE
Pain Consultation
Clinical Pharmacist

D. Revisions
All changes or additions to the standardized procedures are to be approved by CIDP accompanied by the dated and signed approval sheet.

VI. Protocol for Clinical Pharmacist with the Pain Consultation Service

A. Definitions: This protocol describes the procedure for Scope of Practice of the Clinical Pharmacist with the Inpatient Pain Consultation Service and Pain Consultation Clinic

1. The patient must be referred for the management of pain
2. Standardized Procedure functions will be performed only when a consulting physician is available in person or by phone to the clinical pharmacist.
3. Conditions requiring consultation with the Pain Consultation physician
4. Referral by medical team for patients with unrelieved pain

1. Management of patients with pain
2. Ordering laboratory tests pertaining to pain management
3. Recommending new medications and changing medications with physician consultation
4. Patient education regarding pain management

B. Data base Assessment

1. Subjective
   a. Chief complaint or present status of pain
   b. Medication reconciliation, adherence, and concordance, including Current therapy, specifically including pain medications, medications for constipation, psychoactive medications and other treatments for pain
