

## Summary

### New RN SFHN Medication Refill SP

Judith Sansone and Dr. Ben Lui authored the SP with input from Hali Hammer and Pharmacy. Dr. Lui provided background on this SP that had gone to CIDP and been approved but the Credentials Committee felt this RN SP needed further evaluation. Since that time, consulted with Alameda County on their RN Medication Refill SP (their Medical Staff approved). Also, consulted with EPIC and the RN medication refill template (which is Appendix A in this SP). Out of 34 medication classes with decision support, goal to start with the top 5 medication classes: ACE inhibitors, Beta-blockers, Oral diabetic medications.

Developed for Registered Nurses working in primary care in the San Francisco Health Network. The SP applies to RN authorized to practice in the SFHN primary care clinics, including the nurse advice line and complex care management program.

The Standardized Procedures were developed with assistance from the following:

1. "Implementation of Standardized Procedures," Position Statement of the California Nurses Association (CNA).
2. "An Explanation of the Scope of RN Practice," State of California, Board of Registered Nursing (BRN), Department of Consumer Affairs.
- 3.

CIDP 2 person review conducted by Dave Smith. PharmD and Dr. Ben Lui.
