% Positivity

SF residency status and race/ethnicity are determined through case investigation, case jurisdiction transfers, and quality assurance where available; otherwise this information is obtained from lab records.

\*SF Population data source: ACS 2018 5-year estimate: <https://data.census.gov/cedsci/table?q=population&g=0500000US06075&hidePreview=false&tid=ACSDP5Y2018.DP05&vintage=2018>

Note: SF Population data prior to June 27, 2020 used alternative data source: CA DOF 2019: <http://www.dof.ca.gov/Forecasting/Demographics/Projections/>

†Number of tests include all lab tests (positive, negative, and indeterminate) for San Francisco residents reported to the San Francisco Department of Public Health. Testing counts are deduplicated by person and date.

‡Positivity is calculated using only positive and negative tests in the denominator, excluding tests with indeterminate results. The Other and Unknown race/ethnicity categories are differently reflected among positive tests and from negative tests because: 1) Other race/ethnicity is not reported by labs and is only assigned if identified during case investigation; and 2) positive lab cases of Unknown race/ethnicity can be recategorized into a known race/ethnicity category based on provider or patient report.
