# SCENES AROUND ZSFG

8/20/2019

Zuckerberg San Francisco General  
Hospital and Trauma Center

# SUCCESS STORIES

- Teams can access patient records at outside hospitals more seamlessly using CareEverywhere.
- 75% of the 8,655 HelpDesk tickets opened have been resolved.
- 85% of ambulatory care visits were closed on the same day.
- Average hospital registration has been just under 7 minutes.
- Epic HB Revenue is at 100% of baseline, and PB Cumulative Revenue is at 89% of baseline.

# SUCCESS STORIES

“*There's more work to be done, but we are continuing to move forward every shift (and day). And most importantly, there **haven't been any significant interruptions in patient care or patient flow***” --

Psychiatry

“*After less than 2 weeks since go-live I have already seen powerful ways that Epic will enhance efficiency and care coordination. Epic is a **game changer for ZSFG!!***” -- GI

# CELEBRATIONS

---

Testing furniture layout and signage to improve workflow in outpatient lobby improved lead times from registration to completed labs by **10 minutes!**

---

Zone Coordinators and ATEs attending huddles and using the buddy system with SUs and CSUs

---

4C staff utilizing Epic "seamlessly" -

# PATIENT STORIES

A Patient Advisory Member shared how meaningful it is that all her providers are now connected in a way they were not before.

Another Patient Advisor showed on his phone the MyChart application and shared that this is the first time he has ever been able to go to his doctor prepared with his lab results... "I see them, know what they are and what questions to ask."

# *What can we do now we couldn't before?*

*We had a patient with a critical lab result, and the Call Center was able to see, for the first time, that the patient was currently in our Sobering Center. We were able to contact the team to address it right away. Prior to Epic, the Sobering Center charted on paper and wouldn't have been able to do this.*

*For the first time, we administered and documented correctly an electronically verified unit of blood.*

*A provider was completing a patient visit and was in the process of sending the patient to the lab. The patient asked for the paperwork for the lab and the provider informed the patient that the paper was no longer needed. The patient was surprised and responded, 'What are you talking about?!'*

*An outpatient physical therapist was able to get an e-referral for an admitted patient and was able to touch base with the patient right away.*
